The book features original papers from the 2nd International Conference on Smart IoT Systems: Innovations and Computing (SSIC 2019), presenting scientific work related to smart solution concepts. It discusses computational collective intelligence, which includes interactions between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It also describes how to successfully approach various government organizations for funding for business and the humanitarian technology development projects. Thanks to the high-quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

The only way forward for business success is to create a memorable brand and fix it in the consumer's mind. Branding Your Business explains the whole branding process in easy-to-follow terms. Providing practical help instead of academic theories, it explains what a brand is and what it is not, how to conduct a 'DIY' brand audit and how to use marketing NLP and psychology principles to create a powerful brand for your business. Based around the theory that a brand is the total perception a customer has about a company, its products or services, Branding Your Business will reveal what is needed to create and manage successful brands, increase profits and leave the competition standing.

"The story of how Kris Meeke and Peugeot UK won the Intercontinental Rally Championship in their rookie year, from the disasterous opening round in Monte Carlo, to the ecstasy of winning the Sanremo rally and the championship in the same weekend."--Back cover.

The Stig, Top Gear's tame racing driver, is off on another adventure, this time following his passion for speed and adrenaline to its natural conclusion - motorsport. Stig has disappeared into the world of racing, and it's your job to find him. Follow Stig as he roams from the stifling heat of the Dakar rally to the redneck heartland of a NASCAR track, or from the nighttime drama of Le Mans to the mud-soaked stands of Silverstone for the British Grand Prix. Along the way you'll also find Clarkson, Hammond and May as they indulge in a spot of home-made motorhome racing or Roman rallying, middle-eastern style. The Where's Stig books have taken Top Gear fans by storm - and his latest voyage is the most action packed yet!

In Strategic Management: Theory and Practice, Fourth Edition, John A. Parnell leads readers through detailed, accessible coverage of the strategic management field. Concise and easy to understand chapters address concepts sequentially, from external and internal analysis to strategy formulation, strategy execution, and strategic control. Rather than relegating case analysis to a chapter at the end of the book, Parnell aligns each chapter's key concepts with 25 case analysis steps. Current examples and high interest real-time cases, largely drawn from The Wall Street Journal and Financial Times, illustrate the key role of strategic management in the United States and around the world.

Globalization has produced opportunities and challenges that countries and firms respond to with a variety of policies and strategies. Approaches that scholars may find intuitively appealing may be considered inappropriate in some contexts. This book highlights the diversity of challenges, opportunities as well as the policy and strategy options that governments and businesses have considered useful in different operational contexts. It brings together research done by scholars at the International Business Centre, Department of Business and Management at Aalborg University, Denmark, and seeks to provide inspiration for further research into some key international business issues. Issues discussed include the following:

- A\* The role of social capital in the internationalization process of firms.
- A\* Downstream and upstream aspects of internationalization.
- A\* Network organizational perspective on globalized innovation processes.
- A\* Performance assessment in cross-border mergers and acquisitions.
- A\* The human side of national and firm-level competitiveness.
- A\* Country-of-origin effect on brand perception.
- A\* Role of culture international joint venture management.
- A\* Multiculturalism and strategizing in international firms.

Published for more than 50 years, this annual covers the year's main motoring events, from Formula One to the latest styling studies and concept cars, and takes an overview of the

period it has chronicled. Famous photographers look back and select their favourite images from more than five decades of racing.

Drawing from 25 years of successful marketing and acclaimed, award-winning work, the authors show that bankable, creative ideas come from zeroing in on the one key business problem that must be solved and then rigorously unearthing insights that will lead to a spectacular solution.

The report discusses how economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries. The analysis indicate that: the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars; company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies, and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives; CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars; targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases; transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars.

Written in simple and conversational language. Main points are given in Bold Letters or in Boxes. Themes are easily understandable, even to a lay-man. A good number of case studies are included and each chapter has been discussed in detail & discussed throughly.

Handbook of Cluster Analysis provides a comprehensive and unified account of the main research developments in cluster analysis. Written by active, distinguished researchers in this area, the book helps readers make informed choices of the most suitable clustering approach

for their problem and make better use of existing cluster analysis tools. The book is organized according to the traditional core approaches to cluster analysis, from the origins to recent developments. After an overview of approaches and a quick journey through the history of cluster analysis, the book focuses on the four major approaches to cluster analysis. These approaches include methods for optimizing an objective function that describes how well data is grouped around centroids, dissimilarity-based methods, mixture models and partitioning models, and clustering methods inspired by nonparametric density estimation. The book also describes additional approaches to cluster analysis, including constrained and semi-supervised clustering, and explores other relevant issues, such as evaluating the quality of a cluster. This handbook is accessible to readers from various disciplines, reflecting the interdisciplinary nature of cluster analysis. For those already experienced with cluster analysis, the book offers a broad and structured overview. For newcomers to the field, it presents an introduction to key issues. For researchers who are temporarily or marginally involved with cluster analysis problems, the book gives enough algorithmic and practical details to facilitate working knowledge of specific clustering areas.
