Do you really need a ten-step skincare regimen? Is that \$100 eye cream worth it? And what the heck are "actives" anyway? In this book two professional chemists and beauty industry insiders tell all. Depending on who you listen to, the secret to beautiful skin is microbiomes. Or Korean rice water. Or maybe a dermaplaning tool. It feels like you need a degree in chemistry to even understand what these products are, and if they live up to the hype. Luckily, Victoria Fu and Gloria Lu, professional skincare chemists have done that work so you don't have to. The science may seem complicated, but this book will show you how simple it can be, giving you what you need to make informed decisions about your skin (and your wallet). Skincare Actives? Technically, cat sneezes could count. SPF? Yep, super important. Caffeine serums? The science is still out. CBD additives? Not enough studies yet, so the jury's still out. The authors are the creators behind the popular Chemist Confessions Instagram, and this book brings the sass, humor, and solid information they're known for. Additional chapters address the best ingredients for every skin type, and reveal the only four products you really need.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Revised and Updated, Featuring a New Case Study How do successful companies create products people can't put down? Why do some products capture widespread attention while others flop? What makes us engage with certain products out of sheer habit? Is there a pattern underlying how technologies hook us? Nir Eyal answers these questions (and many more) by explaining the Hook Model—a four-step process embedded into the products of many successful companies to subtly encourage customer behavior. Through consecutive "hook cycles," these products reach their ultimate goal of bringing users back again and again without depending on costly advertising or aggressive messaging. Hooked is based on Eyal's years of research, consulting, and practical experience. He wrote the book he wished had been available to him as a start-up founder—not abstract theory, but a how-to guide for building better products. Hooked is written for product managers, designers, marketers, start-up founders, and anyone who seeks to understand how products influence our behavior. Eyal provides readers with:

- Practical insights to create user habits that stick.
- Actionable steps for building products people love.
- Fascinating examples from the iPhone to Twitter, Pinterest to the Bible App, and many other habit-forming products.

Take Your Skin to the Next Level with This Guide to Korean Skin Care "This book feels like talking with a trusted friend, one so generous with practical advice and wisdom. I wish our Dermatology textbooks had chapters like these!" ?Dr. Erin Tababa-Santos, creator of The Nerdy Derma #1 New Release in Massage and Skin Ailments Have you always longed for that fresh, glowing, no-makeup look? With this step-by-step guide to Korean skincare routines, anyone can attain healthy skin. But Skincare for Your Soul takes it one step further?it guides you to a place where skincare is also self-care. The Korean skin care journey. As much as we'd like, glowing, clear skin doesn't happen overnight. But there is beauty in the process?not just the results. Author Jude Chao links skincare to self-care culture, giving readers a practical guide to developing an ideal skincare routine and using it to help manage stress, anxiety, and depression. The Korean skincare routine invites us to look at our skincare not only as a way to reduce lines and wrinkles or clear up breakouts, but as a tool for developing our self-care habits. Steady improvement is the goal. Photoshopped perfection is neither realistic nor a healthy goal. What matters is caring for our mental health and building our self-esteem by intentionally taking time each day to give our skin some love. But it starts with changing how we view skincare and developing a routine that fits our personal needs and goals, and Chao helps you do that. Dive into Chao's book on K-beauty and discover: • An easy-to-follow, step-by-step guide to skincare • A clear breakdown of skincare products (not brands), and pros and cons to help customize your routine • How Korean skin care can be a reliable and effective mental health management tool • Tips for avoiding common types of exploitative and manipulative beauty marketing If you enjoyed books like The Little Book of Skin Care, The Skincare Bible, or Glow from Within, you'll love Skincare for Your Soul.

Breakouts. Dryness. Redness. Oiliness. If you're like most women, you've been on a never-ending quest for perfect skin—or even just good skin—since adolescence. It's a frustrating pursuit to say the least, filled with one disappointing (and expensive) miracle solution after another. Why is it so hard to get good skin? Adina Grigore, founder of the organic skincare line S.W. Basics, would argue that getting clear, calm, happy skin is about much more than products and peels. Or, rather, it's about much less. In Skin Cleanse, she guides readers through a holistic program designed to heal skin from the inside out. We tend to think of our skin as a separate entity from the rest of our bodies when in fact it is our largest organ. The state of our skin is a direct reflection of what our bodies look like on the inside. So Adina's program begins as any healthy regime should: with the basics for full-body health. That means eating plenty of fresh, whole foods; drinking more water; getting blood pumping and oxygen flowing to your cells through movement; and giving your skin a chance to repair and regenerate by resting. From there, readers are challenged to a skin cleanse that requires going product-free for twenty-four hours. Once detoxed, Adina then shows us how to overhaul our beauty routine, how to carefully add some products back in, and even how to make our own products at home, with advice and targeted solutions for specific skin conditions such as acne, dry skin, oily skin, and more.
