Sleep disorders are a major public health issue that can kick start a lifetime pattern of health, behaviour, and learning problems. From ages 4-10, at least 25 percent of kids have sleep problems. *Sleep Wrecked Kids* guides parents towards good sleep as the norm, allowing themselves and their children to grow and thrive. Speech pathologist and myofunctional practitioner Sharon Moore teaches parents why 'bad sleep' is connected to a myriad of health problems, what 'good sleep' actually means, how to identify red flags for sleep problems, how to improve sleep quality by improving airway health, and so much more! It's Never Too Late to Sleep Train Craig Canapari, MD,2019-05-07 From a leading pediatric sleep physician comes a revolutionary program that will have everyone in the house sleeping through the night. When Dr. Craig Canapari became a father, he realized that all his years of 36-hour hospital shifts didn't even come close to preparing him for the sleep deprivation that comes with parenthood. The difference is that parents don't get a break—it's hard to know if there's a night of uninterrupted sleep anywhere in the foreseeable future. Sleepless nights for kids mean sleepless nights for the rest of the family—and a grumpy group around the breakfast table in the morning. In *It's Never Too Late to Sleep Train*, Canapari helps parents harness the power of habit to chart a clear path to high-quality sleep for their children. The result is a streamlined two-step sleep training plan that focuses on cues and consequences, the two elements that shape all habits and that take on special importance when it comes to kids' bedtime routines. Dr. Canapari distills years of clinical research and experience to make sleep training simple and stress-free. Even if you've been told that you've missed the optimal window for sleep training, Dr. Canapari is here to prove that it's never too late, whether your child is 6 months or 6 years old. He's on your side in the battle against bedtime, and with his advice, parents and children alike can expect a lifetime of healthy sleep.

sleep schedules for children on 3, 2, and 1 nap Sleep training toddlers and children in beds Praise for the Baby Sleep Trainer method: My 5 month old was waking up every 2-3 hours at night and I was seriously sleep deprived. My sleep deprivation was affecting every aspect of my life. I read several books on sleep training, as well as blogs and websites. I was at my wits end. After following the program for two weeks, my child was consistently sleeping 11-12 hours a night and was on a consistent schedule during the day! This program has literally given me my life back. - McKel Neilsen Two months ago I was at the end of my sleep rope with our 6-month-old, boy/girl twins. Exhausted doesn't begin to explain it, I felt desperate. After using the Baby Sleep Trainer Method we feel like we have our lives back. The babies are happy and well rested, and so are we! We have our evenings back to cook dinner, spend time with our 4-year-old daughter, hang out together, and actually do things we enjoy. The process took commitment but has been absolutely worth every bit of it. - Beth Oller, MD Using the Baby Sleep Trainer Method, my daughter quickly went to a routine nap schedule during the day and sleeping through the night from 6:30pm to 6:30am! Also, rather than the exhausting and often unsuccessful rocking or soothing or feeding to sleep, we were able to put her down awake in her crib and she would fall asleep on her own in just a few minutes. It was just incredible. - Online Review

Summary of Richard Ferber's Solve Your Child's Sleep Problems Everest Media, 2022-03-09T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The most frequent calls I receive at the Center for Pediatric Sleep Disorders at Children's Hospital Boston are from parents whose children are sleeping poorly. The parents are tired, frustrated, and often angry. Their own relationship has become tense, and they are wondering whether there is something inherently wrong with their child. #2 The Sleep Center treats sleep problems in children, which are usually common throughout families and social environments. It is important to note that sleep problems are rarely the result of poor parenting. #3 Parents often believe that if their child is a restless sleeper or can't seem to settle down at night, it's because he is by nature a poor sleeper. However, this is rarely the case. Virtually all children without major medical or neurological disorders are able to sleep well. #4 It may be tempting to assume that your child is one of the few children who have difficulty sleeping, but that is almost never the case. Most children have a normal ability to fall asleep and remain asleep, even if they have a sleep disturbance such as sleepwalking or bedwetting.
