"The Crescent and the Eagle" examines the awakening of Albanian national identity from the end of the 19th century to the outbreak of the First World War - a period of intense nationalism in the Balkans - from an Ottoman perspective. Drawing on Ottoman and European archival material, the book undermines the customary negative stereotypes of Ottoman rule, offering a more nuanced interpretation. Gawrych provides a critical but objective examination of the evolution of government policies toward Albanians, from attempts to mould them into an "iron barrier" to the establishment of a uniform system of administration. He argues that this was a result of a complicated set of conflicting allegiances and identities, rather than a simply adversarial struggle between government imposition of policy and Albanian resistance. The author also analyses the general problems of endemic violence and misadministration at the provincial level, and examines Albanian efforts to gain nationality rights and maintain local privileges and tribal autonomy. Weaving his analysis of these events into a chronological framework, he concludes that Albanian independence resulted from a confluence of foreign and domestic developments rather than from the design and will of the Albanians themselves. This stimulating study offers many fresh insights into the dynamics of power within the Ottoman Empire and contributes a new perspective to the study of the development of Albanian nationalism.

Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war

destroys more than just buildings and bridges.

Father Goriot is one of French novelist Honore de Balzac's most important pieces of

writing. Three lives intertwine in Paris: an old man, a criminal and a law student. The novel evokes an unstable period in France, when many were desperate to climb the social ladder into the upper classes, and it questions social institutions such as marriage. The city is an important presence in this work. Balzac was both praised and censured for his realistic portrayal of city life.

Northern Albania and Montenegro are the only regions in Europe to have retained a true tribal society up to the mid-twentieth century. This book provides the first scholarly investigation of this tribal society, a pioneer work that offers a detailed survey of all the major Albanian-speaking tribes in Albania, Montenegro and Kosovo. Robert Elsie provides comprehensive material on the 69 different tribes, including data on their locations, religious affiliations, tribal structures and relations, population statistics, tribal folklore, legends and history. Also included are excerpts from the works of prominent nineteenth and early-twentieth century writers, such as Edith Durham and Johann Georg von Hahn, who travelled through the tribal regions, as well as short biographies on prominent figures linked to the tribes. As the first book of its kind, *The Tribes of Albania* will be of interest to scholars and students of the Balkans, of southeastern European anthropology, ethnography and history.

This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words, sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by familiarity, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

In Pannonia and Upper Moesia, first published 1974, András Mócsy surveys the Middle Danube Provinces from the latest pre-Roman Iron Age up to the beginning of the Great Migrations. His primary concern is to develop a general synthesis of the archaeological and historical researches in the Danube Basin, which lead to a more detailed knowledge of the Roman culture of the area. The economic and social development, town and country life, culture and religion in the Provinces are all investigated, and the local background of the so-called Illyrian Predominance during the third century crisis of the Roman Empire is explained, as is the eventual breakdown of Danubian Romanisation. This volume will appeal to students and teachers of archaeology alike, as well as to those interested in the Roman Empire – not only the history of Rome itself, but also of the far-flung areas which together comprised the Empire's frontier for centuries. Muslims remain largely unaware of the importance and value of the Qur'anic

principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come. This title was first published in 2000: The focus of this analysis is that of moral standards in public service, with special attention to the role(s) of officials. It presents discussion of some of the issues that seem to the contributors to be of

pressing importance and that seem to have relevance for public service in the new millennium. It concentrates in particular on public officials, and the constraints imposed on them by the political environment in liberal democracies. Professor Skendi, a native of Albania, traces the progress and setbacks of Albania's long struggle for national unity during this least-known period of its intricate history. He discusses the heritage of its people and examines in detail the developments that led to Albanian independence: national resistance to the decisions of the Congress of Berlin, later opposition to Turkey, and the struggle between the Albanians and the Young Turks. Consideration is given to such internal problems as geographic configuration, religious and political division, and to such external problems as Italo-Austrian rivalry, political interference from neighboring states, and the involvement of great powers.
