

Sport Bikes Automania

A look at the world of muscle cars.

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

A celebration, chronicle, and must-have for Vans sneakers fans, Vans: Off the Wall offers vivid photography and the compelling story of a casual canvas shoe and a DIY spirit that helped turn pop culture inside out. This updated edition, published to coincide with the brand's 50th anniversary, brings to life the Vans community of boarders, bikers, artists, musicians, and street culture, and the iconic shoes its members love to wear. With oral histories from Tony Alva, Joel Tudor, Steve Caballero, Stacy Peralta, Oliver Peck, and others—as well as two new chapters of original material—Vans: Off the Wall provides an intimate, visually stunning account of how the company has changed the face of pop culture since its founding in 1966.

This comprehensive account of the past, present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design. Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era of clean, sustainable energy. The arguments put forward draw on support from an eclectic range of sources - including industry insiders, scientists, economists and environmentalists - to make for an enlightening read.

This newly revised deluxe edition of MoMA Highlights celebrates the 90th anniversary of the Museum MoMA Highlights presents a chronological overview of some of the most significant modern and contemporary artworks through superb high-resolution images and short texts by MoMA curators. MoMA Highlights interweaves works from each of the Museum's curatorial departments - painting and sculpture, drawings, prints and illustrated books, photography, architecture and design, film, and media and performance art - to provide a look at one of the premiere art collections in the world. This anniversary book is almost 50% larger than the standard edition.

According to Vasari, the young Michelangelo often borrowed drawings of past masters, which he copied, returning his imitations to the owners and keeping originals. Half a millennium later, Andy Warhol made a game of "forging" the Mona Lisa, questioning the entire concept of originality. Forged explores art forgery from ancient times to the present. In chapters combining lively biography with insightful art criticism, Jonathon Keats profiles individual art forgers and connects their stories to broader themes about the role of forgeries in society. From the Renaissance master Andrea del Sarto who faked a Raphael masterpiece at the request of his Medici patrons, to the Vermeer counterfeiter Han van Meegeren who duped the avaricious Hermann Göring, to the frustrated British artist Eric Hebborn, who began forging to expose the ignorance of experts, art forgers have challenged "legitimate" art in their own time, breaching accepted practices and upsetting the status quo. They have also provocatively confronted many of the present-day cultural anxieties that are major themes in the arts. Keats uncovers what forgeries—and our reactions to them—reveal about changing conceptions of creativity, identity, authorship, integrity, authenticity, success, and how we assign value to works of art. The book concludes by looking at how artists today have appropriated many aspects of forgery through such practices as street-art stenciling and share-and-share-alike licensing, and how these open-source "copyleft" strategies have the potential to make legitimate art meaningful again. Forgery has been much discussed—and decried—as a crime. Forged is the first book to assess great forgeries as high art in their own right.

Describes the history and types of street motorcycles, and gives information on their uses, parts, safety, and clubs.

Mild-mannered Drake Mallard leads a pretty average life: relaxing at home, helping his daughter Gosalyn with her homework, and palling around with his best buddy Launchpad McQuack. But this suburban pastoral doesn't make for very exciting comics. Good thing Drake is secretly the daring duck of mystery, the crime-fighting powerhouse, Darkwing Duck! (Whew, for a moment there we were worried this would be the most boring solicitation copy in history!) Darkwing Duck, alongside Launchpad, Gosalyn and their many allies, fought the forces of darkness in his beloved city of St. Canard for years, keeping the citizens safe from an endless supply of increasingly ridiculous supervillains. Then, just as suddenly as he appeared, Darkwing slipped into the shadows, not to be seen or heard from again. But what sinister scenario could send St. Canard's stalwart sentinel into seclusion? Just how safe was the city he left behind? And what's going on with the creepy robotic "protectors" the mysterious Quackwerks Corporation has rolled out to take Darkwing's place? When the utopian shine begins to wear off, St. Canard will need her superhero once againÉ but is the Duck Knight ready to take on his most malevolent menace yet? Collecting the entire out-of-print and sold-out comic book series for the first time in one volume, this 400-page blockbuster is big enough to knock out a burglar! (Although we ask you leave crimefighting to the professionals!) Completely remastered and revised, this titanic tome also features an all new epilogue, making it without a doubt, "The Definitively Dangerous Edition!" He is the terror that flaps in the night! He is the creased binding in this over 400-page keepsake edition of crime – he is Darkwing Duck!

Looks at different types of trucks, how they are built, and how they are used.

The Allure of the Automobile presents some of the world's most brilliantly conceived cars from the 1930s to the mid-1960s, the Golden Age of car-making, including masterpieces by Bugatti, Duesenberg, Jaguar, Mercedes-Benz, Porsche, Ferrari, Alfa Romeo, and others. The exhibition and catalogue trace the evolution of the motorcar, examining the contrasts between European and American design within the context of Art Moderne and postwar Modernism. Created for the privileged few, these luxurious, custom-built automobiles embodied speed, style and elegance; they influence and were influenced by contemporary art, architecture, fashion and design. The artistry and craftsmanship shown during this era of auto-making is remarkable. Many of the featured automobiles are one-of-a-kind or were built largely by hand and in small numbers. This handsome volume includes beautiful full-page colour reproductions of each car accompanied by in-depth captions, plus illustrated essays on the evolution of the coach-built automobile from noted curators in the field. The Automobiles included: 1933 Pierce-Arrow Silver Arrow 1934 Packard LeBaron Runabout Speedster; 1935 Duesenberg JN Roadster, 1937 Bugatti Type 57S Atalante; 1937 Delage D8-120S; 1937 Dubonnet Hispano-Suiza H-6C "Xenia" ;1937 Mercedes-Benz 540K Special Roadster; 1938 Alfa Romeo 8C2900B Touring Berlinetta; 1938-1939 Porsche Type 64 (body shell); 1948 Tucker Model 48 Torpedo; 1953 Porsche 550; 1954 Dodge Firearrow III; 1955 Mercedes-Benz 300SLR "Uhlenhaut" Coupe; 1957 Cadillac Eldorado Brougham; 1957 Jaguar XK-SS Roadster; 1959 Chevrolet Corvette Sting Ray; 1961 Aston Martin DB4GT Zagato Coupe

British national cinema has produced an exceptional track record of innovative, creative and internationally recognised filmmakers, amongst them Alfred Hitchcock, Michael Powell and David Lean. This tradition continues today with the work of directors as diverse as Neil Jordan, Stephen Frears, Mike Leigh and Ken Loach. This concise, authoritative volume analyses critically the work of 100 British directors, from the innovators of the silent period to contemporary auteurs. An introduction places the individual entries in context and examines the role and status of the director within British film production. Balancing academic rigour with

accessibility, British Film Directors provides an indispensable reference source for film students at all levels, as well as for the general cinema enthusiast. Key features include: * A complete list of each director's British feature films. * Suggested further reading on each filmmaker. * A comprehensive career overview, including biographical information and an assessment of the director's current critical standing. * 10 B&W illustrations.

Follow-up to the original guide, this book covers backroads in northern Colorado. Many trails are near Denver, Boulder and Fort Collins. Other trails are near Steamboat Springs, Grand Junction, Overland, Nederland, Grand Lake, Winter Park, Central City, Rollinsville and Battlement Mesa. Most trails are north of Interstate 70. Includes 40 trails, 46 maps and over 140 photographs. Twenty-eight trails are suitable for stock SUBs.

Young readers are introduced to the many changes children experience in their early years. The simple text takes readers on a journey from the day a child is born through the first six years of life.

In *Curbing Traffic: The Human Case for Fewer Cars in Our Lives*, mobility experts Melissa and Chris Bruntlett chronicle their experience living in the Netherlands and the benefits that result from treating cars as visitors rather than owners of the road. They weave their personal story with research and interviews with experts and Delft locals to help readers share the experience of living in a city designed for people. Their insights will help decision makers and advocates to better understand and communicate the human impacts of low-car cities: lower anxiety and stress, increased independence, social autonomy, inclusion, and improved mental and physical wellbeing. *Curbing Traffic* provides relatable, emotional, and personal reasons why it matters and inspiration for exporting the low-car city.

Learn the story of sports cars.

365 Sports Cars You Must Drive puts you in the driver's seat of a century's worth of sports car legends (and a few rather less legendary), each presented with a fun and informative profile and fact-and-spec box. It's the ultimate gearhead's bucket list and poses the challenge: How many have you driven? Whoever coined the phrase "getting there is half the fun" must have owned a sports car. And the wag who suggested that "it's the journey not the destination"? Probably driving a Lotus or MG at the time. From towering icons like Ferrari, Lamborghini, Porsche, and Corvette to everyman sportsters from Triumph, MG, Sunbeam, and Miata to oddballs like Crosley, Sabra, and DB, sports cars inspire passion and strong opinions as few other vehicles on the road can. In one beautiful book, long-time *Road & Truck?* magazine chief photographer John Lamm, along with other top motoring contributors, gives the reader illustrated profiles of every sports car you've ever dreamed of driving! Now, imagine if you could drive a different sports car—any sports car—every single day for a year. Which would you choose?

Art of the Hot Rod is a feast for the eyes--a gallery of gorgeous hot rods, the best you'll see from the world's top hot rod builders! A hot rod is art on wheels, and this book contains a whole gallery of the best you'll ever see. In this exclusive collector's edition of *Art of the Hot Rod* you'll find a jaw-dropping array of beautiful hot rod photos, plus special gatefolds, updated text, and exclusive frameable photographic prints. *Art of the Hot Rod: Collector's Edition* celebrates the uniquely American marriage of mechanical know-how and an inspired sense of style and design. Built from the ground up, pieced together from salvaged or hand-built parts, rebuilt with classic looks and modern technology--these automotive works of art are as powerful on the page as they are on the street. The book profiles top builders such as Pete Chapouris, Roy Brizio, Vern Tardel, Troy Trepanier, and fifteen others and features studio portraits of their most outstanding custom creations. Through the stunning portraiture of master photographer Peter Harholdt, *Art of the Hot Rod* captures these magnificent vehicles as they've never been seen before. In addition to full-color photography and updated text, this special collector's edition features two gatefolds with new photography and four garage art photo prints.

Imagine a bus system that is fast, frequent, and reliable--what would that change about your city? Buses can and should be the cornerstone of urban transportation. They offer affordable mobility and can connect citizens with every aspect of their lives. But in the US, they have long been an afterthought in budgeting and planning. Transit expert Steven Higashide uses real-world stories of reform to show us what a successful bus system looks like. Higashide explains how to marshal the public in support of better buses and argues that better bus systems will create better cities for all citizens. With a compelling narrative and actionable steps, *Better Buses, Better Cities* describes how decision-makers, philanthropists, activists, and public agency leaders can work together to make the bus a win in any city.

The world is rediscovering the bicycle as a multi-pronged solution to acute, 21st-century problems, including affordability, obesity, congestion, climate change, inequity, and social isolation. The Netherlands has built an accessible cycling culture that cities around the world can learn from. Chris and Melissa Bruntlett share the incredible success of the Netherlands through engaging interviews with local experts and stories of their own delightful experiences riding in five Dutch cities. *Building the Cycling City* examines the triumphs and challenges of the Dutch while also presenting stories of North American cities already implementing lessons from across the Atlantic. Discover how Dutch cities inspired Atlanta to look at its transit-bike connection in a new way and showed Seattle how to teach its residents to realize the freedom of biking, along with other encouraging examples.

Hodaka motorcycles were some of the most creatively marketed and designed motorcycles in America. The bike of choice for the hip young racer, the street-savvy urbanite, or the 14-year-old boy's favorite poster, these machines had colorful logos, creative advertising and terrific names. The Combat Wombat, Road Toad, Dirt Squirt and the fantastic Super Rat are just a few of the models produced by Hodaka. More than 15 years in the making, this exhaustively-researched tome contains all the details about the machines as well as a treasure trove of photographs, advertisements, and graphics. Written by Ken Smith, the editor of *VMX Magazine*, and created with the help of Paul Stannard of *Strictly Hodaka* and many of the people who designed and sold Hodakas back in the day, this book is a captivating, colorful look at one of the wildest, most popular motorcycles of the 1960s and 1970s.

A compelling call to apply Buckminster Fuller's creative problem-solving to present-day problems A self-professed "comprehensive anticipatory design scientist," the inventor Buckminster Fuller (1895-1983) was undoubtedly a visionary. Fuller's creations often bordered on the realm of science fiction, ranging from the freestanding geodesic dome to the three-wheel Dymaxion car to a bathroom requiring neither plumbing nor sewage. Yet in spite of his brilliant mind and life-long devotion to serving mankind, Fuller's expansive ideas were often dismissed, and have faded from public memory since his death. *You Belong to the Universe* documents Fuller's six-decade quest to "make the world work for one hundred percent of humanity." Critic and experimental philosopher Jonathon Keats sets out to revive Fuller's unconventional practice of comprehensive anticipatory design, placing Fuller's philosophy in a modern context and dispelling much of the mythology surrounding Fuller's life. Keats argues that Fuller's life and ideas, namely doing "the most with the least," are now more relevant than ever as humanity struggles to meet the demands of an exploding world population with finite resources. Delving deeply into Buckminster Fuller's colorful world, Keats applies Fuller's most important concepts to present-day issues, arguing that his ideas are now not only feasible, but necessary. From transportation to climate change, urban design to education, *You Belong to the Universe* demonstrates that Fuller's holistic problem-solving techniques may be the only means of addressing some of the world's most pressing issues. Keats's timely book challenges each of us to become comprehensive anticipatory design scientists, providing the necessary tools for continuing Fuller's legacy of improving the world.

After leaping from a plane, a skydiver opens a pair of carbon fiber wings and shoots through the sky at 200 miles per hour, in perfect control.

Down on the ground, an Olympic pole vaulter soars to a world record on a state-of-the-art pole. A runner, born without feet, runs on space-age artificial limbs at speeds almost as fast as Olympic winners. Meanwhile, a swimmer slices through the water in a bodysuit modeled after sharkskin and shaves vital seconds off her time. How have these athletes managed such amazing feats? The answer is sports technology. Learn how science helps athletes stay safer, perform better, and have more fun. Book jacket.

Bicycling advocates envision a future in which bikes are a widespread daily form of transportation, but this reality is still far away. Will we ever witness a true "bike boom" in cities? What can we learn from past successes and failures to make cycling safer, easier, and more accessible? In *Bike Boom*, journalist Carlton Reid uses history to shine a spotlight on the present and demonstrates how bicycling has the potential to grow even further, if the right measures are put in place by the politicians and planners of today and tomorrow. He explores the benefits and challenges of cycling, the roles of infrastructure and advocacy, and what we can learn from cities that have successfully supported and encouraged bike booms. In this entertaining and thought-provoking book, Reid sets out to discover what we can learn from the history of bike "booms."

Using a "principles" and "practice" approach, it answers the need for an authoritative primer on planning for cycling as a "green mode". Discusses theoretical issues, covering factors that encourage or inhibit urban cycling; the history of special provision; the role of highway planning; environmental, engineering, social and legal aspects. Illustrated with actual examples from the UK, US and Europe.

In this primer accompanying Adam Pendleton's MoMA show, the artist behind "Black Dada" fuses musical counterpoint with the aesthetics of protest Adam Pendleton draws on visual culture and historical archives to explore the ways in which context influences meaning. Referencing a broad range of artistic and cultural currents--including Dada, Minimalism and Black Power--Pendleton reconfigures words, forms and images to provoke critical questioning. Published to accompany Pendleton's installation at the Museum of Modern Art, this reader serves as a primer and handbook to the exhibition and features a number of photocopied textual and visual sources, many of which directly relate to the concept, content and programming of the exhibition. The project questions the notion of the museum as repository and addresses the influence that mass movements, including those of the last decade such as Black Lives Matter and Occupy, could have on the exhibition as form. Drawing on the work of figures as disparate as Glenn Gould, Michael Hardt and Ruby Sales, *Who Is Queen?* seeks to explore the nexus of abstraction and politics. Adam Pendleton (born 1984) lives and works in New York. His visually distinctive and conceptually rigorous paintings, drawings and other works deploy linguistic, political and historical material in unlikely forms and configurations.

Discusses the history, types, and uses of motorcycles, and explores the different kinds of racing motorcycles and motorcycle races.

This pickup truck coloring book is filled with heavy duty vehicles. Each trucking coloring page is single sided to prevent bleed through. This pick up truck coloring book is the ideal gift for the artist in your life! Use your imagination to bring these utility work truck colouring pages to life.

A collection of personal perspectives on Porsche, accompanies the first automotive design exhibition at the North Carolina Museum of Art.

Sport Bikes Crabtree Publishing Company

Introduces young readers to the world of motorcycles, reveals how many types there are, how they work, and the jobs, competitions, and events that feature them.

Examines the life of the first man to discover a sea route from Europe to India, focusing on life on the expedition, as well as a looking at the social and political environment at the time.

Based around a core of design activities, this book presents the design function as a systematic and disciplined process, the objective of which is to create innovative products that satisfy customer needs. The author is widely regarded as a foremost authority on an integrated approach to product engineering. Highly suitable for all students in engineering, industrial design, architecture and computer science, as well as for the professional engineer and designer who will find in it a very useful framework to assist their design practice.

A new, comprehensive guide to motoring and transport museums offering a fresh conversation on their role and the portrayal of our motoring history. Written by a long-established motoring writer with wide experience of driving and the fettling of old cars all over the world. This new motor museum companion includes: British motoring and transport museums guide via descriptions and photographs. 90 British museums described. Comprehensive world motor museum listing: over 350 global museums cited. Out-takes from visits to selected overseas museums. Provides a glossary of old-car/motorcycle terms and types to assist the museum visitor and old car enthusiast. Discusses the museum culture and its new age. Visits to many museums by the author were self-funded: he paid his own way.
