"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Sze-kar Wan examines the social and political ramifications of Paul's last and longest letter. By taking seriously Paul's faithfulness to his ancestral tradition, Wan argues that Paul is engaged in ethnic construction by incorporating non-Jews into Ideal Israel. With its claim of universality and the cosmic Son of God installed as king, Ideal Israel stands in pointed opposition to the Roman Empire. Wan presents the Letter to the Romans as Paul's extended argument to his Gentile audience in defence of Ideal Israel and their place in it, without ignoring such prominent themes as good news, faith and belief, eschatology, and the collection for the poor. By also including a reading of Romans 13 as resistance against absolute authority, at variance with historical interpretations that defended American slavery and German Nazism, Wan gives readers a new perspective on a defiant message that can be marshalled to resist oppressive regimes.

This book is literally, a first of a kind and ground-breaking in its intent. The intent of this book is to give national security professionals and other interested parties a baseline understanding of narrative and its principles regarding the potential for predictably triggering behavior. If we are to succeed on the battlefield of influence, understanding narrative is an imperative. This introductory study guide describes methods, from strategic to tactical, to win Narrative Warfare. We begin by defining narrative and its four components. We move to a description of offensive and defensive narratives and then provide details about the specific type of Narrative Identity Analysis of the target audience that will be necessary in order to put together a comprehensive Narrative Strategy. We demonstrate how to trigger identities and frame events in order to completely dominate in Narrative Warfare. For a more complete understanding of influence in general and a more well-rounded understanding of narratives' role in influence, it is highly recommended to add Narrative Warfare, Dr. Ajit Maan, 2018 and Information Warfare, the Lost Tradecraft, Dr. Howard Gambrell Clark, 2018 to your library. Both are Narrative Strategies publications.
