The 4th Edition of Strategic Management of Technology and Innovation by Burgelman, Christensen, and Wheelwright continues its unmatched tradition of market leadership, by using a combination of text, readings, and cases to bring to life the latest business research on these critical business challenges. New co-author Clay Christensen provides his insights on innovation management and new market entries through several new cases. Approximately 40% of the cases are entirely new to this edition. Strategic Management of Technology and Innovation takes the perspective of the general manager at the product line, business unit, and corporate levels. The book not only examines each of these levels in some detail, but also addresses the interaction between the different levels of general management - for example, the fit between product strategy and business unit strategy, and the link between business and corporate level technology strategy. Each part of the book starts with an introductory chapter laying out an overall framework and offering a brief discussion of key tools and findings from existing literature. The remainder of each part offers a selected handful of seminar readings and case studies. Almost all of the cases deal with recent events and situations, including several that are concerned with the impact of the Internet. A few "classics" have been retained, however, because they capture a timeless issue or problem in such a definitive way that the historical date of their writing is irrelevant. Designed to facilitate understanding and retention of the material presented, each chapter contains the following pedagogical features:

- Opening Case: Each chapter begins with an opening case highlighting strategies and actions followed by Indian companies while trying to exploit the opportunities present in a competitive environment.
- Real World Examples: Each chapter contains a number of real- world examples illustrating how a particular firm has exploited the gaps present in the environment, using its own resources to best advantage.
- Terminology: Key ideas and terms that are vital to understanding strategic management have been highlighted throughout the book and explained at the end in a summarised form.
- References: Each chapter is also supported by carefully selected references for the benefit of readers who might be interested in exploring the topic(s) further.
- Personality Profiles: Personality sketches of leading corporate heroes have also been provided at appropriate places, illustrating the manner in which they fought against heavy odds and emerged as

winners in the end.
u Review and Discussion Questions : Following the terminology, review and discussion questions offer an opportunity to focus on each of the key ideas illustrated at the beginning of each chapter and stimulate clear thinking.
u Research Inputs: The book provides a comprehensive coverage of a vast, growing subject well-supported by a wealth of research data collected from multifarious sources.
u Concluding Case: Each chapter contains a thoroughly researched and widely-acclaimed case, picked up from Business Today, relevant to the topic in question.
u Student Oriented Text: The subject matter has been presented in a simple and lucid manner, keeping the unique requirements of students in mind.

However, few books on management strategy have been written using this concept as a foundation. This unique volume adopts a knowledge-based approach that will complement and perhaps supplant other perspectives. Editors Nick Bontis and Chun Wei Choo look at the literature through the lens of strategic management and from the vantage point of organizational science. The thirty readings have been carefully selected and commissioned to provide the best literature available--from articles newly written for this book and from existing publications.
