For more than two decades, the law and economics movement has been one of the most influential and controversial schools of thought in American jurisprudence. In this authoritative intellectual history, James R. Hackney Jr. situates the modern law and economics movement within the trajectory of American jurisprudence from the early days of the Republic to the present. Hackney is particularly interested in the claims of objectivity or empiricism asserted by proponents of law and economics. He argues that the incorporation of economic analysis into legal decision making is not an inherently objective enterprise. Rather, law and economics often cloaks ideological determinations—particularly regarding the distribution of wealth—under the cover of science. Hackney demonstrates how legal-economic thought has been affected by the prevailing philosophical ideas about objectivity, which have in turn evolved in response to groundbreaking scientific discoveries. Thus Hackney's narrative is a history not only of law and economics but also of select strands of philosophy and science. He traces forward from the seventeenth-century the interaction of legal thinking and economic analysis with ideas about the attainability of certitude. The principal legal-economic theories Hackney examines are those that emerged from classical legal thought, legal realism, law and neoclassical economics, and critical legal studies. He links these theories respectively to formalism, pragmatism, the analytic turn, and neopragmatism/postmodernism, and he

explains how each of these schools of philosophical thought was influenced by specific scientific discoveries: Newtonian physics, Darwin's theory of evolution, Einstein's theories of relativity, and quantum mechanics. Under Cover of Science challenges claims that the contemporary law and economics movement is an objective endeavor by historicizing ideas about certitude and empiricism and their relation to legal-economic thought.

An Irish Miracle is the story of Dillon and Alastar Connolly, young men separated by two generations and searching for their places in the world. From an Ohio farm to western Ireland and from the 1940s to present day, their journeys take them through peaceful countryside and personal challenges. The paths of these two young men cross in unexpected ways, never far from the people, the horses, and the lands they love. Dillon begins his part of the adventure with more than a little trepidation, but he soon finds himself drawn to the beauty of the Irish countryside, and the kindness of the Irish people he meets along the way. Alastar's gift and passion for horses leads him to Ballybrit, home of the world-famous Galway Racecourse . . . and the fiery redhead, Rita O'Reilly. Once you follow the emotional journeys of these two young men, you'll feel drawn to the Emerald Isle, just as they both were. And when five o'clock comes around, you just might find yourself searching for a well-poured pint of Guinness . . . or two.

This is the second memoir written by the accomplished author A. Leigh Corbett; it chronicles her university graduation and subsequent fall from grace into drug rehab and ultimately graduate school. As somewhat of a 'sequel' to "Wisdom 23," Corbett expands upon certain topics such as advice for people in general, and advice for writers in specific. With a sometimes dark and satirical undertone, her light-hearted philosophies raise interesting questions about life and the world we live in. Her experiences with love are unique as they are mistifying.

This new edition of the popular Pharmacology case studies for nurse prescribers has been thoroughly revised in the light of the latest research and guidance from NICE, the British National Formulary (BNF), the Royal Pharmaceutical Society, the Nursing and Midwifery Council and the Royal College of Nursing. While the first edition was aimed at students undertaking the non-medical prescribing modules, this updated text has broadened its scope and is relevant to all trainee and qualified nurse prescribers. There are new and additional chapters on pregnancy and breastfeeding, sexual health and contraception, and prescribing for frailty syndrome in the elderly. The latest developments in pharmacology (such as the emergence of biosimilar drugs) are included in the text; and all the chapters from the first edition have been revised and updated by expert healthcare practitioners. Meanwhile, the practical approach and helpful features that made the first edition so popular remain unchanged. The authors offer a basic introduction to pharmacological concepts, embedded in specific conditions, through case studies and self-assessment questions. By utilising a case study approach, they enable the reader to link pharmacological concepts with clinical practice. Reading this book, and carrying out the numerous self-assessment activities, will give the reader an appreciation of the value of having a sound pharmacological knowledge base in order to deliver safe practice, effective prescribing and improved patient care. Praise for the

Many policymakers, journalists, and scholars insist that U.S. hegemony is essential for warding off global chaos. Good-Bye Hegemony! argues that hegemony is a fiction propagated to support a large defense establishment, justify American claims to world leadership, and buttress the self-esteem of voters. It is also contrary to American interests and the global order. Simon Reich and Richard Ned Lebow argue that hegemony should instead find expression in agenda setting, economic custodianship, and the sponsorship of global initiatives. Today, these functions are diffused through the system, with European countries, China, and lesser powers making important contributions. In contrast, the United States has often been a source of political and economic instability. Rejecting the focus on power common to American realists and liberals, the authors offer a novel analysis of influence. In the process, they differentiate influence from power and power from material resources. Their analysis shows why the United States, the greatest power the world has ever seen, is increasingly incapable of translating its power into influence. Reich and Lebow use their analysis to formulate a more realistic place for America in world affairs.

Gravitation, the sphere symmetrical expanding acceleration of Earth means Earth's surface is “falling” under our feet! The surface of the Earth is accelerating together with us. We are taken by the surface of the Earth. Earth's surface is approaching us as if having been in “free fall”. While we have all the evidence to prove it - through all of our everyday life and all of our actions - it is so strange that it is difficult to believe. We do not trust our intuition or experience, because it is so unbelievable. This book on Gravitation: our Quantum Treasure does not want to convince you of the truth of the above. The purpose of the book is to show that Nature is granting us the chance to use the infinite energy capacity of gravitation. The future is about motion and electricity generation, based on gravitation. The book's conclusions are based on process approach, on quantum energy and mass balance, on elementary (proton-, neutron-, electron-, quark- and other) processes, on the definition of time, and the understanding of intensity. Our life is constantly changing. The key is the balance. The book gives arguments and explanations, describes events on quantum basis. It provides the perspective for the utilisation of Gravitation: our Quantum Treasure.
