A study of the migration patterns that characterized the colony and (later) state of Virginia over the three century history following its European founding. Dividing the topic into three patterns--migration to, within, and from Virginia--Fischer (history, Brandeis U) and Kelly (Virginia Historical Society) study the reasons behind the migrations of various populations, paying special attention to African Americans, and explore the cultural legacy of the migrations. The chapters in this volume illustrate how teachers are bringing creativity, higher-order thinking, and meaningful learning activities into particular school settings despite pressures of standards and testing. We chose the word wise for the title of this book, and we use it frequently to describe the pedagogical practices we have identified. The words powerful and ambitious are used as well. The larger point, as Keith C. Barton makes in his chapter, is that there is no necessary connection between content standards and high-stakes tests on the one hand, and lowlevel, rote instruction on the other. He reminds us, as Thornton (1991) and Wiggins (1987) previously have argued, that "teachers play a crucial role in mediating educational policy, and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests." Barton also asserts that "this makes it all the more crucial to identify the wisdom of practice that enables teachers . . . to engage students in powerful educational experiences."

This book investigates the preparation of secondary history and social studies (SS) teachers to teach English language learners (ELLs) in twenty-first century classrooms. This edited collection focuses on the ways in which pre-service and in-service teachers have developed – or may develop – instructional effectiveness for working with ELLs in the secondary history and social studies classroom. The authors address a variety of standards and content examples, including the National Council for Social Studies C3 Framework and Curriculum Standards, the Common Core State Standards for English Language Arts, and content from history, geography, and civics. This volume is part of a set of four edited books focused on teaching the key content areas to English language learners.

A NEW YORK TIMES EDITORS' CHOICE • LONGLISTED FOR THE BAILLIE GIFFORD PRIZE • "A beautiful and deeply moving book."—Sally Rooney, author of Normal People An engrossing group portrait of five women writers, including Virginia Woolf, who moved to London's Mecklenburgh Square in search of new freedom in their lives and work. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY POPMATTERS "I like this London life . . . the street-sauntering and square-haunting."—Virginia Woolf, diary, 1925 In the early twentieth century, Mecklenburgh Square—a hidden architectural gem in the heart of London—was a radical address. On the outskirts of Bloomsbury known for the eponymous group who "lived in squares, painted in circles, and loved in triangles," the square was home to students, struggling artists, and revolutionaries. In the pivotal era between the two world wars, the lives of five remarkable women intertwined at this one address: modernist poet H. D., detective novelist Dorothy L. Sayers, classicist Jane Harrison, economic historian Eileen Power, and author and publisher Virginia Woolf. In an era when women's freedoms were fast expanding, they each sought a space where they could live, love, and—above all—work independently. With sparkling insight and a novelistic style, Francesca Wade sheds new light on a group of artists and thinkers whose pioneering work would enrich the possibilities of women's lives for generations to come. Praise for Square Haunting "A fascinating voyage through the lives of five remarkable women . . . moving and immersive."—Edmund Gordon, author of The Invention of Angela Carter: A Biography "Elegant, erudite, and absorbing, Square Haunting is a startlingly original debut, and Francesca Wade is an author to watch."—Frances Wilson, author of Guilty Thing: A Life of Thomas De Quincey "Outstanding . . . I'll be recommending this all year."—Sarah Bakewell, author of At the Existentialist Café "I much enjoyed Francesca Wade's book. It almost made me wish I belonged to the pioneering generation of women spoiling eggs on the gas ring and breaking taboos."—Sue Prideaux, author of I Am Dynamite! A Life of Friedrich Nietzsche

When the Civil War threatened to destroy the United States, three brothers from rural Miami County Indiana, Joseph, Abner and Charles Wait, volunteered to fight for their country and help put down the Southern rebellion. This is their story spanning four years of war and the death of the youngest brother, 19-year-old Charles, at a hellish POW camp in Salisbury, North Carolina. The diaries of Joseph Wait, the oldest brother, and Benjamin Booth, a Salisbury survivor, vividly depict the sacrifices made by the Wait brothers--and thousands like them--that saved the Union and gave America a new birth of freedom.

2012 National Indie Excellence Award - African American Non-Fiction Finalist In 1895, members of the Caroline County Sunday School Union implemented a plan to build and operate a secondary school for Negro children in Caroline County, Virginia. The school, originally named Bowling Green Industrial Academy, then Caroline County Training School and finally Union High School, served as the only secondary school for Negro children in the county from 1903 to 1969. Union

High alumni speak fondly of their school. With church and home, it was an important institution in their community. The administration and faculty nurtured, supported, and encouraged the students. They held them to high standards and expected them to excel. Parents and members of the community strove to support the school in every way possible. And the school served all members of the community, not just students. For many, Union High was an oasis that sheltered them from the hardships of growing up in a segregated society and provided them a solid foundation to become productive members of society. The last group of students graduated from Union High School on June 5, 1969. At the start of the 1969-1970 school year, both Black and White students attended the school, renamed Bowling Green Senior High School, when the Caroline County School system became integrated. Memories of Union High contains historical information, memories from alumni, faculty, family and friends, excerpts from school newspapers and yearbooks, over 100 photographs and other memorabilia. It is a fitting tribute to the people associated with Union High and a good history lesson for those who are not familiar with the school.

**NEW YORK TIMES BESTSELLER** • From the co-author of *The Guernsey Literary and Potato Peel Pie Society* comes a wise, witty, and exuberant novel, perfect for fans of Lee Smith, that illuminates the power of loyalty and forgiveness, memory and truth, and the courage it takes to do what's right. Annie Barrows once again evokes the charm and eccentricity of a small town filled with extraordinary characters. Her new novel, *The Truth According to Us*, brings to life an inquisitive young girl, her beloved aunt, and the alluring visitor who changes the course of their destiny forever. In the summer of 1938, Layla Beck's father, a United States senator, cuts off her allowance and demands that she find employment on the Federal Writers' Project, a New Deal jobs program. Within days, Layla finds herself far from her accustomed social whirl, assigned to cover the history of the remote mill town of Macedonia, West Virginia, and destined, in her opinion, to go completely mad with boredom. But once she secures a room in the home of the unconventional Romeyn family, she is drawn into their complex world and soon discovers that the truth of the town is entangled in the thorny past of the Romeyn dynasty. At the Romeyn house, twelve-year-old Willa is desperate to learn everything in her quest to acquire her favorite virtues of ferocity and devotion—a search that leads her into a thicket of mysteries, including the questionable business that occupies her charismatic father and the reason her adored aunt Jottie remains unmarried. Layla's arrival strikes a match to the family veneer, bringing to light buried secrets that will tell a new tale about the Romeyns. As Willa peels back the layers of her family's past, and Layla delves deeper into town legend, everyone involved is transformed—and their personal histories completely rewritten. Praise for *The Truth According to Us* “As delightfully eccentric as *Guernsey* yet refreshingly different . . . an epic but intimate family novel with richly imagined characters . . . Willa's indomitable spirit, keen sense of adventure and innate intelligence reminded me of two other motherless girls in literature: Scout Finch in Harper Lee's *To Kill a Mockingbird* and Flavia de Luce in Alan Bradley's big-hearted British mystery series.”—*The Washington Post* “*The Truth According to Us* has all the characteristics of a great summer read: A plot that makes you want to keep turning the pages; a setting that makes you feel like you're inhabiting another time and place; and characters who become people you're sad to leave behind—and thus who always stay with you.”—*Miami Herald* “It takes a brave author to make the heroine of a new novel an observant and feisty girl . . . like Scout Finch in *To Kill a Mockingbird*. . . . But Barrows . . . has created a believable and touching character in Willa.”—*USA Today* “[A] heartwarming coming-of-age novel [that] sparkles with folksy depictions of a tight-knit family and life in a small town . . . full of richly drawn, memorable characters.”—*The Seattle Times* “A big, juicy family saga with warm humor and tragic twists . . . The story gets more and more absorbing as it moves briskly along.”—*St. Louis Post-Dispatch* “Annie Barrows leaves no doubt that she is a storyteller of rare caliber, with wisdom and insight to spare. Every page rings like a bell.”—Paula McLain, author of *The Paris Wife*

John Adams (October 30 1735 - July 4, 1826) was the second president of the United States (1797-1801), having earlier served as the first vice president of the United States (1789-1797). An American Founding Father, Adams was a statesman, diplomat, and a leading advocate of American independence from Great Britain. Well educated, he was an Enlightenment political theorist who promoted republicanism, as well as a strong central government, and wrote prolifically about his often seminal ideas—both in published works and in letters to his wife and key adviser Abigail Adams. Adams was a lifelong opponent of slavery, having never bought a slave. In 1770 he provided a principled, controversial, and successful legal defense to the British soldiers accused in the Boston Massacre, because he believed in the right to counsel and the “protect[ion] of innocence.” Adams came to prominence in the early stages of the American Revolution. A lawyer and public figure in Boston, as a delegate from Massachusetts to the Continental Congress, he played a leading role in persuading Congress to declare independence. He assisted Thomas Jefferson in drafting the Declaration of Independence in 1776, and was its primary advocate in the Congress. Later, as a diplomat in Europe, he helped negotiate the eventual peace treaty with Great Britain, and was responsible for obtaining vital governmental loans from Amsterdam bankers. A political theorist and historian, Adams largely wrote the Massachusetts Constitution in 1780, which together with his earlier *Thoughts on Government*, influenced American political thought. One of his greatest roles was as a judge of character: in 1775, he nominated George Washington to be commander-in-chief, and 25 years later nominated John Marshall to be Chief Justice of the United States. Adams' revolutionary credentials secured him two

terms as George Washington's vice president and his own election in 1796 as the second president. During his one term as president, he encountered ferocious attacks by the Jeffersonian Republicans, as well as the dominant faction in his own Federalist Party led by his bitter enemy Alexander Hamilton. Adams signed the controversial Alien and Sedition Acts, and built up the army and navy especially in the face of an undeclared naval war (called the "Quasi-War") with France, 1798-1800. The major accomplishment of his presidency was his peaceful resolution of the conflict in the face of Hamilton's opposition. In 1800, Adams was defeated for re-election by Thomas Jefferson and retired to Massachusetts. He later resumed his friendship with Jefferson. He and his wife founded an accomplished family line of politicians, diplomats, and historians now referred to as the Adams political family. Adams was the father of John Quincy Adams, the sixth President of the United States. His achievements have received greater recognition in modern times, though his contributions were not initially as celebrated as those of other Founders. Adams was the first U.S. president to reside in the executive mansion that eventually became known as the White House.

"Give me liberty, or give me death!" is a quotation attributed to Patrick Henry from a speech he made to the Second Virginia Convention on March 23, 1775, [1] at St. John's Church in Richmond, Virginia. Henry is credited with having swung the balance in convincing the convention to pass a resolution delivering Virginian troops for the Revolutionary War. Among the delegates to the convention were future U.S. Presidents Thomas Jefferson and George Washington

Teaching and learning through Hollywood, or commercial, film productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century. Purposeful and effective instruction through film, however, is not problem-free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we have collaboratively developed a collection of practical, classroom-ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and, where appropriately utilized, foster critical thinking and civic mindedness. The College, Career, and Civic Life (C3) framework, represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-12 teachers of United States history, by offering a collection of classroom-ready tools based on the Hollywood or History? strategy and designed to foster historical inquiry through the careful use of historically themed motion pictures. The book consists of K-5 and 6-12 lesson plans addressing the following historical eras (Adapted from: UCLA, National Center for History in Schools).

#1 NEW YORK TIMES BESTSELLER • Pulitzer Prize-winning author Jon Meacham helps us understand the present moment in American politics and life by looking back at critical times in our history when hope overcame division and fear. ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • The Christian Science Monitor • Southern Living Our current climate of partisan fury is not new, and in The Soul of America Meacham shows us how what Abraham Lincoln called the "better angels of our nature" have repeatedly won the day. Painting surprising portraits of Lincoln and other presidents, including Ulysses S. Grant, Theodore Roosevelt, Woodrow Wilson, Franklin D. Roosevelt, Harry S. Truman, Dwight Eisenhower, and Lyndon B. Johnson, and illuminating the courage of such influential citizen activists as Martin Luther King, Jr., early suffragettes Alice Paul and Carrie Chapman Catt, civil rights pioneers Rosa Parks and John Lewis, First Lady Eleanor Roosevelt, and Army-McCarthy hearings lawyer Joseph N. Welch, Meacham brings vividly to life turning points in American history. He writes

about the Civil War, Reconstruction, and the birth of the Lost Cause; the backlash against immigrants in the First World War and the resurgence of the Ku Klux Klan in the 1920s; the fight for women's rights; the demagoguery of Huey Long and Father Coughlin and the isolationist work of America First in the years before World War II; the anti-Communist witch-hunts led by Senator Joseph McCarthy; and Lyndon Johnson's crusade against Jim Crow. Each of these dramatic hours in our national life have been shaped by the contest to lead the country to look forward rather than back, to assert hope over fear—a struggle that continues even now. While the American story has not always—or even often—been heroic, we have been sustained by a belief in progress even in the gloomiest of times. In this inspiring book, Meacham reassures us, “The good news is that we have come through such darkness before”—as, time and again, Lincoln's better angels have found a way to prevail. Praise for *The Soul of America* “Brilliant, fascinating, timely . . . With compelling narratives of past eras of strife and disenchantment, Meacham offers wisdom for our own time.”—Walter Isaacson “Gripping and inspiring, *The Soul of America* is Jon Meacham's declaration of his faith in America.”—Newsday “Meacham gives readers a long-term perspective on American history and a reason to believe the soul of America is ultimately one of kindness and caring, not rancor and paranoia.”—USA Today

This test prep is good for kids who are on the fence and having trouble passing, or need to increase their margin. These kids will often say "I DON'T KNOW WHERE TO START" when explaining their confusion. This book address that problem with three approaches. 1) In contrast with the other study guides that use random questions in their practice exams; this book collated the questions into chapters based on the logic to solve them. The 6th grade book is divided into eight chapters. They are Logic, Arithmetic, Geometry, Fractions, Reading Graphs and tables, Measurements including a ruler, basic statistics, and order of operations. This book teaches basics then goes into practice exams with word problems. Once the student is proficient with the questions organized into chapters then they are ready for random questions. 2) This study guide has thousands of practice problems. I have placed over 3100 videos on YouTube showing you how to work the problems 3) I reviewed several years of past exams and placed enfaces on the easiest and most common questions. Mastering these questions should yield a 75% to 80%. If a student is already achieving this percentage; the other guides or web site with random questions and covering all material might be best. A book might be better for your student than the web sites for two reasons. 1) The more common and easiest questions are using a ruler to measure. The web designers don't know the size of your computer screen and can't determine if the student has measured correctly. We can get a high percentage of these problems easily. 2) When studying on a computer there are too many websites with the answers. With a book; parents can have greater assurance the work is being done. This book is developed by a trained professional out of concern. It is not the product of a large publishing house. It is the results of one person who wants to help. Best Regards Mark Shannon

This latest edition of an official U.S. Government military history classic provides an authoritative historical survey of the organization and accomplishments of the United States Army. The chapters in *Urban Educational Leadership for Social Justice: International Perspectives* constitute a collection of works that explore dynamics related to equity in multiple contexts. Authors examined these issues in Turkey, Egypt the United States, Thailand and at a global level by comparing and contrasting school leadership practice across borders. Considered as a whole, these papers explore various topics that will be at the forefront of educational research for years to come. Increasingly, educational leadership understand that there are important lessons to be learned internationally and globally. This book includes important research conceived from these perspectives. Our hope is that individually and collectively, they might contribute to our understanding of international and global issues in educational leadership and that they will extend, challenge and deepen extant lines of inquiry and begin others.

Measuring History complements the cases presented in *Wise Social Studies Practices* (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of *Measuring History* are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In

these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests. The Civil War did not end with Confederate capitulation in 1865. A second phase commenced which lasted until 1871—not Reconstruction but genuine belligerency whose mission was to crush slavery and create civil and political rights for freed people. But as Gregory Downs shows, military occupation posed its own dilemmas, including near-anarchy.

World population is increasing at an alarming rate and this has resulted in increasing tremendously the demand for tree products such as wood for construction materials, fuel and paper, fruits, oils and medicines etc. This has put immense pressure on the world's supplies of trees and raw material to industry and will continue to do so as long as human population continues to grow. Also, the quality of human diet, especially nutritional components, is adversely affected due to limited genetic improvement of most of fruit trees. Thus there is an immediate need to increase productivity of trees. Improvement has been made through conventional breeding methods, however, conventional breeding is very slow due to long life cycle of trees. A basic strategy in tree improvement is to capture genetic gain through clonal propagation. Clonal propagation via organogenesis is being used for the production of selected elite individual trees. However, the methods are labour intensive, costly, and produce low volumes. Genetic gain can now be captured through somatic embryogenesis. Formation of embryos from somatic cells by a process resembling zygotic embryogenesis is one of the most important features of plants. In 1958, Reinert in Germany and Steward in USA independently reported somatic embryogenesis in carrot cultures. Since then, tremendous progress in somatic embryogenesis of woody and non-woody plants has taken place. It offers a potentially large-scale propagation system for superior clones.

What kind of social studies knowledge can stimulate a critical and ethical dialog with the past and present? "Re-Membering" History in Student and Teacher Learning answers this question by explaining and illustrating a process of historical recovery that merges Afrocentric theory and principles of culturally informed curricular practice to reconnect multiple knowledge bases and experiences. In the case studies presented, K-12 practitioners, teacher educators, preservice teachers, and parents use this praxis to produce and then study the use of democratized student texts; they step outside of reproducing standard school experiences to engage in conscious inquiry about their shared present as a continuance of a shared past. This volume exemplifies not only why instructional materials—including most so-called multicultural materials—obstruct democratized knowledge, but also takes the next step to construct and then study how "re-membered" student texts can be used. Case study findings reveal improved student outcomes, enhanced relationships between teachers and families and teachers and students, and a closer connection for children and adults to their heritage.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Modern educators are currently ideologically in one of two camps: those who see American education as heading in the right direction, and those who fear that it has gone tragically astray. For over 100 years the American educational system has been the hope of those who want to level the playing field of opportunity, yet today we continue to lag behind several industrialized countries when comparing standardized science test scores. Is this acceptable in the most advanced, affluent country on earth? Why are we not the reigning educational system on the planet? And are standardized test scores even the best way to assess the type of learning it takes to lead the world in science achievement? The nature of science does not lend itself well to bubble tests, yet these assessments are all we have to "prove" that our students are good scientists. This book was born of a science teacher's frustration brought on by the standardized testing movement's reliance on highstakes tests as the sole measurement tool with which to measure achievement. Science by its very nature

be measured by a bubble test? And how do these high stakes tests affect minorities, girls, those with disabilities and at risk students? September 11, 2001 alerted us that we Americans can be less creative than our enemies, an unprecedented event in American history. What if changing the way we teach and assess science learning better prepares our citizens for creative preventions and solutions to world problems, instead of creating citizens who have to react to world problems? The nature of science begs a better way.
