Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

Look up! That's a lot of space out there! In *The Solar System: Out of This World* with Science Activities for Kids, young readers explore the comets, meteors, asteroids, sun, planets, and moons that make up our solar system. Hands-on science projects, essential questions, links to primary sources, and more get kids excited about learning what's deep in the sky.

Astronomers are on the verge of answering one of our most profound questions: are we alone in the universe? The ability to detect life in remote solar systems is at last within sight, and its discovery—even if only in microbial form—would revolutionize our self-image. *Planet Hunters* is the rollicking tale of the search for extraterrestrial life and the history of an academic discipline. Astronomer Lucas Ellerbroek takes readers on a fantastic voyage through space, time, history, and even to the future as he describes the field of exoplanet research, from the early ideas of sixteenth-century heretic Giordano Bruno to the discovery of the first exoplanet in 1995 to the invention of the Kepler Space Telescope. We join him on his travels as he meets with leading scientists in the field, including Michel Mayor, who discovered the first exoplanet, and Bill Borucki, principal investigator for NASA's Kepler mission. Taken together, the experiences, passion, and perseverance of the scientists featured here make the book an exciting and compelling read. Presenting cutting-edge research in a dynamic and accessible way, *Planet Hunters* is a refreshing look into a field where new discoveries come every week and paradigms shift every year.

Get Free Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

Travel around the globe and visit some of the most interesting places in the world. Learn about them, and then you can scratch and sketch yourself in your favorite place on earth. Contains 20 drawings plus rainbow and holographic foil scratch-off pages and a special wood stylus. Follows the activities of a group of fairies at night while children sleep, in a book with transparent illustrations intended to be projected onto a wall with a flashlight.

Young artists will love exploring the exciting world of Scratch and Sketch Extreme! with this challenging collection of 20 cool and complex drawings, from the wild to the wonderful! As you trace intricate artwork on the black-coated pages, a wolf, night sky, unicorn, and so much more emerge in sparkling foils of silver and green, or colorful swirls! White outlines on black scratch-off pages create a fun way for younger children (ages 5 and up)

Unleash the beasts of J.K. Rowling's Wizarding World! Follow prompts to scratch the pages inside and reveal art and patterns inspired by the Harry Potter and Fantastic Beasts films. Playful rhymes and by-the-sea sketches invite you to build sand castles, toss a Frisbee, fly a kite, and visit the ice cream truck. Discover seashore critters as you scratch and sketch pictures of fun at the beach! Wire-o bound hardcover. Includes: 10 scratch-off, 10 illustrated, and 10 sketch pages. Ages 5 and up.

This new book goes behind the scenes on the award-winning TV series Battlestar Galactica to discover the concepts behind the designs of dozens of spaceships! Battlestar Galactica debuted on TV in 1978 and acquired a phenomenal following, breaking new ground for TV drama and winning several awards. It returned to TV screens in 2003 in a critically acclaimed reimagined series, with Time Magazine naming it one of the 100 Best TV Shows of All Time. This behind-the-scenes guide looks at the creation of the ships in both the original and the

Get Free Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

reimagined series, including vessels of the ragtag fleet and those of the Cylon enemy. Featuring artwork from the groundbreaking first series and the 2004 reimagined series, this volume explores the art of ship creation from the first sketches to the finished designs of the modelmakers. Covering 18 key ships from the two shows, including the Galactica itself, the Vipers and the Cylon Raiders, the pages are packed with original concept art from designers Eric Chu, Andrew Probert and legendary artist Ralph McQuarrie.

Blast off into outer space as you scratch your way through the solar system! Use the stylus included to scratch away the white outlines and uncover sparkly gold, silver, glitter, swirl, and even glow-in-the-dark pages as you trace and draw. This is a Trace-Along title! Young artists can simply follow the white lines with the wooden stylus to create colorful pictures of planets, moons, comets, meteors, and more. Book includes 20 solar system drawings with informative text. Includes 20 paper pages for extra doodles and drawings. Book comes with the wooden stylus for scratching away the black coating. Sturdy wire-o hardcover art activity book measures 6-3/8" wide x 8-1/2" high. Ages 5 and up. 64 pages. Non-toxic: Potential eye irritant. Avoid inhaling particles of scratch coating. Not for children under 5 years. Meets all applicable safety standards.

Learn amazing facts about these wild animals as you copy simple sketches of 20 of the world's most exotic animals.

Scratch & Sketch Solar System Trace Along Peter Pauper Press

Young dancers can learn all about ballet by sketching the pictures of tutus, pointe shoes, ballerinas, and more with the wooden stylus included. As they scratch away their own drawings and designs on the black-coated pages, they'll be amazed when the glitter and colorful swirl patterns emerge like magic! Ages 6 and up.

The solar system most of us grew up with included nine planets, with Mercury closest to the sun and Pluto at the outer edge. Then, in 2005, astronomer Mike Brown made the discovery of a lifetime: a tenth planet, Eris, slightly bigger than Pluto. But instead of adding one more planet to our solar system, Brown's find ignited a firestorm of controversy that culminated in the demotion of Pluto from real planet to the newly coined category of "dwarf" planet. Suddenly Brown was receiving hate mail from schoolchildren and being bombarded by TV reporters—all because of the discovery he had spent years searching for and a lifetime dreaming about. A heartfelt and personal journey filled with both humor and drama, *How I Killed Pluto and Why It Had It Coming* is the book for anyone, young or old, who has ever imagined exploring the universe—and who among us hasn't?

Dive in for hours of fun and creativity as your artwork appears like magic while

Best for crayons, colored pencils, watercolor paints and very light fine tip markers. Extra large size (8.5" x 11") 110 pages Premium design. A perfect gift for kids, adults, students ! " "

Called "spellbinding" (*Scientific American*) and "thrilling...a future classic of popular science" (PW), the up close, inside story of the greatest space exploration project of our time, New Horizons' mission to Pluto, as shared with David Grinspoon by mission leader Alan Stern and other key players. On July 14, 2015, something amazing happened. More than 3 billion miles from Earth, a small NASA spacecraft called New Horizons screamed past Pluto at more than 32,000 miles per hour, focusing its instruments on the long mysterious icy worlds of the Pluto system, and then, just as quickly, continued on its journey out into the beyond. Nothing like this has occurred in a generation—a raw exploration of new worlds unparalleled since NASA's Voyager missions to Uranus and Neptune—and nothing quite like it is planned to happen ever again. The photos that New Horizons sent back to Earth graced the front pages of newspapers

Get Free Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

on all 7 continents, and NASA's website for the mission received more than 2 billion hits in the days surrounding the flyby. At a time when so many think that our most historic achievements are in the past, the most distant planetary exploration ever attempted not only succeeded in 2015 but made history and captured the world's imagination. How did this happen? Chasing New Horizons is the story of the men and women behind this amazing mission: of their decades-long commitment and persistence; of the political fights within and outside of NASA; of the sheer human ingenuity it took to design, build, and fly the mission; and of the plans for New Horizons' next encounter, 1 billion miles past Pluto in 2019. Told from the insider's perspective of mission leader Dr. Alan Stern and others on New Horizons, and including two stunning 16-page full-color inserts of images, Chasing New Horizons is a riveting account of scientific discovery, and of how much we humans can achieve when people focused on a dream work together toward their incredible goal.

Presents twenty drawing and design projects, including hieroglyphics, tattoos, super-heroes, and African sculpture.

The first biography of America's greatest twentieth-century sculptor, Alexander Calder: an authoritative and revelatory achievement, based on a wealth of letters and papers never before available, and written by one of our most renowned art critics. Alexander Calder is one of the most beloved and widely admired artists of the twentieth century. Anybody who has ever set foot in a museum knows him as the inventor of the mobile, America's unique contribution to modern art. But only now, forty years after the artist's death, is the full story of his life being told in this biography, which is based on unprecedented access to Calder's letters and papers as well as scores of interviews. Jed Perl shows us why Calder was--and remains--a barrier

Get Free Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

breaker, an avant-garde artist with mass appeal. This beautifully written, deeply researched book opens with Calder's wonderfully peripatetic upbringing in Philadelphia, California, and New York. Born in 1898 into a family of artists--his father was a well-known sculptor, his mother a painter and a pioneering feminist--Calder went on as an adult to forge important friendships with a who's who of twentieth-century artists, including Joan Miró, Marcel Duchamp, Georges Braque, and Piet Mondrian. We move through Calder's early years studying engineering to his first artistic triumphs in Paris in the late 1920s, and to his emergence as a leader in the international abstract avant-garde. His marriage in 1931 to the free-spirited Louisa James--she was a great-niece of Henry James--is a richly romantic story, related here with a wealth of detail and nuance. Calder's life takes on a transatlantic richness, from New York's Greenwich Village in the Roaring Twenties, to the Left Bank of Paris during the Depression, and then back to the United States, where the Calders bought a run-down old farmhouse in western Connecticut. New light is shed on Calder's lifelong interest in dance, theater, and performance, ranging from the Cirque Calder, the theatrical event that became his calling card in bohemian Paris to collaborations with the choreographer Martha Graham and the composer Virgil Thomson. More than 350 illustrations in color and black-and-white--including little-known works and many archival photographs that have never before been seen--further enrich the story.

Take a journey through the planets and stars, starting from our own little corner of the universe and venturing far beyond. Learn about galaxies, constellations, black holes, exoplanets, and space travel itself. Out of this world! Wire-o bound hardcover 6-3/8 wide x 8-1/2 high (16.2 cm wide x 21.6 cm high) 64 pages (20 scratch-off, 20 illustrated, 20 sketch pages) Shrink-wrapped

with a wooden stylus. White outlines on black scratch-off pages create a fun way for younger children (ages 5 and up) to trace illustrations, revealing magnificent colors beneath. Non-toxic. Potential eye irritant. Avoid inhaling particles of scratch coating. Not for children under 5 years. Meets all applicable safety standards.

Launch your business to new heights with out-of-this world innovation For over half a century, NASA has delivered a continuous stream of innovative accomplishments that have inspired the world. Neil Armstrong walking on the moon, the space shuttle pioneering reusable space planes, Mars rovers exploring the red planet--the list goes on. We read the stories and watch the footage, and as impossible as these achievements seem, NASA makes them look easy. The most innovative organization in history, NASA holds an otherworldly mystique for those of us who look on in awe. But behind every one of NASA's amazing innovations lie carefully managed operations, just like any other organization. Innovation the NASA Way provides practical, proven lessons that will help you envision the future of your organization with clarity, meet every challenge with tenacity, and manage innovation with groundbreaking creativity. NASA insider Rod Pyle has used the agency's unique methods for driving innovation to train leaders from eBay, the Federal Reserve, Michelin tires, Conoco/Phillips, and many other Fortune 100 and 500 companies. now, for the first time, NASA's cutting-edge strategies for nurturing and fostering innovation are revealed. Innovation the NASA Way takes you on a tour through the programs that pushed the envelope on the agency's leadership and managerial capacity. It describes the seemingly impossible tasks NASA personnel faced, explains how each challenge was met with forward-looking management methods, and describes the extraordinary innovations that resulted. Learn how NASA built the Lunar Module, the first true

Get Free Solar System Scratch And Sketch An Activity Book For Inquisitive Artists And Astronauts Of All Ages

spaceship; created the Saturn V's F-1 rocket motor, the most powerful ever built; and how it creates partnerships with the new players in space—private entrepreneurs. These are just a few of the projects covered in the book. Space exploration may be NASA's mission, but its innovative leadership practices are founded on solid, down-to-earth methods anyone can apply, anywhere. PRAISE FOR INNOVATION THE NASA WAY: "Pyle insightfully and skillfully draws out the methods and strategies naSa has employed to achieve its lofty goals. It innovates so far outside the box that the box disappears. Pyle suggests its touchstones are boldness, daring, and passion, and he suggests you can bring those traits into your business." -- DON CAMBOU, executive Producer of History Channel's Modern Marvels "Pyle highlights NASA's key innovation lessons and leaves you with amazing stories you'll want to remember and use in your organization." -- STEVEN FENTRESS, Planetarium Director at Rochester Museum & Science Center "From building rocket engines to exploring Mars and beyond, Rod Pyle has written a very readable and eminently practical volume that documents the challenges, solutions, and lessons learned from NASA's storied history. To read it is to be inspired to recreate in today's challenging world NASA's daring, boldness and passion." -- STEVEN J. DICK, Former NASA Chief historian "Fuel your inspiration with this fascinating book explaining the key lessons of NASA's innovation and exploration of space. Pyle's meaningful insights will improve your business." -- LUKAS VIGLIETTI, President, Swissapollo, Swiss Space Association
