Below the sample sentence is line after line of practice space where you can master your letter height, width, spacing, stroke weight and more. The pages are even perforated so it is easy for you to tear them out and practice on a perfectly at surface. But this book contains no ordinary words—they are the immortal phrases from the Declaration of Independence that define freedom and liberty, such as "We hold these truths to be self evident that all men are created equal."

This calligraphy book takes the reader through step by step instructions to learn how to letter Cadels. A cadel is a letter composed of a series of tape-like strokes, which are nearly parallel, and are interwoven and knotted together to produce a complete letter. These capital letters were used as a single initial letter (versal) or multiple letters. The oldest known cadel found was in the illuminated prayer book, the Tres Riches Heures de Duc de Berry made by the Limbourg Brothers. In 1409, Jean Flamel, the Duc's Secretary, inscribed the title page of the book with cadels. He incorporated the cadels into the letter's stems, producing an overall texture to the whole page. Since there is no standard exemplar for this lettering style, this book covers many ways a calligrapher can create these beautiful capitals by either following the historical version or creating their own style.

The history of formal calligraphy has been thoroughly documented, and the demise of what people see as beautiful handwriting is frequently deplored, but the details of the teaching of this skill during this century have gone almost unrecorded. Everyday handwriting is ephemeral and school books soon disappear. The main purpose of this book is to create a historical record, however, techniques are illustrated that may be useful for teachers today, while the ever-changing views of the stylists provide examples, as well as a warning, to those who plan for the future. An individual sample of handwriting reflects the writer's training, character and environment. Collectively, the handwriting of a population of any period is a reflection of educational thinking, but overall it is influenced and ultimately moulded by economic need, social habits and contemporary taste. Within the short space of the period covered by this present study, the changing educational policies, economic forces and inevitable technological advance radically altered the priorities and form of handwriting. These changes show in the models and examples throughout this book as an inexorable (though not entirely smooth) journey towards speed and efficiency. The downgrading of skill training and the freeing of children's creative talent have done the rest. You might say that at the end of the century we have the handwriting we deserve. That statement can be read several ways. It would be a pity to think that our students do not deserve to be taught strategies that enable them to write fast without pain. It might, however, mean that we are edging towards the flexible, efficient, personal handwriting needed to deal with the rapidly changing situation that is likely to face us in the next century.
