

Stargate Atlantis Halcyon

The Starship Titan continues on her outward voyage of discovery. Ranging farther and farther from Federation space, Captain William Riker and the crew look forward to living Starfleet's mission: seeking out new life, discovering new civilizations. Striking a "sandbank" -- a spatial distortion -- the Titan is knocked out of warp, her crew shaken up but uninjured. Titan has stumbled across a battlefield, and floating in it, shattered and in pieces, are the remains of a ship. Searching for survivors, they discover the ship never had a crew. The away team removes the computer core, looking for answers. Once the device is restored, it becomes clear this is not just a computer, but a thinking, reasoning artificial intelligence. It identifies itself as SecondGen White-Blue, and it comes from a civilization composed entirely of sentient computers. Eons ago these artificial intelligences were charged to be the first line of defense against The Null -- a destructive force so all-consuming that generation upon generation have waged unending war trying to find a way to beat back this terror. Captain Riker offers to assist them, but years of war have left the AIs distrustful and suspicious, especially of organics. The tide of the battle is turning, and The Null is winning. Set free, it will destroy everything in this system and then, unchecked, spread its mindless destruction into the heart of the Federation.

An extraordinary biography. A gallery of astonishing work. The legacy of a madman. Philadelphia, the late 1870s. A city of gas lamps, cobblestone streets, and horse-drawn carriages—and home to the controversial surgeon Dr. Spencer Black. The son of a grave robber, young Dr. Black studies at Philadelphia's esteemed Academy of Medicine, where he develops an unconventional hypothesis: What if the world's most celebrated mythological beasts—mermaids, minotaurs, and satyrs—were in fact the evolutionary ancestors of humankind? The Resurrectionist offers two extraordinary books in one. The first is a fictional biography of Dr. Spencer Black, from a childhood spent exhuming corpses through his medical training, his travels with carnivals, and the mysterious disappearance at the end of his life. The second book is Black's magnum opus: The Codex Extinct Animalia, a Gray's Anatomy for mythological beasts—dragons, centaurs, Pegasus, Cerberus—all rendered in meticulously detailed anatomical illustrations. You need only look at these images to realize they are the work of a madman. The Resurrectionist tells his story.
