This new edition includes two new chapters, Integrated Saponification and Drying Systems and Laundry Bars, and the others are completely revised and updated. Includes new chapters and figures, tables, and text updated from the first edition Serves as a technical reference book ideal for both experienced and beginning soap producers and suppliers Provides an overview of the AOCS methods used for the evaluation of soap and soap products Includes two new chapters on Integrated Saponification and Drying Systems and Laundry Bars

As he walked out of the cinema, Gavin knew that his life would change forever. It was the impact of a documentary that kicked him into action, whereby he decided to lower his family's impact on the planet, in the attempt to live a more sustainable lifestyle. This is the story of his first year of 'The Greening of Gavin'. Gavin's philosophy is a simple one and he describes it as this; "An Ordinary Australian Man Who Has A Green Epiphany Whilst Watching A Documentary, Gets a Hybrid Car, Plants A Large Organic Vegetable Garden, Goes Totally Solar, Lowers Consumption, Feeds Composts Bins and Worms, Harvests Rainwater, Raises Chickens, Makes Cheese and Soap, and Eats Locally. All In The Effort To Reduce Our Family's Carbon Footprint So We Can Start Making A Difference For Our Children & Future Generations To Come."

Includes list of members, 1882-1902, proceedings of the annual meetings and various supplements.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Also known as Au Bonheur des Dames; The Ladies' Delight or The Ladies' Paradise; is the eleventh novel in the Rougon-Macquart series by Émile Zola. The novel is set in the world of the department store, an innovative development in mid-nineteenth century retail sales. Zola models his store after Le Bon Marché, which consolidated under one roof many of the goods hitherto sold in separate shops. In Au Bonheur des Dames, the store is a symbol of capitalism, the modern city and the bourgeois family. It is emblematic of changes in consumer culture, sexual attitudes and class relations taking place at the end of the century. The novel tells the story of Denise Baudu, a 20-year-old woman from Valognes who comes to Paris with her brothers and begins working at the department store Au Bonheur des Dames as a saleswoman. Zola describes the inner workings of the store from the employees' perspective, including the 13-hour workdays, the substandard food and the bare lodgings (for the female staff). Many of the conflicts in the novel spring from the struggles for advancement and the malicious infighting and gossip among the staff. Au Bonheur des Dames is a sequel to "Pot-Bouille". Like its predecessor, Au Bonheur des Dames focuses on Octave Mouret (b. 1840), who at the end of the previous novel married Caroline Hédouin, the owner of a small silk shop. Now a widower, Octave has expanded the business into an international retail powerhouse occupying (at the beginning of the book) most of an entire city block. Au Bonheur des Dames has been made into a number of films, television series and plays. Émile Zola (1840 – 1902), French novelist, critic, and political activist who was the most prominent French novelist of the late 19th century. He was noted for his theories of naturalism, which underlie his monumental 20-novel series Les Rougon-Macquart, and for his intervention in the Dreyfus Affair through his famous open letter, "J'accuse."

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Ever think of making your own beauty products -- handmade, high performance, healthy alternatives to just about every chemical laden product you currently put on your face and body? It's easier than you think! In Make It Up author Marie Rayma shares the recipes she has developed through years of trial, error, and testing to come up with the very best. This is real makeup and skincare: bright lipsticks, quality mineral powders, long-wearing eyeliners, and masks and cleansers that yield results. Rayma walks you through natural ingredients available online or at health food stores. These awesome oils, butters, clays, and minerals will replace the petroleum products, artificial colors, and lab-created mystery fragrances that have untold effects on our bodies. Products can be tailored for individual needs -- from swapping out ingredients not suitable for sensitive skin to whipping up the perfect colors suited for any complexion. With easy-to-follow instruction, Make It Up provides more than 40 essential cosmetics and skin care projects so you can make just what you want, when you need it.

SPECIAL NOTE! -- ANNE WILL PERSONALLY ANSWER ANY QUESTION OF YOURS AFTER READING THIS BOOK. ASK ON HER WEB SITE, AND YOU'LL NORMALLY HEAR BACK WITHIN HOURS! Do you love the feel of milk soaps but shy away from the cost? Are you looking for a special kind of gift you can make yourself? Or do you already make soap and want to try something new? Anne L. Watson's "Smart Soapmaking" was the first book based on modern techniques that eliminate the drudgery and guesswork from home soapmaking. Now, by popular demand, she continues her soapmaking revolution with the first practical, comprehensive book on making milk soap from scratch. Experience the rich, soothing, luxurious feel of milk soap you've made yourself. Your skin will thank you for it.

////////// Anne L. Watson is the first author to have introduced modern techniques of home soapmaking and lotionmaking to book readers. She has made soap under the company name Soap Tree, and before her retirement from professional life, she was a historic preservation architecture consultant. Anne and her husband, Aaron Shepard, live in Friday Harbor, Washington. ////////// "Beautiful in its simplicity. . . . A definitive book for experienced as well as beginning milk soapmakers." -- Rebekah Bailey, The Original Soap Dish, South Whitley, Indiana "An easy to read and understand book that will take the mystery out of milk-based soapmaking and debunk some of the myths surrounding it. It contains some great basic formulas to get you started making milk soaps of any kind, and fuel to let your imagination run wild when you are ready to formulate your own creations. A good source of information for new soapmakers, and also suitable for more experienced soapmakers who want to start making milk soaps but thought it would be too difficult." -- Amanda Guilfoyle, Bodelicious Bath & Body Products, Ipswich, Queensland, Australia "As always, Anne is up to her usual excellence. This book demystifies milk soapmaking so everyone can have the luxury of a truly decadent bar of soap *easily*. LOVE this book!!!" -- Susan Kennedy, Oregon Trail Soaps, Rogue River, Oregon "If you have an interest in milk soaps, this is the book for you. . . . Debunks much of the popular wisdom that may have

mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region.

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

This is the first book published with recipes, methodology and tips on how to make Melt and Pour Soap from Scratch. It is written from the perspective of a Cosmetic Formulator on the production of the popular cosmetic base known as, Melt and Pour Soap. Whether you are a crafter, hobbyist or business owner this book has everything that you need. This book give you guidance on how, as a small home based business, you can follow the regulations, labeling laws and industry standards for selling soap and cosmetics. My entire journey into the cosmetic industry started with Melt and Pour Soap shortly after I discovered aromatherapy. The roots of our business, Essential Wholesale, all started in December of 1998. Over the years we moved from our home kitchenette to a 600 square foot space, to a 2500 square foot building, to a 10,000 square foot space in a bigger building, and from there we have expanded into 30,000 square feet of that same building. In 2011 our business will be moving to an even larger 58,000 square foot building. As our business expanded we began to focus on natural cosmetics and personal care products. However, I never lost my curiosity and fascination with Melt and Pour Soap. Our relationship with Melt and Pour Soap changed over the years. At first we sold retail customized Melt and Pour Soaps. We then bought and sold the company Critter Soaps. Later we sold thousands of pounds worth of wholesale Melt and Pour Soap base and eventually discontinued selling Melt and Pour Soap because the price kept rising. At the time Melt and Pour Soap was the only cosmetic base we sold that we didn't manufacture ourselves. It simply didn't make sense to wholesale someone else's base when our business model had changed to selling only the bases we manufactured ourselves. It was at this point in our business that I decided it was time to formulate our own Melt and Pour Soap ourselves. It didn't take long to have working formulas, but at that moment we were using up every inch of space in our 30,000 square foot building. We were bursting at the seams and couldn't accommodate the manufacturing and cooling of the Melt and Pour Soap Base in bulk. Our space was so tight we couldn't possibly cool an 8,000 lb batch of Melt and Pour Soap base into multiple 1 lb, 20 lb and 40 lb blocks to sell in bulk. But we got continued requests to manufacture and sell Melt and Pour Soap base. My solution is this book. I decided to share these basic recipes with you to give you the freedom to make your own Melt and Pour base in the quantities that work best for your business. These recipes will teach you the foundational information that you need and give you tips on how to customize your base.

Create Fabulous Modern Soaps The Truly Natural, Eco-Friendly Way With this new comprehensive guide, herbalist Jan Berry offers everything the modern-day enthusiast needs to make incredible botanical soaps. Beginners can join in the sudsy fun with detailed tutorials and step-by-step photographs for making traditional cold-process soap and the more modern hot-process method with a slow cooker. The surfactants are among the materials that have a significant importance in everyday life of human. The rapid growth in science and technology has opened new horizons in a very wide range, in which the surfactants play a major and vital role. Hence, the increasing number of applications as well as arising environmental issues has made this relatively old topic still a hot research theme. In the first section of this book, some of the applications of surfactants in various fields such as biology and petroleum industry, as well as their environmental effects, are described. In Section 2 some experimental techniques used for characterization of the surfactants have been discussed.
