vocabulary load, and vocabulary test development. This book has been written for vocabulary researchers and curriculum designers to describe the factors they need to consider when they create frequency-based word lists. These include the purpose for which the word list is to be used, the design of the corpus from which the list will be made, the unit of counting, and what should and should not be counted as words. The book draws on research to show the current state of knowledge of these factors and provides very practical guidelines for making word lists for language teaching and testing. The writer is well known for his work in the teaching and learning of vocabulary and in the creation of word lists and vocabulary size tests based on word lists.

From Anglo-Saxon runes to postcolonial rap, this undergraduate textbook covers the social and historical contexts of the whole of the English literature.

Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-authored by two modern languages educators with over 40 years of extensive classroom experience between the two, both in the UK and internationally. This 'no-frills' book contains 19 units of work on very popular themes, jam-packed with graded vocabulary-building, reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns and structures are recycled and interleaved throughout. Each unit includes: 1) a

sentence builder modelling the target constructions;2) a set of vocabulary building activities;3) a set of narrow reading texts exploited through a range of tasks focusing on both the meaning and structural levels of the text; - a set of retrieval-practice translation tasks;4) a set of writing tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and communication of meaning. Based on the Extensive Processing Instruction (E.P.I.) principle that learners learn best from comprehensible and highly patterned input flooded with the target linguistic features, the authors have carefully designed each and every text and activity to enable the student to process and produce each item many times over. This occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.

This book is an ambitious synthesis of the social, economic, political and cultural interactions between Greeks and non-Greeks in the Mediterranean world during the Archaic, Classical and Hellenistic periods. Instead of traditional and static distinctions between Greeks and Others, Professor Vlassopoulos explores the diversity of interactions between Greeks and non-Greeks in four parallel but interconnected worlds: the world of networks, the world of apoikiai

('colonies'), the Panhellenic world and the world of empires. These diverse interactions set into motion processes of globalisation; but the emergence of a shared material and cultural koine across the Mediterranean was accompanied by the diverse ways in which Greek and non-Greek cultures adopted and adapted elements of this global koine. The book explores the paradoxical role of Greek culture in the processes of ancient globalisation, as well as the peculiar way in which Greek culture was shaped by its interaction with non-Greek cultures. The teachings of Sufism, the mystical branch of Islam, offer a startling resolution to many contemporary problems. This book outlines the main tenets of Sufism as taught by the Sufi masters of Central Anatolia. A discussion of Sufi psychology and its seven levels of selfhood heralds the possibility of psychological evolution for all human beings to higher stages of consciousness. Using the promise of the Sufi vision, the author builds a bridge between the West and Islam.
