Consistently praised as the best volume on classic elements of web site design, *Web Style Guide* has sold many thousands of copies and has been published around the world. Risk management and contingency planning has really come to the fore since the first edition of this book was originally published. Computer failure, fire, fraud, robbery, accident, environmental damage, new regulations - business is constantly under threat. But how do you determine which are the most important dangers for your business? What can you do to lessen the chances of their happening - and minimize the impact if they do happen? In this comprehensive volume Kit Sadgrove shows how you can identify - and control - the relevant threats and ensure that your company will survive. He begins by asking 'What is risk?', 'How do we assess it?' and 'How can it be managed?' He goes on to examine in detail the key danger areas including finance, product quality, health and safety, security and the environment. With case studies, self-assessment exercises and checklists, each chapter looks systematically at what is involved and enables you to draw up action plans that could, for example, provide a defence in law or reduce your insurance premium. The new edition reflects the changes

“Has there ever been a better reason to shop?” asks an ad for the Product RED American Express card, telling members who use the card that buying “cappuccinos or cashmere” will help to fight AIDS in Africa. Cofounded in 2006 by the rock star Bono, Product RED has been a particularly successful example of a new trend in celebrity-driven international aid and development, one explicitly linked to commerce, not philanthropy. In Brand Aid, Lisa Ann Richey and Stefano Ponte offer a deeply informed and stinging critique of “compassionate consumption.” Campaigns like Product RED and its precursors, such as Lance Armstrong’s Livestrong and the pink-ribbon project in support of breast cancer research, advance the expansion of consumption far more than they meet the needs of the people they ostensibly serve. At the same time, such campaigns sell both the suffering of Africans with AIDS (in the case of Product RED) and the power of the average consumer to ameliorate it through familiar and highly effective media representations. Using Product RED as its focal point, this book explores how corporations like American Express, Armani, Gap, and Hallmark

promote compassionate consumption to improve their ethical profile and value without significantly altering their business model, protecting themselves from the threat to their bottom lines posed by a genuinely engaged consumer activism. Coupled with the phenomenon of celebrity activism and expertise as embodied by Bono, Richey and Ponte argue that this “causumerism” represents a deeply troubling shift in relief efforts, effectively delinking the relationship between capitalist production and global poverty.
