decision-making focus. Anyone who will ever be asked to prepare or use accounting information to make effective decisions will benefit from this best-selling text.

This text is an unbound, three hole punched version. Government and Not-for-Profit Accounting, 7th Edition by Michael Granof, Saleha Khumawala, Thad Calabrese, and Daniel Smith makes students aware of the dynamism of government and not-for-profit accounting and of the intellectual challenges that it presents. Not only does the 7th edition keep students informed of current accounting and reporting standards and practices, but it also ensures that they are aware of the reasons behind them, their strengths and limitations, and possible alternatives.

This book is about two innovative methods for teachers of bilingual students to use in improving their academic achievement. Transacquisition Pedagogy or TAP developed by Tauwehe Sophie Tamati is the method described in the book's first part. It uses principles of flexible bilingualism and a task sequenced approach. The success of TAP in an intervention study in two of New Zealand's M?ori schools illustrates how cognitive and linguistic processes can be used to increase student conceptual understanding and to improve their academic biliteracy. Part two is about the Curriculum Design Coherence Model (CDC Model) created by Elizabeth Rata. It shows teachers how to design concepts, content and competencies to connect academic knowledge and thinking processes. The CDC Model has proved its success in the Knowledge-Rich School Project in New Zealand and England. TransAcquisition Pedagogy and the CDC Model are aligned. TAP works by putting the CDC design method into practice. The separate usefulness of TAP and the CDC Model and the added value of their alignment provides an innovative approach to education. Used together or separately they
