Scanimation is a state-of-the-art animation process that creates the illusion of movement in each picture. In terms kids can relate to, it's like a video without a screen. ABC Animals presents the alphabet as it's never been seen before. In a romping, stomping journey from A to Z, watch the Alligator snap, the Bats swooping, the Camel trot. There's L for the Lion proudly prowling along, and M for the Mouse scurrying inside his wheel. And it all culminates in the largest Scanimation image yet: Z, for Zoo, where all the animals gather to play. Each page is a marvel that brings animals, along with one shining star, to life with art that literally moves. It's impossible not to flip the page, and flip it again, and again, and again.
