1. The stock market has its peculiarities. It's a world where a small matter has the potential of creating a massive impact. One thing added or one thing left out could be the difference between making a million dollars and losing it all. 2. There is no shortage of investors. The world has many of them. And you can be sure that some are extremely successful while others cry bitterly over their losses. 3. The reason why most investors fail is that they approach investing as though it were some lottery game. They are chance-takers. They have no plan. They stagger from one failed investment to another, taking stabs in the dark, and soon enough they lose all their money. 4. This book has been written to help you become an intelligent investor. An intelligent investor is not a chance-taker. An intelligent investor is a vain investor who exploits market inconsistencies long before others have taken notice. 5. You will learn all the basics of the stock market investment and how to optimize your investments and realize the largest possible profits. 6. An investor should not turn himself into a speculator, for a speculator acts on his instincts rather than his intellect when executing trades. 7. The stock market is neither a mythical place beyond human understanding, nor a place reserved for people with special genetics. The investors who have made a fortune out of stock market are average people like everyone else except they took their time to understand everything before trying to get in the game. 8. There are many investments in the securities markets beyond stocks. You could invest in bonds and funds like mutual funds and index funds. 9. Investing in IPOs gives you a chance to own a slice of a company and in return, you play your part in providing the company with much-needed resources. 10. The best single thing an investor can do before taking up an investment deal is to conduct a fundamental analysis. 11. Fundamental analysis is the evaluation of a company's financial health with the intention of either solidifying your interest in the venture or finding out any red flag. "The strategies for succeeding as an investor are timeless. They worked a lifetime ago in the days of Ben Graham (the father of value investing) and they still work today."

some left over for what you want is what many people dream of, but few people are able to achieve. So many people dream of becoming rich and being able to invest and make more money without having to work terribly hard at it. They wish to have enough money to place stocks in what they believe in, and reap the benefits later on. But few people actually achieve this in their life. So many people dream about becoming rich they are never able to actually make that happen. This isn't because they don't work hard. It isn't because they don't deserve it. Stock Trading For Beginners In this modern world that we live in, we are all looking for ways to earn money. We all have that dream of one day being on top of the world, having all of our needs met, and all of our wants met. Oh, to be able to go out and see something that you want, and simply be able to buy it without another thought, then to come home to our fancy house and park our fancy car in that fancy garage... only to then go inside and have a fancy dinner. For many of us, this is the American dream. For many of us, this is also only a dream, but it doesn't have to be that way. Let's face it, when you get up and go to work, odds are you are making enough to live the life you are currently living, and that's about it. You may be able to set some money aside here and there, but with the way the economy is these days, interest rates are at an all-time low, and you can't really depend on any of your money to make more unless you are at the old grinding stone, doing it yourself.

25+ Practices to Select Stocks The Right Way The stock market has been around for ages, enjoying times of booming sales, and enduring times of severe hardship. Behind those ticking jumping numbers are actual companies present in everyday life. This gives us an insight into one of the ways of investing in the stock market. You will realize or discover many things if you just stop and ponder a little deeper for a bit. Everyone loves to have the example of Apple stock, but maybe a lesser-known name like Keurig Dr. Pepper may draw a bit of your attention. This stock is what most investment folks' term as a consumer staple stock. When you break down that \$50-dollar word, consumer means folks like you and I, while staple means you really can't do without it for any extended period of time. Things like foodstuff, drinks, as well cleaning items will come into mind when we talk about this. Key to this is also the fact that staples tend to get purchased consistently. If you love doughnuts, and Krispy Kreme is one of your top choices, you just might have known about Keurig if you thought about it and dug a little deeper. What I am getting at is this. There are many stocks out there, as there are many investment opportunities. Not all of these money-making stocks are known only to the top analysts and hot shot investors. Many have household brands in their stables and we just have to dig a little deeper into the things we use, the things we like, and we just might be able to find a potential winner.
