This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Published to coincide with Maserati's one-hundredth anniversary, this lavishly produced volume celebrates the glamour and excellence of Italian automotive style and design. Maserati traces the history of the legendary Italian luxury sports car company that was founded in 1914 by Alfieri Maserati and his three brothers, Bindo, Ernesto, and Ettore, and which went on to back-to-back wins at the Indianapolis 500—the only Italian car manufacturer ever to do so. The book profiles the twelve most iconic Maserati vehicles, including the best-selling Ghibli as well as the Quattroporte, GranTurismo, Bora, Berlinetta, and—for the first time ever published—the Alfieri, which has been described as the manifesto of the future of Maserati design. The book features stunningly precise photography that highlights the exquisite lines and lavish details of the vehicles, along with never before published images and technical and engineering highlights. Also included are special contributions by Lorenzo Ramaciotti, Giovanni Soldini, Franca Sozzani, Gillo Zegna, and Mario Botta.

Offering empirical examples from each region, this book examines how economic and cultural contexts influence talent management. *Talent Management in Global Organizations* discusses successful cases in different cross-cultural settings, and aims to inspire companies around the world to develop and implement talent management practices effectively.

This book presents essays exploring the ways in which popular culture reflects and engenders ongoing changes in Japan–Korea relations. Through a broad temporal coverage from the colonial period to the contemporary, the book's chapters analyse the often contradictory roles that popular culture has played in either promoting or impeding nationalisms, regional conflict and reconciliations between Japan and Korea. Its contributors link several key areas of interest in East Asian Studies, including conflicts over historical memories and cultural production, grassroots challenges to state ideology, and the consequences of digital technology in Japan and South Korea. Taking recent discourse on Japan and South Korea as popular cultural superpowers further, this book expands its focus from mainstream entertainment media to the lived experience of daily life, in which sentiments and perceptions of the "popular" are formed. It will be useful to students and scholars of Japanese and Korean studies, as well as film studies, media studies and cultural studies more widely.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Written with Charley's trademark enthusiasm and humour, *Extreme Frontiers* is fast-paced, hugely entertaining and packed with adventure (and rather a lot of mosquitoes).

The research is indisputable: Students are less disruptive and do better academically in schools that cultivate the internal motivation of students. In *Activating the Desire to Learn*, veteran educator Bob Sullo shows how to apply lessons from the research on motivation in the classroom. According to the author, we are all driven to fulfill five essential needs: to connect, to be competent, to make choices, to have fun, and to be safe. Studies show that when these needs are met in schools, good behavior and high achievement tend naturally to ensue. Written as a series of candid dialogues between the author and K-12 students, teachers, counselors, and administrators, *Activating the Desire to Learn* covers everything you need to know to change the dynamics of learning in your classroom or school: * A comprehensive overview of the research on internal motivation; * Case studies of strategies for activating internal motivation at the elementary, middle, and high school levels; * Suggestions on how to assess degrees of student motivation; and * Guidelines for integrating the principles of internal motivation with standards-based instruction. Motivating students is not the issue--the hunger to learn is ever-present. Yet schools continue to insist on the traditional reward-punishment model, to the detriment of student achievement. Clearly it's time for change. This engaging and thought-provoking book will help you create a culture of achievement by building on the inherent drive to succeed that students bring to the classroom every day.

A resolution to the vexed problem whether a troubadour's love is erotic or spiritual is offered by Paolo Cherchi through a new reading of Andreas Capellanus' De Amore (written around 1186-1196). He suggests that Andreas, using a rhetorical strategy that creates ambiguity, condemns courtly love because its claim that passion generates virtue is untenable and deceitful. Although Andreas grasped the core of the courtly love 'system,' namely, the relation between passion and ethics, he failed to consider the notion of mezura, that courtly virtue through which troubadours transformed nature into culture, and erotic passion into social discourse. Cherchi offers an innovative interpretation and a close reading of selected poems. He traces the history of Provençal lyric poetry, highlighting some of the significant personalities and movements.

We stand at the cusp of a mobility revolution unlike anything we have seen since the days of Gottlieb Daimler and Henry Ford, 130 years ago. Three massively significant and converging automotive trends – electrification, self-driving technology and car-sharing – will together transform the way we live, work, and move about in our increasingly urban environment. This book coins the term 'Mobility Revolution' and is a summary of the 'three zeroes' that are already defining the future for the automobile industry: Zero Emissions, Zero Accidents and Zero Ownership. The impact will go beyond the automotive industry and its suppliers – urban infrastructure, construction, logistics – and even local cafés will need to think and operate differently. Based on countless interviews, the book is highly current and thoroughly researched, whilst also fun to read. It is an eye-opener to the new world that awaits us as the Mobility Revolution unfolds. The Mobility Revolution is a must-read for anyone interested in the future of the automobile industry, our cities, and the way we live.
