During Qing dynasty China, Italian artists were hired through Jesuit missionaries by the imperial workshops in Beijing. In *The Shining Inheritance: Italian Painters at the Qing Court, 1699–1812*, Marco Musillo considers the professional adaptations and pictorial modifications to Chinese traditions that allowed three of these Italian painters — Giovanni Gherardini (1655– ca. 1729), Giuseppe Castiglione (1688–1766), and Giuseppe Panzi (1734–1812) — to work within the Chinese cultural sphere from 1699, when Gherardini arrived in China, to 1812, the year of Panzi's death. Musillo focuses especially on the long career and influence of Castiglione (whose Chinese name was Lang Shining), who worked in Beijing for more than fifty years. Serving three Qing emperors, he was actively engaged in the pictorial discussions at court. *The Shining Inheritance* perceptively explores how each painter's level of professional artistic training affected his understanding, selection, and translation of the Chinese pictorial traditions. Musillo further demonstrates how this East-West artistic exchange challenged the dogma of European universality through a professional dialogue that became part of established workshop routines. The cultural elements, procedures, and artistic languages of both China and Italy were strategically played against each other in negotiating the successes and failures of the Italian painters in Beijing. Musillo's subtle analysis offers a compelling methodological model for an increasingly global field of art history. Poetry's as near as words ever get to the beauty of what's really true. Visibility's edge is what is traced. Timeless moments reveal un-seen as seen.

Stanley Kubrick hailed *The Shining* as 'the scariest horror film of all time' before its release in 1980. Though the film opened to poor reviews, it has since become one of the most admired horror films in cinema history. Exerting an enormous influence on popular culture, *The Shining* has spawned a vast array of interpretations and conspiracy theories. Roger Luckhurst's illuminating study of this seminal film explores its themes, tropes and resonances through a detailed analysis of sequences and performances. Situating *The Shining* in a series of fresh contexts, this book looks at the complex nature of horror cinema at the end of the 1970s and early 80s. Taking the maze of the haunted hotel as a key motif, Luckhurst offers numerous threads with which to navigate the strange twists and turns of this enigmatic film. This limited edition features original cover artwork by Mark Swan, [click here to read a Q&A with him](#).

Open this book and become shining stars in areas such as family, finances, education, and much more. Jesus said Christians are the "lights of the world"; Paul said they are to "shine like stars in the universe." These bright metaphors are a bold contrast to the ever-increasing darkness of evil that fills our world. Can Christians change the world as we have always believed? Can we turn the tide for good in our society? With inspiring messages from Joni Eareckson Tada, Dr. H. Norman Wright, Mother Theresa, Dr. Ronald Sider, and others, Dr. M. Norvel Young reveals ten practical and inspirational ways you can become the "living lights" Christ called you to be.

"Soars into sublime meditation...what makes this book so extraordinary is her willingness to reveal exactly what goes on in the sometimes mysterious encounter between therapist and patient."—The Los Angeles Times. A moving account of a true-life double healing through psychotherapy. In this brave, iconoclastic, and utterly unique book, psychotherapist Annie Rogers chronicles her remarkable bond with Ben, a severely disturbed five-year-old. Orphaned, fostered, neglected, and forgotten in a household fire, Ben finally begins to respond to Annie in their intricate and revealing platy therapy. But as Ben begins to explore the trauma of his past, Annie finds herself being drawn downward into her own mental anguish. Catastrophically failed by her own therapist, she is hospitalized with a breakdown that renders her unable to speak. Then she and her gifted new analyst must uncover where her story of childhood terror overlaps with Ben's, and learn how she can complete her work with the child by creating a new story from the old—one that ultimately heals them both.

For many years now there has been an upsurge in revelation stories and alternative viewpoints on man's history. People such as Graham Hancock and Lawrence Gardner have brought to light many new ideas and many new problems. Now there is a new theory which is all-encompassing and clearly brings into focus a more sinister reason behind the emergence of civilisation. In his theory on Atlantis Graham Hancock is receiving much admiration and academic acclaim. Standard academic thought is more towards the spontaneous eruption of civilisation across the globe, with little or no explanation of why there are so many similarities between the cultures. Now, Philip Gardiner, in his new book *THE SHINING ONES* is set to turn even this upon its head. The theory is so simple that it begs the question, why has it not been thought of before? The reason for universal similarity of architecture, language, art, travel and religious belief is quite simply an ancient and secret religious brotherhood who have hidden themselves deep within the symbols, ciphers and codes of our ancient texts for hundreds of years. They held a secret knowledge and power base which spread with them across the globe. The very title that they have given themselves is hidden within the standard text and religious books we use every day -- *The Shining Ones*. Put like this, the whole thing can sound like an X-Files conspiracy theory. However the author has invested huge amounts of time and energy checking, researching and seeking the advice of academics. Now the theory is attracting the attention of historians who can see that the patterns are as subtle as this author proposes. The fact is, this theory does explain away all the problems with dating and variations that people such as Hancock have come up against. Many academics and especially Egyptologists are now turning to this way of thinking and with Gardiner's spirit and broad knowledge in history and language the history of the ancients and the secrets that they hold are becoming more clear. There are of course dissenters. The author has been accosted for his standpoint and there are still those hardened academics and even non-academics who refuse to even listen. However, there is a major TV documentary in pre-production stages and with interviews planned across the nation on radio and TV the message

may soon be accepted as a credible theory.

A narrative history of the unlikely Maoist rebellion that terrorized Peru even after the fall of global Communism. On May 17, 1980, on the eve of Peru's presidential election, five masked men stormed a small town in the Andean heartland. They set election ballots ablaze and vanished into the night, but not before planting a red hammer-and-sickle banner in the town square. The lone man arrested the next morning later swore allegiance to a group called Shining Path. The tale of how this ferocious group of guerrilla insurgents launched a decade-long reign of terror, and how brave police investigators and journalists brought it to justice, may be the most compelling chapter in modern Latin American history, but the full story has never been told. Described by a U.S. State Department cable as "cold-blooded and bestial," Shining Path orchestrated bombings, assassinations, and massacres across the cities, countryside, and jungles of Peru in a murderous campaign to seize power and impose a Communist government. At its helm was the professor-turned-revolutionary Abimael Guzmán, who launched his single-minded insurrection alongside two women: his charismatic young wife, Augusta La Torre, and the formidable Elena Iparraguirre, who married Guzmán soon after Augusta's mysterious death. Their fanatical devotion to an outmoded and dogmatic ideology, and the military's bloody response, led to the death of nearly 70,000 Peruvians. Orin Starn and Miguel La Serna's narrative history of Shining Path is both panoramic and intimate, set against the socioeconomic upheavals of Peru's rocky transition from military dictatorship to elected democracy. They take readers deep into the heart of the rebellion, and the lives and country it nearly destroyed. We hear the voices of the mountain villagers who organized a fierce rural resistance, and meet the irrepressible black activist María Elena Moyano and the Nobel Prize-winning novelist Mario Vargas Llosa, who each fought to end the bloodshed. Deftly written, *The Shining Path* is an exquisitely detailed account of a little-remembered war that must never be forgotten.

It is a privilege to share through the ministry of writing this remarkable life with others. The life of Tom Tipton begins as a child in segregated Washington, DC; travels through the powerful music world of jazz, gospel music, and the old hymns; reaches into politics and the struggles and hopes of desegregation; explores worldwide evangelism; and is still being lived out in 2013 in the Twin Cities of Minnesota. It would be a mistake to suppose that Tom Tipton's biography is just one more in the array of books that represent the cult of personal exposure. His is different in kind. His message is one of encouragement to the thousands of people who are now discouraged. His story belongs in one sense to the literature of witness, but in a far deeper sense, it belongs to the literature of hope. It is my hope that those who read these words will have their own lives enriched, in the same way that Tom Tipton has enriched so many lives through his ministry of music. He is an amazing man who has the gift of bringing out the best in others. Prepare for a spiritual experience.

This book offers a detailed analysis of the construction, reception, and eventual decline of the cult of the Hungarian Communist Party Secretary, Mátyás Rákosi, one of the most striking examples of orchestrated adulation in the Soviet bloc. While his cult never approached the magnitude of that of Stalin, Rákosi's ambition to outshine the other "best disciples" and become the best of the best was manifest in his diligence in promoting a Soviet-type ritual system in Hungary. The main argument of *The Invisible Shining* is that the cult of personality is not just a curious aspect of communist dictatorship, it is an essential element of it. The monograph is primarily concerned with techniques and methods of cult construction, as well as the role various institutions played in the creation of mythical representations of political figures. While engaging with a wider international literature on Stalinist cults, the author uses the case of Rákosi to explore how personality cults are created, how such cults are perceived, and how they are eventually unmade. The book addresses the success—generally questionable—of such projects, as well as their uncomfortable legacies.

This penetrating story shows the slide of self-obsession into hatred for and destruction of anything or anyone else who seems more beautiful or greater. Some will see it as fantasy, others as a religious story; it is timeless." —Anna Buck: Winner of numerous poetry awards.
