Initially published in *The Strand Magazine*, which explains its episodic nature, *Five Children and It* was later collected into a book. Like many of E. Nesbit's works, it has proven popular with children and adults to this day. It has been adapted into a TV series, a musical, a film, and even an anime series. In this story, five siblings encounter an ancient magical creature in a gravel pit. The Psammead, as it calls itself, grants each of them a wish per day, with the restriction that it ends at sunset. As expected, all of the children's wishes go comically wrong, and it's up to them to solve the problems they created. E. Nesbit's enduring popularity is due in large part to the way she addresses children. Like Lewis Carroll and Kenneth Grahame, she engages children seriously, tapping into their imagination without any condescension. C. S. Lewis admired her, and the grumpy (but kind) sand-sorcerer Psamathos in *Roverandom*, a story J. R. R. Tolkien wrote for his own children, bears a striking resemblance to the Psammead—indeed, an early version of the story featured the creature itself! This book is part of the Standard Ebooks project, which produces free public domain ebooks. The battle between boys and bots is on in this funny, fast-paced novel. Ken is an EngiNerd: one of a super-smart group

of friends—all nerds—who have been close since kindergarten. They may be brainiacs, but they're just like everyone else: they fight with one another, watch too much TV, eat Chinese food, and hate walking their dogs. Well, maybe not just like everyone because Ken's best friend Dan has been building robots. He then secretly sent one to each of the EngiNerds, never letting them know he's the mastermind. At first Ken is awed and delighted: what kid hasn't dreamed of having a robot all their own? Someone who can be their friend, clean their room, walk the dog, answer homework questions...how amazing is that? But be careful what you wish for: Dan's robot, Greeeg, may look innocent, but his ravenous consumption of food—comestibles—turns him into a butt-blasting bot. And once the other robots 'come alive' it's up to the motley crew of EngiNerds to not only save the day, but save the planet!
