

Solution Of Cost Accounting By Matz Usry 9th Edition

An excellent book for commerce students appearing in competitive, professional and other examinations. 1. Elements of Cost and their Classification, 2. Materials Control and Valuation, 3. Labour Cost Control, 4. Expenses/Overheads, 5. Overheads—Machine Hour Rate, 6. Single or Unit or Output Costing, 7. Calculation of Tender Price or Quotation Price, 8. Production Account or Manufacturing Account, 9. Contract Costing, Job Costing and Batch Costing, 10. Process Cost Accounting, 11. Reconciliation of Cost and Financial Accounts, Operating Costing/Service Costing Cost Control Accounts or Non-Integrated Accounts Integrated Accounts.

The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes & 'in action' boxes show realistic applications of these concepts throughout. Comprehensive end-of-chapter problems provide students with all the practice they need to fully learn each concept.

A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly, simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters. Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self test by students. This is an ideal book for self study. New to this edition • All chapters thoroughly revised • Latest information on Cost Accounting Standards (CAS) issued by the Institute of Cost Accountants of India (ICAI) • Chapter on 'Miscellaneous Topics' made more contemporary by including some new sub-topics, and thus re-named 'Advanced Cost Management Techniques' • Revision and augmentation of practical problems

This extensively revised third edition serves as a textbook for B.Com. and other professional courses in accounting. It covers the new syllabus of Cost Accounting recommended by U.G.C. for B.Com. courses and also the syllabus of Cost Accounting (PE-II Exam., of ICAI). The text is example based and illustrates each concept by providing solved problems that demand the application of the concept. In addition, under the section, "Review Problems", complete solutions to

a large number of problems selected from professional examinations have been incorporated. A key feature of the book is discussion at the end of each solution, under "Points to Remember", that provides insights into the problem. Learning cost accounting using this book will be more enjoyable as the problems are interesting and arranged in order of difficulty.
