This book is designed for a mathematics for elementary school teachers course where instructors choose to focus on and/or take an activities approach to learning. It provides inductive activities for prospective elementary school teachers and incorporates the use of physical models, manipulatives, and visual images to develop concepts and encourage higher-level thinking. This text contains an activity set that corresponds to each section of the companion text, Mathematics for Elementary Teachers: A Conceptual Approach which is also by Bennett/Nelson. The Activities Approach text can be used independently or along with its companion volume. The authors are pleased to welcome Laurie Burton, PhD, Western Oregon University to this edition of Mathematics for Elementary Teachers: An Activity Approach.

Cancer remains one of the most challenging issues in modern medicine, being responsible for a high number of deaths every year. Recent important developments in cancer diagnosis and therapy based on the versatility of nanosystems have made it possible to incorporate multifunctional synergistic actions into a single delivery system. This book compiles the research on the use of functional lipid nanosystems that combine different strategies in one single nanosystem to enhance overall cancer treatment. Besides providing an overview of the current functional nanosystem strategies, it also offers researchers essential theoretical background on cancer, the physiological barriers to its treatment, aspects related to the design and optimization of nanocarriers for cancer treatment, and clinical developments, including promises, safety

issues, and the expected future. The editors bring together a group of scientists from all over the world to discuss the most relevant issues and to provide updates on functional lipid nanosystems and cancer.

The Solutions 2nd Edition Workbook supports the Student's Book content with plenty of extra practice and revision. Mathematics for Elementary School Teachers is designed to give you a profound understanding of the mathematical content that you are expected to know and be able to teach. The chapters integrate the National Council of Teachers of Mathematics (NCTM) Standards and Expectations and the new Common Core State Standards, as well as research literature. The five NCTM Process Standards of problem solving, reasoning and proof, communication, connections, and representation highlight ways that teachers present content, the ways that students learn content, and various ways that students can demonstrate procedural and conceptual understanding. The worked examples and homework questions provide prospective elementary school teachers with opportunities to develop mathematical knowledge, understanding, and skills that they can apply in their own classrooms effectively. The learning path begins with the Where Are We Going? Chapter Openers, worked Examples with Yellow Markers that indicate the Process Standards throughout the text, to the Concept Maps, to the Section Question Sets with their refreshers of Process Standards, to the Chapter Organizers with Learning Outcomes and a list of the corresponding Review Questions, and finally, conclude at the Chapter Tests with their overarching Learning Outcomes. Critical Theories for School Psychology and Counseling introduces school psychologists and counselors to five critical theories that inform more equitable, inclusive work with marginalized and underserved student populations. Offering accessible conceptualizations of each theory and explicit links to application in practice and supervision, the book speaks to common professional functions and issues such as cognitive assessment, school-based counseling, discipline disproportionality, and more. This innovative collection offers graduate students, university faculty, and practicum and internship supervisors an insightful new direction for serving learners across diverse identities, cultures, and abilities. MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS, 6E offers future teachers a comprehensive mathematics course designed to foster concept development through examples, investigations, and explorations. In this text, intended for the one- or two-semester course required of Education majors, Bassarear demonstrates that there are many paths to solving a problem, and sometimes problems have more than one solution. The author presents real-world problems—problems that require active learning in a method similar to how archaeologists explore an archaeological find: they carefully uncover the site, slowly revealing more and more of the structure. Visual icons throughout the main text allow instructors to easily connect content to the hands-on activities in the corresponding Explorations Manual. With this

exposure, future teachers will be better able to assess student needs using diverse approaches. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Welcoming Young Children into the Museum provides all of the information practitioners need to consider when making the decision to engage with this audience and their carers. Meeting the reader where they are, this guide enables professionals to work toward outcomes that fit with their needs. Working methodically from the initial stages of bringing staff on board, through to implementation and evaluation, readers are carefully steered through each phase. "Big-picture" needs, like adherence to mission, are considered alongside logistical components, like cleaning schedules, to ensure that museums cater to young children in a way that is beneficial to both the visitors and the institution. Drawing on current neurological research and best practices in early childhood education and development, this guide presents case studies from a variety of different institutions around the world that demonstrate that creating interesting, developmentally appropriate opportunities for young children is about much more than just simplifying what is already on offer. Erdman, Nguyen and Middleton demonstrate that the age and needs of the visitors must be taken into careful consideration, as well as the assets and potential obstacles of the institution. Welcoming Young Children into the Museum will be essential reading for professionals working in museums large and small, regardless of type. It will be useful to those who are considering setting up new programmes for early years audiences and those with existing programmes, who would like to improve their offering.

The Internationalization of the Academic Library presents a theoretically informed, empirically grounded analysis of the process of academic library internationalization. Drawing on interviews with library personnel from around the world, Lombard analyzes internationalization at the departmental level of an academic library. Demonstrating that college and library personnel have positive intentions when it comes to internationalization, the research presented nevertheless reveals that there was little commitment to an intentional, holistic role in the libraries studied. Drawing on internationalization expertise and models of prominent scholars, the book argues that libraries need to be more deliberate in their internationalization efforts and collaborate with other college personnel and departments outside the library. Lombard asserts that internationalization can facilitate a better understanding of the potential for transformation of the library's mission, vision, and policy. This book cuts across the fields of library science and higher education administration, ensuring that the book will appeal to researchers and students working in these disciplines. Library professionals around the world will also find much to interest them within the book.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around

them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B. Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Describes the philosophy of the Daily 5 teaching structure and includes a collection of literacy tasks for students to complete daily.

This book explores innovations in public management, including establishing a corporate vision, strategizing an organization and change management. Chapters provide a valuable frame of reference for the 21st-century manager of public services by assessing the renewal of existing practices such as strategic costing, performance management, digitization and procurement and innovations in management practices, including branding, Lean Management, resilience and risk management. The book suggests that, as the management of public services is imbued with financial, social, economic and political uncertainties, management needs to be flexible and responsive to new ideas and practices to fulfil its purpose. This book ultimately supports the reflective manager, those who think about their job and are open to new ideas on how their job can be done better, by revisiting existing practices and examining innovations in public management. Enriched with real-life cases and thought-provoking discussion questions, this is the ideal textbook for reflective, open-minded advanced students of public management and actual, or aspiring, reflective managers in public services.

This book develops a new approach to naturalizing phenomenology. The author proposes a mechanistic model that offers new methodological perspectives for studying complex mental phenomena such as consciousness. While mechanistic models of explanation are widely applied in cognitive science, their approach to describing subjective phenomena is limited. The author argues that phenomenology can fill this gap. He proposes two novel ways of integrating phenomenology and mechanism. First, he presents a novel reading of phenomenological analyses as functional analyses. Such functional phenomenology delivers a functional sketch of a target system and provides constraints on the space of possible mechanisms. Second, he develops a

neurophenomenological approach to dynamic modeling of experience. He shows that it can deliver a dynamic model of a target phenomenon, in this case a model of subjective experience, and inform the search for an underlying mechanism. Mechanisms and Consciousness will be of interest to scholars and advanced students working in phenomenology, philosophy of mind, and the cognitive sciences.

Over the last decade, the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.

Johnson's visionary and much-needed book is a call for the transformation of English education to embrace rather than reject Blackness. Confronting the context of heightened racial violence against Black youth that continues to sweep across the United States, Johnson illuminates the interconnection between the physical and symbolic violence that unfolds in and outside the classroom and demonstrates the harm this causes to Black youth. Employing an original framework, Critical Race English Education, Johnson reveals how English education and ELA classrooms are dominated by eurocentric language and literacy practices, and provides a justice-oriented framework that combats anti-Black racism. Throughout the book, Johnson disperses love letters to Blackness, Black culture, and Black people, which serve as actions and practices for positive thinking and self-awareness about Blackness. Critical Race English Education is a movement for Black lives. A crucial resource for pre-service ELA teachers, researchers, professors, and graduate students in language and literacy education, and sociology of education, this book offers classroom lessons, thematic units, sample activities, and other pedagogical and curricula practices that reconceptualize ELA pedagogies in humanizing ways and cater to the needs of students who come from racially and linguistically diverse backgrounds.

This timely book explores how various feminist perspectives fruitfully explain women's experience of educational leadership, drawing on a contemporary conceptualisation of fourth-wave feminism that is intersectional and inclusive. The book asks which and whose feminist theory is used to explain gender and feminism in educational leadership, management and administration (ELMA): the scholar's, the research participant's or a combination of the two in the co-construction of knowledge from an intersectional feminist perspective. It conceptualises intersectional and inclusive feminist perspectives on educational leadership, theorising research through a Black British feminist perspective, a gender and Islamic perspective and a queer theory perspective, depending on the self-identification of participants. It explores digital feminism and men's pro-feminism. The book identifies feminist leadership praxis as a focus for future research and explores how leaders can draw on funds of knowledge, identity cultural wealth and lead and educate diverse populations of students. Highlighting the importance of intersectional feminist perspectives in ELMA, the book will appeal to scholars, researchers and postgraduate students in the fields of inclusive educational leadership and management, gender studies and feminism.

Fixing American Politics: Solutions for the Media Age brings together original chapters from 34 noted scholars from two disciplines – political science and communication – asked to identify the most pressing problems facing the American people and how they can be solved. Authors address the questions succinctly and directly, with their favored solutions featured in chapter titles that exhort and inspire. The book gives the reader much to think about and debate. Should news outlets be funded with public money rather than by private enterprise? Are the new social media a boon or a bane to political elections? Is the American past dead, or is it living once again? Do churchgoers and environmentalists have anything to discuss? Is the FCC doing its job? Can political ads be made less toxic? Should Fox News be "cancelled?" Should cancel cultures be cancelled? Can we become more civil to one another and, if so, how? Fixing American Politics poses all the best questions ... and offers some concrete answers as well. This book is perfect for students, citizens, the media, and anyone concerned with contemporary challenges to civic life and discourse today.
