Naturalism as a guiding philosophy for modern science both disavows any appeal to the supernatural or anything else transcendent to nature, and repudiates any philosophical or religious authority over the workings and conclusions of the sciences. A longstanding paradox within naturalism, however, has been the status of scientific knowledge itself, which seems, at first glance, to be something that transcends and is therefore impossible to conceptualize within scientific naturalism itself. In *Articulating the World*, Joseph Rouse argues that the most pressing challenge for advocates of naturalism today is precisely this: to understand how to make sense of a scientific conception of nature as itself part of nature, scientifically understood. Drawing upon recent developments in evolutionary biology and the philosophy of science, Rouse defends naturalism in response to this challenge by revising both how we understand our scientific conception of the world and how we situate ourselves within it.

Examining local content law and policy in the oil and gas industry, this book uses Nigeria as a primary case study, comparing its approach to countries such as Brazil and Norway which have also adopted local content laws in relation to their gas and oil industries. In considering various aspects of local content law and policy as they apply to the oil and gas industry, the book examines the factors behind the formulation of local content policies by petroleum producing states, and the various strategies they have employed to implement them. It analyses arguments against local content requirements from the perspective of international trade and investment law, and from liberal market economic theorists, who argue against its overall usefulness. The book highlights salient aspects of the oil and gas industry such as regulation, national oil companies, treatment of minorities, and policy formulation and implementation.

The Seventh Edition of Zumdahl and DeCoste's best-selling INTRODUCTORY CHEMISTRY: A FOUNDATION that combines enhanced problem-solving structure with substantial pedagogy to enable students to become strong independent problem solvers in the introductory course and beyond. Capturing student interest through early coverage of chemical reactions, accessible explanations and visualizations, and an emphasis on everyday applications, the authors explain chemical concepts by starting with the basics, using symbols or diagrams, and

conclude by encouraging students to test their own understanding of the solution. This step-by-step approach has already helped hundreds of thousands of students master chemical concepts and develop problem-solving skills. The book is known for its focus on conceptual learning and for the way it motivates students by connecting chemical principles to real-life experiences in chapter-opening discussions and Chemistry in Focus boxes. The Seventh Edition now adds a questioning pedagogy to in-text examples to help students learn what questions they should be asking themselves while solving problems, offers a revamped art program to better serve visual learners, and includes a significant number of revised end-of-chapter questions. The book's unsurpassed teaching and learning resources include a robust technology package that now offers a choice between OWL: Online Web Learning and Enhanced WebAssign. Lawyering Skills and the Legal Process bridges the gap between academic and practical law for students undertaking skills-based and clinical legal education courses at university. It develops oral and written communication, group working, problem solving and conflict resolution skills in a range of legal contexts: client interviewing, drafting, managing cases, legal negotiation and advocacy. The book is designed specifically to help students to practise and develop skills that will be essential in a range of occupations; develop a deeper understanding of the English legal process and the lawyer's role in that process; enhance their understanding of the relationship between legal skills and ethics; and understand how they learn and how they can make their learning more effective. This book provides a stimulating, accessible and challenging approach to understanding the problems and uncertainties of practising law that goes beyond the standard approaches to lawyers' skills.

Disability and Shopping: Customers, Markets and the State provides an examination of the diverse experiences and perspectives of disabled customers, industry and civil society. It discusses how the interaction between the three stakeholders should be shaped at aiming to decrease inequality and marginalisation. Shopping is a part of everyday modern life and yet businesses struggle to adequately meet the needs of 80 million disabled customers in the European Union single market. While there has been extensive research into how individuals engage in customer roles and experience, and how businesses and policies both shape and respond to these, little is known of the same dynamics and practices regarding people with impairments. This book addresses this need by revealing the perspectives, interactions and experiences of disabled customers and their interaction with policy and business. It will be required reading for all scholars and students of disability studies, sociology, marketing and customer relations.

This one-stop reference systematically covers key aspects in early drug development that are directly relevant to the discovery phase and are required for first-in-human studies. Its broad scope brings together critical knowledge from many disciplines, ranging from process technology to pharmacology to intellectual property issues. After introducing the overall early development workflow, the critical steps of early drug development are described in a sequential and enabling order: the availability of the drug substance and that of the drug product, the prediction of pharmacokinetics and -dynamics, as well as that of drug safety. The final section focuses on intellectual property aspects during early clinical development. The emphasis throughout is on recent case studies to exemplify salient points, resulting in an abundance of
