As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk.

This management guide for the total beginner takes the mystery out of investing with a clear explanation of stocks, bonds and other instruments, and provides an updated listing of Web sites and retirement plans. Line drawings, tables.

Stop Playing the Stock Market Game with the Only Stock Investment to Consistently Beat the Market Over the 15 years through 2014, stocks in the S&P 500 lost money a third of the time with investors losing an average of 16% when the market tumbled. Even on gains in other years, investors earned an annualized return of just 2.3% over the period...that's barely enough to cover inflation. But one group of stocks has consistently beaten the stock market game. In fact, this group has provided a source for positive returns every single year - without fail. Even when the prices of dividend stocks fall, the regular stream of cash they provide is a constant source for positive returns. After reading this book, you'll know exactly how to take advantage of returns on dividend stocks and how to build a portfolio around income investments. This book is the second in a series of four, outlining a step-by-step process for a simple investing strategy. In this book about investing in stocks that regularly put money in your pocket, I start off by showing you the power of dividend investing. After talking about the three income investments everyone needs in their portfolio, I'll show you how to put together an investing plan that will benefit from a regular stream of cash and upside price appreciation. In this book you'll learn: The four reasons why everyone needs to own dividend stocks and how they can help you reach financial freedom. (pg. 8) One group of dividend stocks that outperformed the stock market by 100% over the last decade. (pg. 22) The real estate dividend investment that has returned 13% a year for four decades.
