"The Path of Humility: Caravaggio and Carlo Borromeo" establishes a fundamental relationship between the Franciscan humility of Archbishop of Milan Carlo Borromeo and the Roman sacred works of Caravaggio. This is the first book to consider and focus entirely upon these two seemingly anomalous personalities of the Counter-Reformation. The import of Caravaggio's Lombard artistic heritage has long been seen as pivotal to the development of his sacred style, but it was not his only source of inspiration. This book seeks to enlarge the discourse surrounding Caravaggio's style by placing him firmly in the environment of Borromeo Milan, a city whose urban fabric was transformed into a metaphorical Via Crucis. This book departs from the prevailing preoccupation - the artist's experience in Rome as fundamental to his formulation of sacred style - and toward his formative years in Borromeo's Milan, where humility reigned supreme. This book is intended for a broad, yet specialized readership interested in Counter-Reformation art and devotion. It serves as a critical text for undergraduate and graduate art history courses on Baroque art, Caravaggio, and Counter-Reformation art.

This book provides a thorough overview of cutting-edge research on electronics applications relevant to industry, the environment, and society at large. It covers a broad spectrum of application domains, from automotive to space and from health to security, while devoting special attention to the use of embedded devices and sensors for imaging, communication and control. The book is based on the 2018 ApplePies Conference, held in Pisa, Italy in September 2018, which brought together researchers and stakeholders to consider the most significant current trends in the field of applied electronics and to debate visions for the future. Areas addressed by the conference included information communication technology; biotechnology and biomedical imaging; space; secure, clean and efficient energy; the environment; and smart, green and integrated transport. As electronics technology continues to develop apace, constantly meeting previously unthinkable targets, further attention needs to be directed toward the electronics applications and the development of systems that facilitate human activities. This book, written by industrial and academic professionals, represents a valuable contribution in this endeavor.
