What is mathematics, and why is it such a mystery to so many people? Mathematics is the greatest creation of human intelligence. It affects us all. We depend on it in our daily lives, and yet many of the tools of mathematics, such as geometry, algebra and trigonometry, are descended from ancient or non-Western civilizations. *Introducing Mathematics* traces the story of mathematics from the ancient world to modern times, describing the great discoveries and providing an accessible introduction to such topics as number-systems, geometry and algebra, the calculus, the theory of the infinite, statistical reasoning and chaos theory. It shows how the history of mathematics has seen progress and paradox go hand in hand - and how this is still happening today.

—Library Journal You can see how cute these woolbuddies are. You're not going to believe how easy it is to make them! Now Huang teaches you how, using just some wool and a needle, you can make a wide-eyed owl, a toothy shark, a fuzzy sheep, a towering giraffe, and many more simple yet sensational projects. With step-by-step instructions and helpful how-to photographs, crafters can create clutchable keepsakes to be instantly enjoyed and forever cherished.

In all my life, I've only prayed three times. The first time, during Eid al Fitri. The second, during Eid al Adha. And the third, during my grandmother's janazah prayer a few months ago. Mom and dad didn't pray that I don't pray. My previous ustazs and ustazahs didn't too. Same as my brother and sister because they didn't perform prayer too. But, suddenly this ustaz Azhar cares. That's why I started this book of doodles. I need to learn how to perform a prayer and all the things about solat, I'm going to put it here. I have one week until the test. I HAVE to know how to perform a prayer before that time comes. I am going to do all it takes as long as I'm not placed in detention by Ustaz Azhar. Seriously!!!

Dasar pengajaran dan pembelajaran sains dan matematik dalam bahasa Inggeris (PPSMI) yang mula dilaksanakan pada tahun 2003, adalah suatu dasar yang dipersoalkan oleh para dan intelek Melayu dan kaum lain dengan serius. Ada empat isu besar yang sering dikemukakan. Pertama, keabsahan dasar ini ditentang. Dasar PPSMI ini melanggar Perkara 152 dalam Perlembagaan Persekutuan Malaysia. Di samping itu ia juga melanggar Perkara mengenai hak asasi rakyat, dan juga Akta Pendidikan. Kedua, tujuan memandakan rakyat melalui sebuah bahasa asing itu adalah bertentangan dengan teori pembelajaran. Kita belajar dengan berkesan melalui bahasa ibunda. Proses pembelajaran melalui bahasa ibunda sekarang sudah terbukti berjaya, dan dasar PPSMI ini memutar jarum jam ke belakang. Ketiga, ada banyak kesan negatif penggunaan bahasa Inggeris ini kepada hasrat negara bagi membina bangsa Malaysia. Hasrat ini dilihat sebagai terancam kuat. Seterusnya, keempat, tujuan meningkatkan penguasaan, bahasa Inggeris pelajar melalui pengajaran dan pembelajaran sains dan matematik itu juga adalah sesuatu yang tidak dapat diterima dari segi pembelajaran bahasa.
