Inequality endangers the fabric of our societies, distorts the functioning of democracy, and derails the globalization process. Yet, it has only recently been recognized as a problem worth examining. Why has this issue been neglected for so long? In *Inequality: A Short History*, Michele Alacevich and Anna Soci discuss the emergence of the inequality question in the twentieth century and explain how it is related to current issues such as globalization and the survival of democracy. The authors also discuss trends and the future of inequality. Inequality is a pressing issue that not only affects living standards, but is also inextricably linked to the way our democracies work.

Most na So?i sodi med najpomembnejša prazgodovinska najdiš?a Evrope. Znano je postalo zlasti po veliki nekropoli iz starejše železne dobe, ki so jo raziskovali ob koncu devetnajstega stoletja in na kateri so izkopali ?ez 6000 grobov. Hiter razvoj kraja je v sedemdesetih letih prejšnjega stoletja vzpodbudil ponovna arheološka izkopavanja. Trajala so enajst let, v tem ?asu pa je bilo na obmo?ju današnje vasi temeljito raziskano eno najpomembnejših železnodobnih naselij ne le pri nas temve? tudi na širšem jugovzhodnoalpskem prostoru. Na za?etku monografije je podan geografski oris kraja, temu pa sledi iz?rpna zgodovina raziskovanj, ki ji je dodan seznam dosedanjih objav. V osrednjem delu knjige so predstavljeni gradbeni izvidi šestintridesetih hiš, ki so bile odkrite v vzhodnem predelu današnjega Mosta na So?i. Besedilo spremlja 229 na?rtov in fotografij, ki odli?no dopolnjujejo detajlne opise objektov. V zadnjem delu monografije je na sto tablah predstavljeno drobno gradivo, ki je bilo najdeno v stavbah. To je doslej najobsežnejša objava kakega železnodobnega naselja, ki daje povsem nova spoznanja o bivalni kulturni železnodobnega ?loveka na obmo?ju Caput Adriae oziroma jugovzhodnih Alp. Iz številnih podatkov, dobljenih z izkopavanji, je bilo mo? rekonstruirati tlorisno zasnovo naselja, na?in gradnje hiš in številne tehni?ne detajle. Ugotovljeno je bilo, kako so bili zgrajeni drenažni zidovi, škarpe in temelji, pa tudi kakšni so bili podi, lesene konstrukcije sten, odto?ni jarki in jame, v katerih so se odvijali razli?ni proizvodni procesi (npr. metalurgija, lon?arstvo). Med drobnim gradivom prevladuje seveda lon?enina, vendar pa so bili odkriti tudi številni kamniti, koš?eni in kovinski predmeti. Slednji so še posebej pomembni, saj je mo? z njimi natan?no datirati objekte, hkrati pa kažejo na visoko tehnološko znanje takratnih obrtnikov. _____ Most na So?i ranks among the most prominent prehistoric sites in Europe. It is mainly known for the extensive cemetery from the Early Iron Age, which was first investigated in the late 19th century and revealed over 6000 burials. The rapid growth of the modern village of Most na So?i again led to large-scale archaeological excavations in the 1970s. These were conducted in the span of eleven years and unearthed one of the most significant Iron Age settlements in Slovenia and the wider south-eastern Alpine region. The monographic publication on this settlement begins with a geographic outline of the site and its surroundings, which is followed by a detailed history of research complete with a list of contributions and reports on the subject published thus far. The main part of the book is dedicated to presenting the settlement structures that include thirty-six houses excavated in the eastern part of the modern village. It is the most comprehensive publication of an Iron Age settlement to date in Slovenia, which offers new insights into the

living conditions of the Iron Age population inhabiting the area of Caput Adriae or the south-eastern Alps. The multitude of data gained from the excavations enabled a reconstruction of the settlement's plan and provided an understanding of the construction methods and numerous technical details, revealing how drainage walls, dividing walls and foundations were built, and also revealing the appearance of the floors, wooden wall constructions, drainage ditches and pits used in different production processes (for instance metallurgy, pottery). The text is illustrated with 229 plans and photos that complement the detailed descriptions of the structures. The book concludes with the illustrations of small finds recovered in the houses, presented on a hundred plates. These predominantly consist of pottery sherds, but also include numerous stone, bone and metal items. Those of metal are particularly important because they are chronologically diagnostic and allow the archaeologists to precisely date individual houses and their phases, but also reveal the remarkable technical skills that the craftsmen of the day possessed. This 12 country comparative volume examines the impact of economic structural adjustment programs upon grassroots civil associations and the implications for political liberalization and democratization in the developing countries of Latin America, Africa, Asia, and the Middle East. The authors take an in-depth look at the impact of economic reform upon women's groups, human rights organizations, social-welfare non-governmental organizations, unions, and business associations. They challenge the prevailing assumption that economic reform will automatically lead to greater democratization.

In conducting his research into the mysteries of antiquity, Frank Teichmann made a series of discoveries that connect directly to contemporary events and the tasks of the present-day. Whilst scholarly in nature and based on extensive documentation of historical sites, Teichmann's work is no dry academic study. In *The Origins of the Anthroposophical Society*, he offers incisive new insights into Rudolf Steiner's seminal esoteric deed – the refounding of the Anthroposophical Society at the Christmas Conference of 1923-24 – and considers how it impacts us today. The Conference itself, says Teichmann, '...did not just appear out of nowhere, nor did it happen merely as the result of a decision on Rudolf Steiner's part. It was prepared for long beforehand.' In the emergence of the anthroposophical movement, Teichmann reveals a conscious recapitulation and renewal by Rudolf Steiner of three types of primordial mystery. He states: '... the whole anthroposophical movement together with the Anthroposophical Society as it was re-founded at the Christmas Conference of 1923, was planned and prepared for in primordial times... All [Steiner's] deeds, no matter how original they may appear in the foreground, have a deep esoteric background that contains the entire spiritual history of humanity.' This renewal had been systematically prepared by Rudolf Steiner in three phases: through the evolution and intensification of thinking via the 'mysteries of light' in Greece; experiencing the spiritual through art via the 'mysteries of space' in Egypt; and, involving the 'tasks of civilization', the 'northern' or 'earth mysteries'. Teichmann's groundbreaking book – featuring dozens of images including his own original photos of British mystery landmarks – is published here for the first time in English translation.

Il volume si propone di ricostruire la disciplina dei finanziamenti soci e infragruppo alla società in situazione di crisi. Più specificamente, si procede ad approfondire la disciplina degli artt. 182 quater, 3 co., e 182 quinquies, l.fall., soffermandosi sull'inquadramento sistematico di

entrambe le disposizioni, sugli aspetti problematici emergenti dalle stesse e sul diritto di voto dei crediti derivanti dai finanziamenti in esse regolati. Si studia, inoltre, il trattamento economico di tali pretese nel concordato preventivo e negli accordi di ristrutturazione dei debiti. This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

Entrar en contacto con los escritos y con los numerosos testimonios de Madeleine Delbr el renueva y profundiza el conocimiento que se ten a de ella. Su itinerario, del ate ismo al deslumbramiento de la fe y el compromiso, se perfila con nitidez al hilo de un relato que recorre sus sesenta a os de vida, de los cuales m as de la mitad suceden en Ivry-sur-Seine, cerca de Par s, donde, tal y como ella indica, se encontraba una poblaci n "increyente y pobre". Poeta, asistente social y m stica a partes iguales y complementarias, mujer de acci n y de oraci n, Madeleine Delbr el (1904-1960) ofrece a nuestra sociedad secularizada y a la misma Iglesia un hermoso rostro, rico en inspiraci n para una vida cristiana en di logo con el ate ismo y con la miseria en todas sus formas. Su proceso de beatificaci n est  iniciado y su fama de santidad no deja de crecer. Treinta a os despu s de la excelente biograf a que sobre ella escribi  Christine de Boismarmin, una de las compa eras m s cercanas, este libro es fruto de la obstinada investigaci n de dos hombres apasionados con la figura de la m stica francesa, los sacerdotes Bernard Pitaud y Gilles Fran ois, este  ltimo postulador de la causa de beatificaci n de Delbr el.

La diffusione della formula societaria pone all'attenzione degli operatori una mole impressionante di problematiche di carattere lavoristico, previdenziale e fiscale spesso di non agevole soluzione. Si pensi, per esempio, alle posizioni giurisprudenziali diametralmente opposte in merito alla qualificazione del rapporto tra amministratore e societ  e ai problemi conseguenti in termini di iscrizione o meno dello stesso amministratore alla gestione previdenziale separata o alla gestione speciale e alla recente circolare Inps 29/2021, che ha mutato decisamente indirizzo rispetto ad un pluriennale atteggiamento circa la collocazione previdenziale del socio di cooperativa artigiana. Facendo chiarezza in un ginepraio di norme, cui si aggiungono giurisprudenza e prassi non sempre univoche, la Guida del Sole 24 Ore offre le certezze operative e immediatamente fruibili dei propri autorevoli Esperti.

La guida fa il punto della situazione sui concreti risvolti applicativi della nuova procedura di invio telematico alle Entrate della comunicazione recante i dati e gli elementi concernenti i beni concessi in godimento ai soci, la cui scadenza   stata posticipata al 15 ottobre 2012 dal provvedimento del direttore dell'Agenzia delle Entrate n. 37049 del 13 marzo 2012. La collocazione di tale scadenza dopo il termine per la presentazione della dichiarazione, in particolare, non pu  che essere salutata con favore, poich  pone tale adempimento, nella delicata fase della metabolizzazione del nuovo istituto, al di

fuori del periodo più intenso per gli operatori del settore, qual è quello che va dalla fase della presentazione del bilancio a quella più propriamente dichiarativa, con nel mezzo il non trascurabile fardello del versamento delle imposte connesse al Mod. Unico 2012. STRUTTURA Capito I: I soggetti interessati Capito II: La comunicazione Capitolo III: Contenuto della comunicazione Capitolo IV: Effetti sostanziali Allegati

Being Faithful in Diversity considers the facts and natures of religious diversity and examines responses to them. It then explores the more difficult issue about how it is we are to be true to our religious positions and live within the context of religious diversity. The challenges we face include the fact of religious diversity in itself, the decline of old supports for faith, the disappearance of former taken for granted starting places, such as the monarchy, the British empire and Christendom; and finally the rise of and presence of newer forms of inter-religious competition and conflict. Newspapers are full of images of religious conflict overseas and reports of religious competition and conflict at home. Is it possible to negotiate the competing demands and claims between religious groups and the competition and conflict between them and secularist groups?
