An introduction to the multidisciplinary field of strategic management, which incorporates knowledge from traditional business fields such as economics, management, marketing, finance, and operations management as well as non-business fields like psychology, sociology, and anthropology. The text co

Introduce your students to strategic management with the market-leading text that sets the standard for the course area. Written by respected scholars who have taught strategic management at all educational levels, Hitt, Ireland, and Hoskisson's latest edition provides an intellectually rich, yet thoroughly practical, analysis of strategic management. The classic industrial organization model is combined with a resource-based view of the firm to provide students with a complete understanding of how today's businesses establish competitive advantages and create value for stakeholders. Cutting-edge research is presented with a strong global focus, featuring more than 500 emerging and established companies. All-new opening cases introduce chapter concepts and mini cases offer new contexts of study. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This business policy textbook meets the AACSB guidelines, which support a more practical orientation over a theory/research based approach.

Thompson and Strickland's, Strategic Management, has always included the most recent research in strategy in a way that students can understand and apply it to business cases and problems. In addition, Thompson offers more coverage of strategy implementation than most other texts, which many instructors think is critical if students are to understand the "how" and not just the "what" and "why". Thompson's coverage of Michael Porter's classic 5-forces model is clearer and more detailed than in other texts, according to reviewers. With this edition the market leader looks better than ever before, offering a new 4-color design, improved writing style, and two new chapters on global and e-commerce strategy. The Thompson and Strickland cases have always been another strong selling point. Over the years, this author team has developed a great network of case authors and is able to select from the cream of the crop. And, having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will have heard of, know about from personal experience, or can easily identify with. The new case line-up features an exciting collection of dot.com/New Economy companies. Cases are further selected to highlight other critical types of business and trends, such as non-U.S. companies, globalization, cross-cultural situations, relatively small, entrepreneurial firms, non-profit organizations, and more.

This book is a unique collection of comprehensive cases that explore concepts and issues surrounding strategic marketing. Chapters explain what strategic marketing is, and then discuss strategic segmentation, competitive positioning, and strategies for growth, corporate branding, internal brand management, and corporate reputation management. With case studies from a broad range of global contexts and industries, including Burger King, FedEx, and Twitter, readers will gain a working knowledge of developing and applying market-driven strategy. Through case analysis, students will learn to: examine the role of corporate, business, and marketing strategy in strategic marketing; recognize the implications of markets on competitive space with an emphasis on competitive positioning and growth; interpret the various elements of marketing strategy and apply them to a particular real-world situation; apply sound decision-making strategies and analytical frameworks to specific strategic marketing problems and issues; apply ethical frameworks to strategic marketing situations. Strategic Marketing: Concepts and Cases is ideal for advanced undergraduate and postgraduate students, as well as those studying for an MBA or executive courses in strategic marketing or marketing management.

"Why does the world need another strategy textbook? The answer is that we simply have not been able to find a textbook that we felt fully met the needs of our students. What are those needs? First, we wanted to write a textbook that would engage students' interest using numerous practical examples and tools that would help them actually do analysis to answer key strategic questions. For example, leading firms and strategy consulting firms have tools to teach strategists how to actually conduct a "5 Forces" analysis, calculate a scale or experience curve, or conduct a net promoter score analysis. We wanted to provide those tools. We also wanted to create interactive learning tools that would connect with a new generation of learners"-- Strategic Management delivers an insightful, clear, concise introduction to strategy management concepts and links these concepts to the skills and knowledge students need to be successful
