*Principles of Management* is designed to meet the scope and sequence requirements of the introductory course on management. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

For many centuries, science and religion have remained staunchly independent. Whenever issues have developed that simultaneously touched on both areas, debate often ensued—for example, when scientists first proposed that the earth revolved around the sun, or when the theory of evolution was proposed. There has always been a cultural disconnect between science and religion that has caused dissention and

distrust. Research conducted by author Fred R. David, however, reveals that the missing link between science and religion may be UFOs or, more specifically, the beings inside those crafts. The UFO–Christianity Connection: Fact or Fiction • reveals that UFOs played a significant role in how ancient civilizations built megalithic structures and predicted celestial events perfectly; • brings to life the close association that ancient civilizations had with ancient astronauts—whom they called gods or sky people; • reveals that many events described in ancient writings, including the Bible, involved UFO encounters; • gives readers a unique perspective to engage others in discussing angels, God, UFOs, Bigfoot, Satan, giants, the underworld, the flood, Atlantis, and Jesus. The scientific information presented here is vital for people of all faiths on all continents. Explore the missing link that bridges the gap between science and religion.

Thompson and Strickland's, Strategic Management, has always included the most recent research in strategy in a way that students can understand and apply it to business cases and problems. In addition, Thompson offers more coverage of strategy implementation than most other texts, which many instructors think is critical if students are to understand the “how” and not just the “what” and “why”. Thompson’s coverage of Michael Porter’s classic 5-forces model is clearer and more detailed than in other texts, according to reviewers. With this edition the market leader looks better than ever before, offering a new 4-color design, improved writing style, and two new chapters on global and e-commerce strategy. The Thompson and Strickland cases have always been another strong selling point. Over the years, this author team has developed a great network of case authors and is able to select from the cream of the crop. And, having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will have heard of, know about from personal experience, or can easily identify with. The new case line-up features an exciting collection of dot.com/New Economy companies. Cases are further selected to highlight other critical types of business and trends, such as non-U.S. companies, globalization, cross-cultural situations, relatively small, entrepreneurial firms, non-profit organizations, and more.
