The LNER Class A3 Pacific locomotive No. 4472 'Flying Scotsman' is one of the world's most iconic steam engines. It was built in 1923 for the London and North Eastern Railway at Doncaster Works to a design by Nigel Gresley. Taking its name from the London to Edinburgh non-stop service on which it was employed, 'Flying Scotsman' worked many long-distance express trains in a career in which it covered more than 2,000,000 miles (3,200,000 km). This fascinating pocket-book tells the story of this distinguished locomotive through authentic period literature including LNER and BR service manuals, giving an insight into her construction and operation from the height of her fame in the 1930s through to the end of her BR service in 1963.

This brutally gripping novel about the African-American Great Migration follows the three Moss brothers, who flee the rural South to work in industries up North. Delivered by day into the searing inferno of the steel mills, by night they

encounter a world of surreal devastation, crowded with dogfighters, whores, cripples, strikers, and scabs. Keenly sensitive to character, prophetic in its depiction of environmental degradation and globalized labor, Attaway's novel is an unprecedented confrontation with the realities of American life, offering an apocalyptic vision of the melting pot not as an icon of hope but as an instrument of destruction. *Blood on the Forge* was first published in 1941, when it attracted the admiring attention of Richard Wright and Ralph Ellison. It is an indispensable account of a major turning point in black history, as well as a triumph of individual style, charged with the concentrated power and poignance of the blues.

During much of his early career, from 1944 through to the early 1960s, Richard Hardy took hundreds of pictures of life on the railways and the men he knew and worked with on a daily basis, using his trusty Brownie 620 box camera. These unique behind the scenes images form a fascinating and hugely evocative portrayal of Britain at the height of the era of steam, during the time of the 'Big Four', and after 1947 when the sprawling nationalised network known as British Railways came of age. The second edition contains many new unseen photos which capture the railways in wartime, providing a valuable social record of the nation at war. In addition there is a sequence of rare photographs of French engines, railways and railwaymen, offering a superb contrast to the British rail network (it quickly becomes evident that the British rail system ran on tea, whereas the French system ran on wine). Great characters are the unifying theme of the pictures, and they include famous figures associated with the railways, such as the poet John Betjeman. This wonderfully illustrated book sets

Richard's personal photographs and text alongside a carefully collated selection of ephemera, artworks and photographs drawn from the National Railway Museum in York. Collectively these images and artefacts tell the stories of the great brotherhood of railwaymen, brilliantly evoking the speed, heat and dust of the footplate.

The Lung Circulation, Volume 2: Pathologic Physiology and Therapy of Diseases considers the reactions of various cardiovascular and bronchopulmonary drugs for certain lung-related diseases. This book is organized into three sections encompassing 15 chapters that also cover the etiology of acute cardiopulmonary diseases and chronic pulmonary hypertension. The first section reviews the benefits of five pulmonary treatment options, including musculotropic vasodilators and vasoconstrictors; general anesthetics and adjuvants; antitussives, expectorants, and antiallergens; Digitalis, glycosides, and quinidine; and medical and surgical procedures. The second section describes the pathologic physiology and pathogenesis of some acute cardiopulmonary diseases, such as acute injuries, systemic shock, acute pulmonary edema, pulmonary embolism, and other localized pulmonary diseases. The third section surveys numerous studies on the chronic pulmonary hypertension. This book is directed toward pulmonologists.

This fascinating pocket book draws on numerous primary sources from the early days of the rail network through to the Big Four, British Railways and beyond to present a unique guide to the knowledge and skills required for locomotive drivers, engineers and firemen. Beginning with an introduction to steam from about 1890, the book outlines the rules of the rail network, locomotive management from driving to servicing, a guide to signalling and operations, and rules of the running shed along with a wealth of practical advice and conditions of service for the men on the footplate. The Railwayman's Pocket Book offers a unique insight into the age of steam that will appeal to all railway enthusiasts.

**NATIONAL BESTSELLER** • The gripping story of Elizabeth Holmes and Theranos—one of the biggest corporate frauds in history—a tale of ambition and hubris set amid the bold promises of Silicon Valley, rigorously reported by the prize-winning journalist. With a new Afterword. “Chilling ... Reads like a thriller ... Carreyrou tells [the Theranos story] virtually to perfection.” —The New York Times Book Review In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the next Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the medical industry with its breakthrough device, which performed the whole range of laboratory tests from a single drop of blood. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.5 billion. There was just one problem: The technology didn’t work. Erroneous results put patients in danger, leading to misdiagnoses and unnecessary treatments. All the while, Holmes and her partner, Sunny Balwani, worked to silence anyone who voiced misgivings—from journalists to

their own employees.

Her father's been pronounced dead. Destructive earthquakes ravage the countryside. An invading army looms over the horizon. And Zaira's day is just getting started... Abandoned at an early age, Zaira von Monocle found life as the daughter of a great adventurer to be filled with hard work and difficulty. She

Zaira soon finds herself trapped in the midst of a war between her home country of Rislandia and the cruel Wyranth Empire, whose soldiers are acting peculiarly--almost inhuman. With the enemy army advancing, her newfound ship's crew may be the only ones who can save the kingdom. For Steam and Country is the first book in the Adventures of Baron Von Monocle series by top-10 Amazon best selling space opera author, Jon Del Arroz. This book is all about trains and my experiences with them together with the years of service in the locomotive area. I am recording as best as I can in this book the memoirs of my time as a fireman on the South African railways and as a scrap metal merchant in Northern Rhodesia now known as Zambia. The idea of writing of my experiences germinated when I was working on contract in the Republic of Mali, North Africa. I was commissioning a hydroelectric power station and, as there was nothing to do on off days, decided to write my memoirs. The more I wrote the more the memories came back, and I was eventually astounded of what I remembered.
