When we published Land of Hope in May of 2019, we had an immediate response from teachers and students that (1) they loved the book, and (2) they would need ancillary materials to aid them in the use of the book for classroom instruction. We jumped right on that, and produced a Teacher's Guide, which appeared in spring of 2020, and we're now following up with a Student Workbook, which is completely coordinated with the Teacher's Guide, featuring study questions (which can also be used for testing by teachers), objective exercises (matching, identification, temporal ordering), primary-source documents and accompanying study questions, a section of map exercises which include in-text outline maps for student use, as well as back-of-the-book resources such as reference tables for the British monarchy, the American presidency, and a list of suggestive questions that are suitable for extended essays or term papers. It is the perfect resource for both classroom teaching, home education, and hybrid versions of both.

For pharmacology courses that are part of practical and vocational nursing programs An interdisciplinary exploration of pharmacology. By its very nature, pharmacology is a challenging interdisciplinary subject that requires understanding concepts from a wide variety of the natural and applied sciences to predict drug action. For this reason, authors Holland, Adams, and Brice have organized Core Concepts in Pharmacology according to body systems and diseases, placing drugs in the context of their therapeutic use. This gives students easier access to the prerequisite anatomy, physiology, pathophysiology, and pharmacology organized in the same chapter where the drugs are discussed. The Fifth Edition continues its prototype approach of introducing, in detail, the one or two most representative drugs in each class. It also maintains

a strong emphasis on safe, effective nursing care with a new chapter on preventing medication errors, features new Drug Focus boxes to cover emerging drugs, and includes many more new and updated features.

For too long we've lacked a compact, inexpensive, authoritative, and compulsively readable book that offers American readers a clear, informative, and inspiring narrative account of their country. Such a fresh retelling of the American story is especially needed today, to shape and deepen young Americans' sense of the land they inhabit, help them to understand its roots and share in its memories, all the while equipping them for the privileges and responsibilities of citizenship in American society. The existing texts simply fail to tell that story with energy and conviction. Too often they reflect a fragmented outlook that fails to convey to American readers the grand trajectory of their own history. This state of affairs cannot continue for long without producing serious consequences. A great nation needs and deserves a great and coherent narrative, as an expression of its own self-understanding and its aspirations; and it needs to be able to convey that narrative to its young effectively. Of course, it goes without saying that such a narrative cannot be a fairy tale of the past. It will not be convincing if it is not truthful. But as *Land of Hope* brilliantly shows, there is no contradiction between a truthful account of the

American past and an inspiring one. Readers of Land of Hope will find both in its pages.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Effectively learning pharmacology requires students to clearly see the connection between pharmacology, disease and patient care.
