

Social Work Case Scenarios And Answers

The book addresses the issue of interdisciplinary understanding of collaboration on the topic of social network studies. Researchers and practitioners from various disciplines including sociology, computer science, socio-psychology, public health, complex systems, and management science have worked largely independently, each with quite different principles, terminologies, theories, and methodologies. The book aims to fill the gap among these disciplines with a number of the latest interdisciplinary collaboration studies. Collaborating with community members adds a critical dimension to social work research, providing practitioners with intimate knowledge of a community's goals and needs while equipping community advocates with vital skills for social change. Sharing the inspiring story of one such partnership, Corey Shdaimah, Roland Stahl, and Sanford F. Schram recount their efforts working with an affordable housing coalition in Philadelphia, helping activists research low-income home ownership and repair. Their collaboration helped create the Philadelphia Housing Trust Fund, which funnels millions of dollars to people in need. This volume describes the origins of their partnership and its growth, including developing tensions and their diffusion in ways that contributed to the research. The authors personalize methods of research and the possibilities for advocacy, ultimately connecting their encounters to more general, critical themes. Building on the field's commitment to social justice, they effectively demonstrate the potential of change research to facilitate widespread, long-term difference and improve community outcomes.

The use of case studies to build and test theories in political science and the other social sciences has increased in recent years. Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies. This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology. It argues that case studies, statistical methods, and formal models are complementary rather than competitive. The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy-relevant theories. It offers three major contributions to case study methodology: an emphasis on the importance of within-case analysis, a detailed discussion of process tracing, and development of the concept of typological theories. *Case Studies and Theory Development in the Social Sciences* will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science, as well as to those designing new research projects, and will contribute greatly to the broader debate about scientific methods.

Case Studies in Social Work Practice John Wiley & Sons

The social worker's guide to integrating theory and practice *Applying Theory to Generalist Social Work Practice* teaches aspiring social workers how to apply theory in real world practice. Fully aligned with the Council on Social Work Education's 2015 Educational Policy and Accreditation Standards, the book links theory to practice with clear, concise instruction including a discussion of evidence-based practice. Twelve commonly-used theories are thoroughly explained, with discussion of the strengths and limitations of each, and applied to real work with individuals, groups, families, communities, and organizations. The book includes case studies and first-person contributions from practicing social workers to illustrate the real-world scenarios in which different concepts apply. Critical thinking questions help students strengthen their understanding of the ideas presented. Tools including a test bank, PowerPoint slides, and an instructor's manual are available to facilitate classroom use, providing a single-volume guide to the entire helping process, from engagement to termination. Practice is a core foundational course for future social workers, but many practice texts focus on skills while neglecting the theoretical basis for social work. *Applying Theory to Generalist Social Work Practice* fills that gap by covering both skills and theory in a single text. Examines the applications of prevailing social theories Covers the most common theories used in micro, mezzo, and macro practice Helps readers understand well-established approaches like strengths perspective, humanistic and client-centered, task-centered, and solution-focused brief therapy Shows how to apply major theories including ecological/system, cognitive/behavioral, conflict, empowerment, narrative, crisis, critical, and feminist An effective social worker recognizes the link between theory and practice, and how the two inform each other to culminate in the most effective intervention and most positive outcome for the client. *Applying Theory to Generalist Social Work Practice* provides students with a roadmap to the full integration of philosophy and application in social work.

Research is as critical to social work practice as individual and group counseling skills, policy analysis, or community development. Using an approach similar to those adopted in direct practice courses, this book integrates research with social work practice and in so doing, promotes an understanding and appreciation of the research process to social work students. Sixteen case studies adapted from actual events and case files illustrate different research approaches, including quantitative, qualitative, single subject, and mixed methods. Through these real-life examples, the authors demonstrate the processes of conceptualization, operationalization, sampling, data collection and processing, and implementation. Designed to help the student and practitioner become more comfortable with the research process, *Practising Social Work Research* uses a student-centered approach that capitalizes on the strengths that social work students bring to assessment and problem solving.

This unique core text helps BSW and MSW students structure their field placement learning around the nine CSWE professional social work competencies. Empowering students to go beyond merely completing tasks, the book facilitates mastery and integration of these competencies by elucidating key concepts and applying them to realistic competency-based case scenarios. Each user-friendly chapter—directly linked to a particular competency—promotes thought-provoking reflection about field work with critical thinking

questions, a detailed case example, and an online competency reflection log template. These tools reinforce learning by connecting competencies directly to students' internship experiences. Cases are structured to serve as models when students prepare their own cases and include a review of the competency; detailed practice settings; socioeconomic and context factors at micro, macro, and mezzo levels; a problem overview; an assessment of client strengths and weaknesses; and a closing summary. Additional learning aids include chapter opening vignettes and objectives, plus chapter summaries. Web and video links offer students a wealth of supplemental resources, and a robust instructors package provides teachers with PowerPoints, written competency assignments with grading rubrics, and discussion exercises. The print version includes free, searchable, digital access to entire contents of the book. Key Features: Integrates field placement experiences with the nine CSWE 2015 competencies Promotes thought-provoking reflection about fieldwork with detailed case studies and challenging learning tools Includes discussions of ethical dilemmas, technology, and social media to reflect growing use and the challenges associated Includes online instructors' resources including, PowerPoints, written competency assignments with grading rubrics, and class discussion field reflection activities Print version includes free, searchable, digital access to entire contents of the book

This volume offers a collection of nine case studies from clinical social workers in K-12 schools, each from a phenomenological perspective, with the objective of educating Master of Social Work students and early career social work clinicians. Each chapter is framed with pre-reading prompts, reading comprehension questions, and writing assignments. This casebook provides a resource for understanding the range of practice in school social work as well as some of the challenges that school social workers face in today's complex world. Using a phenomenological perspective the contributors stay close to the lived experience of students, teachers, parents, and social workers, revealing a deeper and more nuanced understanding of the genesis and treatment of students' problems in school.

Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. *Violence in Families* takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. *Violence in Families* provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. *Violence in Families* discusses issues that underlie all types of family violence, such as the tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, *Violence in Families* synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

This book is an essential resource for the increasing number of facilitators who wish to help students learn about the promise and pitfalls of social enterprise. The oikos-Ashoka case competition for social entrepreneurship was conceived in 2007 as a way to help find great material and case studies in this emerging field. This fourth collection of oikos case studies is based on the winning cases from the 2010 to 2014 annual case competitions. These cases have been highly praised because they provide excellent learning opportunities, tell engaging stories, deal with recent situations, include quotations from key actors, are thought-provoking and controversial, require decision-making and provide clear take-aways. This new volume of social entrepreneurship case studies highlights cases from around the globe authored by teachers from around the globe. The selected cases span many industries and geographic contexts; nevertheless, they are connected by a shared ambition: to highlight the power of entrepreneurship to solve social problems. The cases are clustered in three different sections: Socially oriented Enterprise Cases – Health and Fair trade, Ecologically oriented social enterprises, and Corporate Social Entrepreneurship. *Case Studies in Social Entrepreneurship* will be an essential purchase for educators and is likely to be a widely used as a course textbook at all levels of management education. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book.

A practical approach to understanding social work concepts in action that integrates theory and practice In this updated edition of the classic social work text, students and instructors have access to real-world demonstrations of how social work theories and concepts can be applied in practice. The case studies in this book bridge the gap between the classroom and the field by allowing students to discover the when, why, and how of social work principles. Brief but comprehensive topic overviews are brought to life by case studies that apply general theories to the work of social work. Each of the book's nine sections cover an essential area of social work, encompassing the micro, mezzo, and macro levels Highly readable explanations are followed by 3-5 case studies relating theory to the living practice of real social workers Topics include Generalist Practice; Family Therapy, Treatment of Adults; and Diversity Approaching each topic from a variety of different theoretical bases, this essential text allow students to learn by concrete example, experiencing social work concepts as they are applied in the profession today.

These fifteen cases take place in child welfare, mental health, hospital, hospice, domestic violence, refugee resettlement, veterans' administration, and school settings and reflect individual, family, group, and supervised social work practice. They confront common ethical and treatment issues and raise issues regarding practice interventions, programs, policies, and laws. Cases represent open-ended situations, encouraging students to apply knowledge from across the social work curriculum to develop problem-solving and critical-thinking skills. An instructor's

manual is available on the press's website.

This casebook focuses on sexual orientation and gender expression in relation to social work practice. An excellent resource, it offers 29 cases illustrating the variety of issues facing gay, lesbian, bisexual, and transgender (GLBT) people and communities in five practice settings—individuals, couples and families, communities and organizations, groups, and policy and research. The book also contains discussion questions, classroom exercises, and suggested readings for each case, so educators can easily integrate GLBT content into the classroom. *Case Studies on Sexual Orientation and Gender Expression in Social Work Practice* may be used on its own, in conjunction with another textbook, or as a complement to Deana F. Morrow and Lori Messinger's *Sexual Orientation and Gender Expression in Social Work Practice: Working with Gay, Lesbian, Bisexual, and Transgender People* (Columbia, 2006). Messinger and Morrow are award-winning teachers and their groundbreaking book is key for culturally competent undergraduate or graduate courses in practice, policy, human behavior and the social environment, research, and field education.

Leading experts from North America, Japan, Britain and Australia illustrate both practice and theory issues, making this a valuable resource for all those concerned with continuing professional development.

This book consists of actual cases from the author's experience as a child welfare specialist. The cases were selected to introduce the variety of social problems facing families within the child welfare system. Each case is diverse and consists of multiple problems to ensure that readers are challenged to think critically through the problem-solving process. Readers will learn how to apply social work knowledge and skills, how to apply the generalist perspective and how to analyze a case from engagement to termination. *Child Welfare Case Studies* offers practicing professionals a valuable resource in teaching helping skills as well as the general problem-solving process. For social workers, or other interested in child welfare.

This edited book, *Global Social Work - Cutting Edge Issues and Critical Reflections*, presents global social work expertise, practical tools, and an iterative and reflective process for developing a global social work pedagogy that advances deep disciplinary learning. The authors offer the specifics of a justice based, decolonizing global social work education and practice. This book will be an asset to faculty communities interested in specializing in global social work. The book offers hope that the faculty, students, and practitioners of social work develop an intercultural, international, cross-border critical approach that further prepares them to meet the global standards of social work education and research and at the same time skillfully act, advocate, and transform global communities and their role in a globalized world.

"Examines how to apply clinical theories to social work practice. Contains a wide range of cases described in rich detail by practitioners, scholars, and researchers. Chapters represent contexts and approaches across the social work spectrum, so students will get to glimpse into the clinical experience of a full range of professionals. Covers the most important areas in social work practice, including: child welfare and adoption, individual and group treatment, school and community settings, family treatment and parent training"--

cs.hlth.cmmhlth

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases. *Child Protection in the Church* investigates whether, amidst publicised promises of change from church institutions and the introduction of "safe church" policies and procedures, reform is actually occurring within Christian churches towards safeguarding, using a case study of the Anglican Diocese of Tasmania, Australia. Through the use of interviews and document analysis, the book provides an insight into the attitudes and practices of "ordinary clergypersons" towards child sexual abuse and safeguarding to understand how safe ministry is understood and executed in everyday life in the Church, and to what extent it aligns with policy requirements and criminological best practice. It adopts organisational culture theory, the perspective used to explain how clerical culture enabled and concealed child sexual abuse in the Church to the present, in order to understand how clerical attitudes (cognition) and practice (conduct) today is being shaped by some of the same negative cultures. Underlying these cultures is misunderstandings of abuse causation, which are shown here to negatively shape clerical practice and, at times, compromise policy and procedural requirements. Providing an insight into the lived reality of safeguarding within churches, and highlighting the ongoing complexities of safe ministry, the book is a useful companion to students, academics, and practitioners of child protection and organisational studies, alongside clergy, church leaders, and those training for the ministry.

Case Study Research in Practice explores the theory and practice of case study research. Helen Simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design, conduct and communicate case study research. It addresses questions often raised by students and common misconceptions about case research. In four sections the book covers - Rationale, concept and design of case study research - Methods, ethics and reflexivity in case study - Interpreting, analyzing and reporting the case - Generalizing and theorizing in case study research Rich with 'tales from the field' and summary memos as an aide-memoire to future action, the book provides fresh insights and challenges for researchers to guide their practice of case study research. This is an ideal text for those studying and conducting case study research in education, health and social care, and related social science disciplines. Helen Simons is Professor Emeritus of Education University of Southampton

This book is a compilation of real cases submitted by social workers and faculty teaching social work courses. The cases help students understand how clients, issues, and agencies interact, as well as see how that understanding connects with the actual "doing" of generalist social work practice. The cases reflect a broad range of courses in the social work curriculum and the most current CSWE standards.

A fundamental handbook to the family health model! Family Health Social Work Practice: A Knowledge and Skills Casebook is a comprehensive guide to an emerging practice paradigm in the social work field. Edited by pioneers of the family health approach (who also contribute several chapters each), this book introduces the theoretical model and skills of the practice, including a framework for developing a family health intervention plan, illustrated by case scenarios. Issues vital to any family health intervention are addressed in 10 case studies that further explain the application of the practice model. Family Health Social Work Practice stresses a holistic orientation to assessment and intervention from a health perspective that includes the physical, mental, emotional, social, economic, cultural, and spiritual dimensions of family life. With its focus on practice theories, practical information, and evaluation strategies, the book provides a strong foundation for skills development in the family health model. A collection of articles from the leading practitioners and academics in the field gives a thorough and thoughtful examination to issues ranging from domestic violence to substance abuse to the Americans with Disabilities Act. Family Health Social Work Practice also reviews the philosophy behind the family health approach, summarizes its effectiveness, and examines other critical concerns, such as: child maltreatment mental health spiritual diversity aging agency management One of the few casebooks to present practical intervention plans with accompanying case scenarios, Family Health Social Work Practice is an essential resource for students and professionals in the social work and human services disciplines, and an unrivaled reference for libraries. Helpful tables and figures make the information easy to access and understand.

Social Work Case Management: Case Studies From the Frontlines by Michael J. Holosko is an innovative book that equips readers with the knowledge and skills they need to be effective case management practitioners in a variety of health and human service organizations. A must-read for students and professionals in social work, this important work introduces a unique Task-Centered Case Management Model built around the unifying principles of the profession—person-in-environment, strengths-based work, and ecological perspective. Over twenty case studies by case managers and professionals offer innovative practice insights, illustrating the practice roles and responsibilities of today's case managers and the realities of conducting case management in today's growing, exciting, and challenging field. Suitable for practice courses at the BSW or MSW levels, the 40 carefully crafted vignettes in this collection are drawn from actual cases and combine practitioner expertise, rigorous scholarship, and current social work knowledge. A wide range of settings, client systems, and problems are presented, as are suggestions for assessing the information provided and formulating an intervention plan. The first three units are organized chronologically, proceeding from beginning to middle and ending phases of practice with clients. Unit four includes cases focusing on special issues—exceptions to the rule in social work practice, such as conflicting values and ethics, working with diverse populations, and working with involuntary clients. Readers interested in focusing on particular groups and kinds of issues will also find a helpful index of cases organized by issue and client population.

The Third Edition of Cases in Macro Social Work Practice provides relevant, contemporary, macro practice case scenarios that reflect practice dilemmas and challenges typically experienced by social workers in organizational, community, and policy practice areas. It emphasizes the change process in both domestic and international settings by using a theoretical and practice perspective, and follows the outline of the Fourth Edition of Social Work Macro Practice—written by F. Ellen Netting, Peter Kettner, and Steven McMurtry. Please Note: Cases in Macro Social Work Practice may be value-packaged with Social Work Macro Practice at a special discount. Contact your local representative for details: www.ablongman.com/relocator

This book compares and contrasts divergent social work approaches in countries around the world, providing students with a unique perspective on social work as it is actually practised. Using case studies from frontline practitioners from across the globe, this innovative new textbook stimulates critical thinking about international social work practice issues. Providing a review of both country-specific social work practices and universal social work issues, the text looks at a variety of core social work topics, framed here in terms of CSWE competencies. Set within a theoretical framework presented in the introductory chapter, the subjects covered include: child welfare intimate partner violence family conflict and communication elder care substance abuse trauma. Each chapter presents several case studies exploring range of issues within the broader topic and each case study is commented on by two narratives from social work academics and practitioners from different countries, providing different cultural perspectives. Taking a practical hands-on approach, this text includes a dedicated section for classroom use, with discussion questions, classroom exercises and additional cases for your own analysis. It will be particularly useful to BSW and MSW students taking courses in international social work, practice, social welfare and human behaviour.

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable insight for understanding the complexities of each case.

In the world of creating new ventures with the single goal of achieving financial profitability, it is well known that nine of ten startups are likely to fail. For new social ventures that have the twin goals of financial profitability and social inclusiveness, the chances of failures are even higher. This book provides insight into the common struggles of social activists and the strategic responses necessary to not only overcome their organizational issues but also address the world's pressing social challenges. The book not only traces the journey of the social activists in growing their social ventures to flesh out real-life issues but also introduces the latest management thinking on social innovation in daily business decision. This book makes a useful contribution in furthering the concepts of social innovation and entrepreneurship and inspiring more change agents to create and implement effective, scalable and sustainable solutions to

address social issues and meet the needs of the disadvantaged groups in the society.

As a human service professional, what would you do if you had a child on your caseload who was recently reunified with his/her mother, but ended up more physically abused than the first time you were involved in the case? How would you intervene in a case involving children who had chronic school absences, had been reportedly begging for food from their neighbor, and who had been left home alone for lengthy periods of time? How would you handle a case involving a father who has a history of felonious assault, but who wants a chance to prove that he can care for his children? These and several other scenarios listed in this book are similar to ones the author faced over the course of her years in child welfare. The fictionalized accounts contained in the pages of this book will help you engage in critical-thinking exercises concerning many of the dynamics associated with children and families.

Rev. ed. of: Social work skills demonstrated: beginning direct practice: text-workbook, CD-ROM, and website. 2nd ed. 2006.

The Project on Asia in the Core Curriculum began in 1984 to support the introduction of material on Asia into the core curricula of undergraduate institutions throughout the US. The present "Guide for Teaching," one of three (the others devoted to history and literature) comprises 50 essays identified in three tables of contents that provide access by discipline, subdiscipline, or country. The countries are China, India, Indonesia, Korea, Taiwan, Pakistan, the Philippines, and Thailand. The disciplines are anthropology, economics, political science, and sociology.

Paper edition (unseen), \$22.50. Annotation copyright by Book News, Inc., Portland, OR

Drawing on their experience as teachers and social workers, the authors introduce students to the complex skills necessary for effective management in human service administration. In this textbook, they present actual problems through concise case studies with study-guide questions for discussion. The illustrative case studies cover a broad range of situations and dilemmas that a human services student can expect to encounter as an administrator ñ from sexual harassment to ethical concerns. By focusing on human service agencies, the authors fill a gap in social work literature for administration, planning, and management students.

This volume offers a collection of ten case studies from clinical social workers who work in the field of sexual trauma, with the objective of challenging and informing social work practice with survivors and perpetrators of sexual trauma. These steps are meant to help the process of treatment by breaking down the experience of trauma to a set of steps and interventions aimed at resolving traumatic symptoms within a given time frame. Our text seeks to challenge the tendency towards reductionism inherent in the dominant social paradigm by encouraging the development of a phenomenological and interdisciplinary approach to understanding sexual trauma. In doing so, the examples of interventions presented in each case study reflect practice methods that honor the complexity of the human experience of sexual trauma, suffering, and recovery.

In England in 2007 Peter Connelly, a 17 month old little boy - known initially in the media reporting as 'Baby P' - died following terrible neglect and abuse. Fifteen months later, his mother, her boyfriend and the boyfriend's brother were sent to prison. But media attention turned on those who worked to protect children, especially the social workers and their managers, who became the focus of the reporting and of the blame. This book tells what happened to 'Baby P', how the story was told and became focused on the social workers, its threatening consequences for those who work to protect children, and its considerable impact on the child protection system in England. This is the first book to draw together all evidence available on this high profile case and will make a unique and crucial contribution to the topic. It will make essential reading for everyone who is concerned about child protection and the care of children and about the media's impact. This revised edition contains a new Afterword bringing the story up to date.

This much-needed case study book provides higher education and student affairs graduate students, practitioners, and faculty with the tools to enhance their learning of student development theory and to apply this learning to practice. Each chapter offers a summary of theory – covering traditional and newer student development models – in addition to multiple case studies that help readers focus on practice that fosters social justice and inclusion. The case studies for each chapter represent a range of institutional types and diverse student populations, offering an opportunity to explore the intersections of various developmental processes and to foster social justice and inclusion in higher education contexts. Guiding questions at the end of each case study offer opportunities for further discussion and critical reflection. An essential text for every student development course, Case Studies for Student Development Theory enhances student learning and development in higher education while also addressing how students' social identities intersect with college campus environments.

The eighth edition of this classic textbook confronts students with the two central issues of the social work profession: How can social workers help people deal with personal misfortune? and What can social workers do to help bring about a just society? Answers to these questions come from the book's four main sections. Part One offers perspectives about social work and the kinds of things social workers do. Part Two describes the major policies and programmes social workers use to help people. Part Four discusses helping methods -- the ways clients are connected to social resources -- employed by social workers. Part Five provides case studies that show these helping processes in action. The Field of Social Work s an excellent text for an introductory course in social work. It provides the student with a general introduction to the principles of social work, and proceeds to applications of specific social work methods, providing case studies that illustrate the applications of these methods. Changes that have been made in the Eighth Edition include } new chapters dealing with case management and social work with families } contemporary case studies such as an example of social work in an industrial setting } current methods of social work practice and the latest techniques for applying these methods } innovative ways of working with minorities } new material reflecting the growing interest in working with self-help groups

Research Methods for Social Work: A Problem-Based Approach is a comprehensive introduction to methods instruction that engages students innovatively and interactively. Using a problem-based learning (PBL) approach, authors Antoinette Y. Farmer and G. Lawrence Farmer utilize case examples to achieve a level of application which builds readers' confidence in methodology and reinforces their understanding of research across all levels of social work practice. These case examples, along with critical thinking questions, research tips, and step-by-step problem-solving methods, will improve student mastery and help them see why research is relevant. With the guidance of this new and noteworthy textbook, readers will transform into both knowledgeable consumers of research and skilled practitioners who can effectively address the needs of their clients through research. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.
