First published in 1897, *The Invisible Man* is one of the first science fiction stories. The disturbing tale centers on Griffin, a scientist who has discovered the means to make himself invisible. His initial, almost comedic, adventures are soon overshadowed by the bizarre streak of terror he unleashes upon the inhabitants of a small village. Notable for its sheer invention, suspense, and psychological nuance, *The Invisible Man* had been filmed many times and continues to enthrall science-fiction fans today as it did the reading public nearly 100

Atwood triumphs with these dazzling, personal stories in her first collection since *Wilderness Tips*. In these ten interrelated stories Atwood traces the course of a life and also the lives intertwined with it, while evoking the drama and the humour that colour common experiences — the birth of a baby, divorce and remarriage, old age and death. With settings ranging from Toronto, northern Quebec, and rural Ontario, the stories begin in the present, as a couple no longer young situate themselves in a larger world no longer safe. Then the narrative goes back in time to the forties and moves chronologically forward toward the present. In "The Art of

Cooking and Serving,” the twelve-year-old narrator does her best to accommodate the arrival of a baby sister. After she boldly declares her independence, we follow the narrator into young adulthood and then through a complex relationship. In “The Entities,” the story of two women haunted by the past unfolds. The magnificent last two stories reveal the heartbreaking old age of parents but circle back again to childhood, to complete the cycle. By turns funny, lyrical, incisive, tragic, earthy, shocking, and deeply personal, *Moral Disorder* displays Atwood’s celebrated storytelling gifts and unmistakable style to their best advantage. This is vintage Atwood, writing at the height of her powers.

Horses are perhaps the most common non-human animal to feature in planned events, but although there is considerable research on equestrian sport, there is virtually none on equestrian events. This book begins to address this gap, using the National Championships of the Icelandic Horse as an extended case study to explain in depth the process of managing an event, as well as the larger theoretical implications of events management. Drawing on diverse viewpoints and theoretical perspectives, the book draws wider comparisons to connect events management to larger themes in the social sciences, such as human-animal relations; nationalism; place branding; event impacts; event experience;

and inclusion and exclusion. The book is a contribution to two fields. In relation to human-animal studies, it focuses on how the Icelandic horse breed is marketed and celebrated through top-tier competition; whereas from an events management perspective, it considers the role of the event in community building, the practical and theoretical aspects of running a sustainable equestrian event, and the issues that arise in multispecies event contexts.

Named after a word that translates literally to “nowhere,” Utopia is an island dreamed up by Thomas More, a devout Catholic, English statesman, and Renaissance humanist who would be canonized as a saint centuries after he was executed for choosing God over king. More’s novel introduces us to Utopia’s society and its customs. It is a place of no private property and no lawyers; of six-hour workdays and simple ways; and, intriguingly, of a combination of values that blend the traditional with the highly controversial, from euthanasia to married priests to slavery. Remarkably thought-provoking, it is a novel that asks us to question what makes a perfect world—and whether such a thing is even possible.

"Perfect summertime reading—preferably with a friend nearby who can be constantly interrupted with unsettling facts." —Daily Mail (UK) Benjamin Franklin was a pioneering scientist, leader of the Enlightenment, and a founding father of the United States. But perhaps less well known is that he was also the first person to use mouth-to-mouth resuscitation on an electric-shock victim. Odder still, it was actually mouth-to-beak resuscitation on a hen that he himself had shocked. Welcome to some of the weirdest and most wonderful experiments ever conducted in the name of science. Filled with stories of science gone strange, *Electrified Sheep* is packed with eccentric characters, irrational obsessions, and extreme experiments. Watch as scientists attempt to nuke the moon, wince at the doctor who performs a self-appendectomy, and catch the faint whiff of singed wool from an electrified sheep.
