Did the Government of the Confederate States of America really come to an end 150 years ago...? Might it still exist, after all these years, repurposed and dedicated to the protection and aid of the Southern People, white and black... Every Government has a Military Arm... Here's the first thrilling story from the New Series... THE CONFEDERATE CHRONICLES No. 1 —GHOST OF A CHANCE Once again, Mosby's Rangers ride to the rescue! Well actually, reenactors portraying the renowned 43rd Battalion of the Virginia Cavalry. This action-packed novel takes you on a wild adventure from the foothills of Northern Virginia to the heart of Washington. These modern day Cavaliers summon the same kind of courage and heroic daring-do that made the original Rangers so famous. Ride along as they do battle with corrupt federal forces and pursue a true enemy bent on a horrific plan designed to bring disaster!

Through his leading role in the three Superman films, Christopher Reeve became so closely identified with the superhero that he wasn't just seen as the actor who played Superman, he was Superman. Which is why the tragic riding accident which left him paralysed from the neck down shocked the world. Superman was not superhuman. It is also why he is now the world's most recognisable person in a wheelchair. In true superhero style, Christopher Reeve refuses to resign himself to the life of a quadriplegic, and is actively campaigning to raise the profile of spinal-cord injury victims and research. Although he was initially told that he would only ever be able to move his head, he can now shrug his shoulders and breathe alone for increasing periods of time, and is determined that he will walk again. It is this extraordinary courage and determination that has made Christopher Reeve the internationally admired figure that he is, and it is this bravery which makes this autobiography about his paralysis and his journey to recovery such a powerful and moving story.

Have you ever given consideration to what it would be like to be deaf? Not hearing a single sound. Sure, it's quiet in your house, but you still hear sounds. I would like to think the sensation would be equitable to being underwater, but that would not be a true statement. You can still hear things while being underwater: Waves swishing and people talking above the water - yelling or laughing. Deafness is pure silence. When something big drops to the floor, I "feel" the thump it made. When my dogs bark, I can't hear them, but if they jump on my bed while I'm sleeping, I can feel they are present to wake me for a incoming visitor, burglar, tornado or other natural disaster. This book is a candid, and comical view about hearing loss, Meniere's Disease, vertigo, and the process of undergoing cochlear implant surgery. It also goes into depression and coping mechanisms for all of the above. It is a MUST read for someone or anyone you know (possibly yourself, but you won't admit it), who may be suffering from hearing loss. Progressive hearing loss is subtle. The sounds we often take for granted you no longer hear. Pay attention to your surroundings next time you are outside. Can you still hear the birds?

Home is where the heart is... Seven years after leaving town and the only girl he loved, Cooper still couldn't forget about Sophia. He had two loves. Music and the woman of his dreams. Coming back home proved that would always be true. But things have changed. Now he has to gain her trust again if he wants to make her all his. The question is, did he lose his chance the first time? Some things are hard to forget...

Sophia tried to stop loving Cooper and failed miserably. Despite the way he'd abandoned her seven years earlier, she can't seem to stay away, even though trusting him doesn't prove easy. One careless night could change it all and the secret she carries may ruin any chance of them being together. They say life is all about taking chances. But when opportunities are lost and love comes knocking the second time around, lives are changed forever.

Creative expression inspired by disease has been criticized as a celebration of victimhood, unmediated personal experience, or just simply bad art. Despite debate, however, memoirs written about illness—particularly AIDS or cancer—have proliferated since the late twentieth century and occupy a highly influential place on the cultural landscape today. In *Treatments*, Lisa Diedrich considers illness narratives, demonstrating that these texts not only recount and interpret symptoms but also describe illness as an event that reflects wider cultural contexts, including race, gender, class, and sexuality. Diedrich begins this theoretically rigorous analysis by offering examples of midcentury memoirs of tuberculosis. She then looks at Susan Sontag's *Illness As Metaphor*, Audre Lorde's *The Cancer Journals*, and Eve Kosofsky Sedgwick's "White Glasses," showing how these breast cancer survivors draw on feminist health practices of the 1970s and also anticipate the figure that would appear in the wake of the AIDS crisis in the 1980s—the "politicized patient." She further reveals how narratives written by doctors Abraham Verghese and Rafael Campo about treating people with AIDS can disrupt the doctor–patient hierarchy, and she explores practices of witnessing that emerge in writing by Paul Monette and John Bayley. Through these records of intensely personal yet universal experience, Diedrich demonstrates how language both captures and fails to capture these "scenes of loss" and how illness narratives affect the literary, medical, and cultural contexts from which they arise. Finally, by examining the ways in which the sick speak and are spoken for, she argues for an ethics of failure—the revaluation of loss as creating new possibilities for how we live and die. Lisa Diedrich is assistant professor of women's studies at Stony Brook University.

In *Feminist, Queer, Crip* Alison Kafer imagines a different future for disability and disabled bodies. Challenging the ways in which ideas about the future and time have been deployed in the service of compulsory able-bodiedness and able-mindedness, Kafer rejects the idea of disability as a pre-determined limit. She juxtaposes theories, movements, and identities such as environmental justice, reproductive justice, cyborg theory, transgender politics, and disability that are typically discussed in isolation and envisions new possibilities for crip futures and feminist/queer/crip alliances. This bold book goes against the grain of normalization and promotes a political framework for a more just world.

In "Why Do I Feel This Way?" What Your Feelings Are Trying To Tell You, Dina Wilcox tells the stories of her return from the loss of her husband in order to explain how the science of feelings, emotions and memories--with the help of that little voice she posits we all have in our heads--enabled her to re-create a life she could live with. In straightforward, plain language, each chapter contains a different piece of the story as the context for an unscientific experiment Wilcox conducted as she set about to understand what science could teach her about using her brain to help her move forward with her life. Her premise is that non-scientists like herself need to know how we can use our feelings and emotions, as well as such responses to life as fear, happiness, love, empathy, intuition and memories, which have evolved in our brains to help us live our lives deliberately and not as victims of our circumstances.

Jess has been in love with her best friend, Kate, for seven years, but her feelings have never been returned. One night they sleep together, and Jess finds out how much it is possible to be hurt by someone close. Jess and Kate struggle to redefine their friendship. They spend a week at Jess's family holiday house in a small seaside town, Awatangi, intending to make the time to talk things through, but the conversations never happen. Kate makes vague promises, but begins to have second thoughts. Jess wants Kate, and nothing else, and is heartbroken that isn't enough. Jess decides – while everything is changing in her life – that she doesn't want to go on living in the city, that she wants to return to Awatangi. Part of her hopes some physical distance between them may help things with Kate, and part of her – frustrated and upset – simply wants to leave Kate behind. In Awatangi, Jess meets Keri, a local lawyer who has also recently returned home. Like Jess, Keri surfs, and like Jess, she seems to feel some attachment to her family roots in Awatangi. Jess is drawn to Keri, but forces herself not to let anything happen. Despite everything, Kate is still Jess's closest friend, and she has loved Kate all her life. She feels she has to give the situation with Kate as long as she can to work itself out. Awatangi is about coping with feelings for a close friend that are not returned, set in a small holiday township on the West Coast of the South Island of New Zealand. It is an exploration of getting what you've always wanted and it not being enough, of being in love with one person and wanting another, and of finding out that life doesn't always turn out as expected.

He thought he'd be better at this Christianity thing by now. All his life, John Alan Turner has wanted to be different, to be better than who he is, to improve. Instead, he helped plant a church that folded within a year. He got divorced. He was diagnosed with depression. His car was rear-ended and totaled, which left him with life-altering injuries. It seemed like the harder he pushed to become the person he was supposed to be, the farther away it fled. And now, here he is after all these years, saying, "I'm still me." But in his journey, he has learned difficult lessons about stillness, about surrender, about silence. In *Still Me*, Turner helps readers examine their own lives and the difference between the life they thought they would have if they tried hard enough and the transformed life God offers to each one of us if we have the courage to sit still and surrender to the silence.

The creator of the cult classic *Cyborg Handbook*, Chris Hables Gray, now offers the first guide to ""posthuman"" politics, framing the key issues that could threaten or brighten our technological future.
