Increase your awareness and understanding of a holistic view of mental health care with this book for nurses and other health care professionals. Each chapter covers a specific psychological or psychosocial problem as well as the most current interventions and treatments. This edition features full-color illustrations, updated drug information, and a chapter on complementary and alternative therapies, in addition to more case studies to help you apply the content to real life. This solid background in mental health is just what you need to work comfortably with clients who exhibit both effective and maladaptive behaviors. Multidisciplinary care plans for sample clients show how members of the health care team work together. Client-specific case studies highlight particular mental disorders and help you apply chapter content to real-life situations. "Think About" boxes throughout the text strengthen your critical-thinking skills. UNIQUE "Drug Alert" boxes highlight what you need to know about a wide range of specific psychotherapeutic medications. UNIQUE Standard LPN full-color design and "Content Threads" point out key information and special features in each chapter, consistent with the format of other books in the LPN Threads series. Appendixes give you easy access to mental health care standards, DSM-IV TR diagnoses, and assessment tools that are essential for providing quality care. FREE workbook at the end of the book includes crossword puzzles, multiple-choice questions, and other exercises to boost your comprehension of the material. FULL-COLOR illustrations make the text even more visually appealing and user-friendly. Additional case studies help you apply chapter content to more real-life scenarios such as chronic illness and substance abuse with accompanying questions to test your critical-thinking skills. Chapter on complementary and alternative therapies increases your awareness of the benefits and risks of alternative therapies such as ayurveda, herbal supplements, massage, meditation, acupuncture, and telemedicine. Forensic nursing content familiarizes you with the prevention and treatment of violence-based disorders and shows you how to obtain and document evidence for legal purposes. NEW antianxiety and antimanic drug information keeps you up-to-date on the latest psychotropic medications.

Within an expanding field of study in both undergraduate and graduate nursing curricula, *Caring for the Vulnerable* explores vulnerability from the perspective of individuals, groups, communities and populations, and addresses the implication of that vulnerability for nurses, nursing, and nursing care. This new edition presents a basic structure for caring for the vulnerable, and forms a theoretical perspective on caring for doing so within a cultural context, with the ultimate goal of providing culturally competent care. Theoretical and research chapters advance to chapters offering learning experiences for nursing students and practitioners. As nurses are the crucial link between those who are vulnerable, and those with access to solutions, it provides ideas for how nurses might advocate for the vulnerable on a policy level. Written specifically for nurses, by nurses, *Caring for the Vulnerable* is a timely and necessary response to the culturally diverse vulnerable populations for whom nurses must provide appropriate and precise care.

Part of the popular LPN Threads series, this comprehensive text includes in-depth discussions of fundamental concepts and skills, plus medical-surgical content to help you provide safe and effective care in the fast-paced healthcare environment. Easy-to-read content, an enhanced focus on preparing for the NCLEX® Examination, and a wealth of tips and study tools make *Foundations and Adult Health Nursing, 6th Edition*, your must-have text!

Mosby's *Comprehensive Review for the Canadian RN Exam, Revised First Edition* provides a thorough review of nursing principles and practices to help you prepare for the Canadian Registered Nurse Examination™ (CRNE). In addition to offering an overview of essential material in each major clinical area, with references to established sources, the book features hundreds of end-of-chapter questions, followed by answers and rationales. Two practice exams with over 250 practice questions are also accompanied by answers and rationales. This is an indispensable resource for all nursing students preparing for the Canadian Registered Nurse Examination™! Introductory chapters describing the CRNE and tips for answering questions provide valuable guidelines for mastering multiple choice questions, helping to reduce test anxiety and improve performance. Each chapter includes practice questions that are representative of those found on the CRNE, and reflect the framework of nursing practice in Canada. The text features a diversity of practice settings and client situations, mirroring the diversity of nursing contexts in Canada. Questions have been authored by nursing experts with over 30 years of combined experience teaching nursing and preparing students to pass the CRNE. Appendixes contain a full list of the CRNE Exam competencies, medical terminology, abbreviations, common laboratory and diagnostic tests, and mathematical formulae. Reflects the current CRNE blueprint; updated to conform to the CRNE 2010-2015 competencies and format. Classification legend with each Answer and Rationale indicates the Competency and Taxonomy being tested for each question.

Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

Covers what nurses need to consider, know, and plan if they want to volunteer. Covers the entire volunteering process from choosing an organization to settling into the volunteer experience to re-entering society after the experience. Filled with practical tips and advice about volunteering, whether a novice or more experienced volunteer. Contains information for students and faculty members who are interested in volunteering, particularly abroad.

Within an expanding field of study in both undergraduate and graduate nursing curricula, this Third Edition explores vulnerability from the perspective of individuals, groups, communities, and populations while addressing how vulnerability affects nurses, nursing, and nursing care. This new edition presents a basic structure for caring for the vulnerable with the ultimate goal of providing culturally competent care. Theoretical and research chapters progress towards others offering meaningful learning experiences for both nursing students and practitioners. Further, since nurses are the crucial link between those who are vulnerable and those with access to solutions, this text provides ideas for how nurses might advocate for the vulnerable on a policy level. Written specifically for nurses by nurses, this Third Edition is a timely and necessary response to the culturally diverse, vulnerable populations for whom nurses must provide appropriate and precise care.

With comprehensive coverage of maternal, newborn, and women's health nursing, Maternity & Women's Health Care, 10th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. It's the #1 maternity book in the market -- and now respected authors Dr. Deitra Leonard Lowdermilk, Dr. Shannon E. Perry, Kitty Cashion, and Kathryn R. Alden have improved readability and provided a more focused approach! Not only does this text emphasize childbearing issues and concerns, including care of the newborn, it addresses wellness promotion and management of common women's health problems. In describing the continuum of care, it integrates the importance of understanding family, culture, and community-based care. New to this edition is the most current information on care of the late preterm infant

and the 2008 updated fetal monitoring standards from the National Institute of Child Health and Human Development. A logical organization builds understanding by presenting wellness content first, then complications. Critical Reasoning exercises offer real-life situations in which you can develop analytical skills and apply their knowledge. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be used for quick reference in critical situations. Medication Guide boxes provide an important reference for common drugs and their interactions. Cultural Considerations boxes stress the importance of considering the beliefs and health practices of patients from various cultures when providing care. Family content emphasizes the importance of including family in the continuum of care. Nursing Care Plans include specific guidelines and rationales for interventions for delivering effective nursing care. Community Activity exercises introduce activities and nursing care in a variety of local settings. Student resources on the companion Evolve website include assessment and childbirth videos, animations, case studies, critical thinking exercises with answers, nursing skills, anatomy reviews, a care plan constructor, review questions, an audio glossary, and more.

With just the right level of information to equip you to effectively care for adults and older adults, Linton's Introduction to Medical-Surgical Nursing, 5th Edition is the leading LPN/LVN text in its field. Covering both med-surg and psychiatric mental health conditions and disorders, it addresses your role in a variety of care settings, emphasizes culturally competent care and holistic nursing, and thoroughly covers all relevant NCLEX-PN Test Plan content. Abundant real-life case studies clearly show how to apply what you've learned to clinical practice. Features separate chapters on common, high-profile disorders (including hypertension, diabetes, and shock), providing an in-depth understanding for patient care. Offers foundational units on basic concepts related to the health care system, care settings, the nursing process, leadership, nutrition, the older adult, growth and nutrition, legal/ethical considerations, evidence-based nursing care, and many more essential topics, avoiding repetition later in the text. Includes a separate, comprehensive unit on the older adult and related disorders — no other LPN/LVN med-surg text has as much coverage of this primary patient group. Includes a separate, comprehensive unit on psychosocial responses to illness, psychiatric disorders, and substance abuse — eliminating the need for a separate psychiatric mental health nursing text. Emphasizes content related to the NCLEX-PN Test Plan, including health promotion, nutrition, legal/ethical issues, HIPAA, and prevention of medication/medical errors. Offers in-depth pharmacology coverage: the Pharmacology Tutorial covers drug classifications, how drugs work, and nursing responsibilities; Pharmacology Capsules boxes provide medication information, precautions for use, interactions, and side/adverse effects; and Pharmacology and Medications tables in body systems chapters include classification, use/action, side/adverse effects, and nursing interventions — all with the goal of reducing medication errors on the job and equipping you to pass the NCLEX exam. Assists with assignment and supervision, helping you assign tasks to nurse assistants, patient care techs, and unlicensed assistive personnel, and making sure you understand the difference between delegation, management, supervision, and assignment of tasks on the health care team. Features Diagnostic Tests and Procedures tables for a quick reference to MRI, CT, Doppler flow, lumbar puncture tests for neurologic disorders, and much more. Highlights timely information with Health Promotion boxes, Cultural Considerations boxes, Nutrition Considerations boxes, and Complementary and Alternative Therapies boxes. Provides bulleted lists of nursing instructions for Patient Teaching Plans, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Provides consistent Nursing Care Plans that reinforce the nursing process and focus on critical thinking, and Put on Your Thinking Cap Critical Thinking boxes encourage you to pause and consider the practical implications of what you have just read.

A fully-revised new edition of Australia and New Zealand's most highly esteemed medical-surgical nursing text. Coverage of nursing education brings you up to date on a wide range of topics, from the emergence of interactive learning strategies and e-learning technology, to the effects of the nursing shortage and our aging nursing population. Updated information on paying for health care in America, the Patient Protection and Affordable Care Act, and statistics on health insurance coverage in the United States helps you understand the history and reasons behind healthcare financing reform, the costs of healthcare, and current types of managed care plans. A new section on health information technology familiarizes you with how Electronic Health Records (EHRs), point-of-care technologies, and consumer health information could potentially impact the future of health care. Updated chapter on health policy and politics explores the effect of governmental roles, structures, and actions on health care policy and how you can get involved in political advocacy at the local, state, and federal level to help shape the U.S. health care system. The latest emergency preparedness and response guidelines from the Federal Emergency Management Agency (FEMA), the Centers for Disease Control (CDC), and the World Health Organization (WHO) prepare you for responding to natural and man-made disasters.

With concise, focused coverage of community health nursing, Foundations of Nursing in the Community: Community-Oriented Practice, 4th Edition provides essential information for community practice — from nursing roles and care settings to vulnerable population groups. The book uses a practical, community-oriented approach and places an emphasis on health promotion and disease prevention. Practical application of concepts is highlighted throughout the text in case studies, critical thinking activities, QSEN competencies, and Healthy People 2020 objectives. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, to reinforce the concept of prevention as it pertains to community and public health care. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community. Case Studies provide client scenarios within the community/public health setting to help you develop assessment and critical thinking skills. What Would You Do? boxes present problem-solving challenges that encourage both independent and collaborative thinking required in community settings. How To boxes offer specific instructions on nursing interventions. NEW! QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. NEW! Feature box on Linking Content to Practice highlights how chapter content is applied in the role of public/community health nursing. NEW! Healthy People 2020 objectives in every chapter address the health priorities and emerging health issues expected in the next decade.

Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. Community Health Nursing: Caring for the Public's Health, Second Edition reflects this response and is representative of what communities signify in the United States--a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both community-based and community-focused, reflecting the current dynamics of the health care system. The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering Family health, ethics, mental health, and pediatric nursing have all been significantly revised and updated.

Social Work Practice in Health Care by Karen M. Allen and William J. Spitzer is a pragmatic and comprehensive book that helps readers develop the knowledge, skills, and values necessary for effective health care social work practice, as well as an understanding of the technological, social, political, ethical, and financial factors affecting contemporary patient care. Packed with case studies and exercises, the book emphasizes the importance of being attentive to both patient and organizational needs, covers emerging trends in health care policy and delivery, provides extensive discussion of the Patient Protection and Affordable Care Act, and addresses social work practice across the continuum of care.

Promoting safe and effective nursing care, Nursing Outcomes Classification (NOC), 6th Edition standardizes the terminology and criteria needed to measure and evaluate outcomes that result from nursing interventions. Over 540 research-based nursing outcome labels — including 50 that are NEW to this edition — help to standardize expected patient outcomes. Specific indicators make it easier to evaluate and rate the patient in relation to outcome achievement. Written by an expert author team led by Sue Moorhead, this book is ideal for practicing nurses, students, educators, researchers, and administrators seeking to improve cost containment and patient outcomes. 540 research-based nursing outcome labels promote standardization of expected patient outcomes. Definitions, lists of indicators, publication facts lines, and references provide all of the information you need to understand outcomes. NEW! Approximately 50 new outcome labels allow you to better define patient outcomes that are responsive to nursing care.

Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment. Covering maternal and neonatal, pediatric, geriatric, mental health, and community nursing, Foundations of Nursing, 6th Edition, includes all of the essential LPN/LVN content you need. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and electrolytes tutorial. The consistent, logical framework of the nursing process connects specific disorders to patient care. A mathematics review chapter provides a complete review of basic arithmetic skills and practice in drug dosage calculation to ensure safe medication administration. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses for specific disorders paired with the appropriate nursing interventions. More than 100 skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. Coordinated Care boxes emphasize parameters for prioritizing tasks, as well as assigning tasks to and supervising unlicensed assistive personnel. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations boxes discuss the issues facing patients and caregivers in the home health care setting. Health Promotion boxes provide key information on staying healthy and preventing disease, with tips on wellness from Healthy People 2010. Cultural Considerations boxes discuss how to address the health needs of a culturally diverse patient population when planning care. Enhanced focus on the NCLEX® Examination offers end-of-chapter Get Ready for the NCLEX Examination! sections with key points for self-guided study and remediation and an extensive set of review questions for thorough self-assessment. Additional review questions on Evolve provide instant feedback with correct answer and rationale for even more test-taking practice. Evidence-Based Practice boxes summarize the latest research findings and highlight how they apply to LPN/LVN practice. Updated, vibrant full-color design highlights key information and enhances your understanding of important concepts.

Population-Based Public Health Clinical Manual: The Henry Street Model for Nurses has proven to be one of the most important public health texts for students and practitioners alike. Focused on developing a competent public health nursing practice in diverse settings, the core text builds on the Henry Street Consortium's framework of 12 competences for population-based, entry-level public health nursing. This full-color, newly designed third edition has completely revised and updated coverage, including:

- 17 Sustainable Development Goals (SDGs) that provide a framework for public health nursing practice
- A new competency on utilizing principles and science of environmental health to promote safe and sustainable environments for individuals, families, systems, and communities

Client Education: Theory and Practice focuses on health education and the role of health care providers, especially nurses, in working with clients such as individuals, families and groups, in health care institutions and community health settings. It covers the thorough assessment of clients in preparation for health education and examines the unique characteristics of children, adults, and culturally diverse learners. Client Education: Theory and Practice details how to prepare a teaching plan, write learning objectives, and select teaching strategies and instructional materials with ample examples. Further, a comprehensive examination of formative and summative evaluation completes the book. Each chapter includes a sample client-based teaching plan that incorporates the theory presented to help students understand and apply their knowledge.
