

## Summer Birds The Butterflies Of Maria Merian

Documents the work of a young girl, Maria Merian, who lived during the Middle Ages and disproved the theory of spontaneous generation by observing caterpillars as they spun cocoons and emerged as butterflies and moths in the spring. By the author of the Newbery Honor Book, *The Surrender Tree*.

Describes twenty-two birds with unusual habits or characteristics, including the ostrich, kiwi, honey guide, and hornbill.

Supported by the beliefs of their faith, twins Renee and Albret and the rest of the Martineau family stand fast during the persecution of the French Huguenots by King Louis XIV and the Roman Church in 1685.

Although no one had ever followed North American monarch butterflies on their annual southward journey to Mexico and California, in the 1990s there were well-accepted assumptions about the nature and form of the migration. But to Robert Michael Pyle, a naturalist with long experience in monarch conservation, the received wisdom about the butterflies' long journey just didn't make sense. In the autumn of 1996 he set out to uncover the facts, to pursue the tide of "cinnamon sailors" on their long, mysterious flight. *Chasing Monarchs* chronicles Pyle's 9,000-mile journey to discover firsthand the secrets of the monarchs' annual migration. Part road trip, part outdoor adventure, and part natural history study, Pyle's book overturns old theories and provides insights both large and small regarding monarch butterflies, their biology, and their spectacular migratory travels. Since the book's first publication, its controversial conclusions have been fully confirmed, and monarchs are better understood than ever before. The Afterword for this volume includes not only updated information on the myriad threats to monarch butterflies, but also various efforts under way to ensure the future of the world's most amazing butterfly migration.

Plan Your Landscape or Garden to Help Beloved Backyard Visitors The presence of birds, bees, and butterflies suggests a healthy, earth-friendly place. These most welcome guests also bring joy to those who appreciate watching them. Now, you can turn your yard into a perfect habitat that attracts them and, more importantly, helps them thrive. Acclaimed author and expert entomologist Jaret C. Daniels provides all the information you need in this must-have guide for Illinois, Indiana, Iowa, Michigan, Minnesota, North Dakota, South Dakota, and Wisconsin. You can learn how to landscape and create pollinator gardens with native plants. The book begins with an in-depth introduction to native pollinators and to birds. It's followed by a "field guide" section to 109 native plants that are widely available to utilize, are easy to care for, and provide great benefit to birds, bees, and butterflies. The species are organized by level of sunlight needed and then by plant types. Each species includes full-color photographs and information about hardiness zones, what they are most likely to attract, soil requirements, light levels, and Jaret's notes. As an added bonus, you'll make use of blooming charts, tips on attracting specific species, and more! Plus, the invaluable garden plans and projects show you just what to do and can be customized to suit your own specific interests. Plan, plant, and grow your own beautiful garden, with native plants that benefit your favorite creatures to watch and enjoy.

A timeless romance from New York Times bestseller Julie Garwood, a tale for mothers to share with their daughters, and for women to remember what it feels like to fall in love for the very first time. Summer never meant to lie. She just wanted to keep the most perfect guy she ever met interested in her. She had been surprised when David began hanging out with her every day... and dizzy with happiness when he kissed her. David seemed to like her unconventional Irish family, even her eccentric Grandpa. Everything was going great - until Ann entered the picture. She collected boys like trophies. How could Summer compete with someone like that? Before she knew it, Summer was boasting to David about her passion for long-distance running. She never dreamed he'd enter them in a six-mile race. Summer dreaded the moment when he would discover the truth: she couldn't run six blocks. And the flirtatious Ann was already working on David. Then Summer's Grandpa came up with a plan that was just crazy enough to save the day....

With the Birds & Butterflies Drawing & Activity Book, learn how to draw 17 different bird and butterfly species with three methods: tracing, grid drawing, and step-by-step drawing! Then try the grid method—just copy the lines and shapes into the corresponding square on the blank practice grid provided. You will also learn the same step-by-step method used by professional artists: the basic shapes method. To draw birds and butterflies like a professional does, just follow the illustrations that show how each step builds upon the last to create a finished piece of artwork. Look closely at the new lines in each step and draw the bird or butterfly on the practice page provided after each basic shapes project. Find the technique that works the best for you, and draw your favorite birds and butterflies over and over again! There are plenty of practice pages and tracing paper inside, so you have all you need to get started right away. The simple instructions will guide you through each step, making it easy to follow along. Plus, learn some fun facts about the different birds and butterflies as you learn to draw them. Activities include a bird word search, a butterfly maze, a bird map match, spot the difference, and more. With fascinating facts, fun activities, and practice pages encouraging you to get started directly in the pages of the book, you can let your inner artist take flight with the Birds & Butterflies Drawing & Activity Book.

Tiny ruby-throated hummingbirds weighing less than a nickel fly from the upper Midwest to Costa Rica every fall, crossing the six-hundred-mile Gulf of Mexico without a single stop. One of the many creatures that commute on the Mississippi Flyway as part of an annual migration, they pass along Chicago's lakefront and through midwestern backyards on a path used by their species for millennia. This magnificent migrational dance takes place every year in Chicagoland, yet it is often missed by the region's two-legged residents. The Art of Migration uncovers these extraordinary patterns that play out over the seasons. Readers are introduced to over two hundred of the birds and insects

that traverse regions from the edge of Lake Superior to Lake Michigan and to the rivers that flow into the Mississippi. As the only artist in residence at the Field Museum, Peggy Macnamara has a unique vantage point for studying these patterns and capturing their distinctive traits. Her magnificent watercolor illustrations capture flocks, movement, and species-specific details. The illustrations are accompanied by text from museum staff and include details such as natural histories, notable features for identification, behavior, and how species have adapted to environmental changes. The book follows a gentle seasonal sequence and includes chapters on studying migration, artist's notes on illustrating wildlife, and tips on the best ways to watch for birds and insects in the Chicago area. A perfect balance of science and art, *The Art of Migration* will prompt us to marvel anew at the remarkable spectacle going on around us.

Explains how to attract butterflies and hummingbirds to the backyard garden by creating an ideal habitat and provides a field guide to the sixteen hummingbird species and seventy-five common butterfly species that make North America their home.

*American Gods* meets *The Chronicles of Narnia* in this adult fantasy about the Biblical Adam recovering the lost pieces of the Garden of Eden. Many millennia after the fall of Eden, Adam, the first man in creation, still walks the Earth – exhausted by the endless death and destruction, he is a shadow of his former hope and glory. And he is not the only one. The Garden was deconstructed, its pieces scattered across the world and its inhabitants condemned to live out immortal lives, hiding in plain sight from generations of mankind. But now pieces of the Garden are turning up on the Earth. After centuries of loneliness, Adam, haunted by the golden time at the beginning of Creation, is determined to save the pieces of his long lost home. With the help of Eden's undying exiles, he must stop Eden becoming the plaything of mankind. Adam journeys across America and the British Isles with Magpie, Owl, and other animals, gathering the scattered pieces of Paradise. As the country floods once more, Adam must risk it all to rescue his friends and his home – because rebuilding the Garden might be the key to rebuilding his life.

From the New York Times bestselling author of *H is for Hawk* and winner of the Samuel Johnson Prize for nonfiction, comes a transcendent collection of essays about the natural world. Animals don't exist in order to teach us things, but that is what they have always done, and most of what they teach us is what we think we know about ourselves. Helen Macdonald's bestselling debut *H is for Hawk* brought the astonishing story of her relationship with goshawk Mabel to global critical acclaim and announced Macdonald as one of this century's most important and insightful nature writers. *H is for Hawk* won the Samuel Johnson Prize for Nonfiction and the Costa Book Award, and was a finalist for the National Book Critics Circle Award and the Kirkus Prize for Nonfiction, launching poet and falconer Macdonald as our preeminent nature essayist, with a semi-regular column in the New York Times Magazine. In *Vesper Flights* Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us

into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk's poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds' nests, and the unexpected guidance and comfort we find when watching wildlife. By one of this century's most important and insightful nature writers, *Vesper Flights* is a captivating and foundational book about observation, fascination, time, memory, love and loss and how we make sense of the world around us.

Explains how to transform backyard gardens into living ecosystems that are not only enjoyable retreats for humans, but also sanctuaries for wildlife.

A quick-reference guide to attracting birds and butterflies for gardeners with little experience and time. In the eye of a bird or butterfly, the typical suburban landscape resembles an unfriendly desert. Closely mowed lawns, tightly clipped shrubs, raked-up borders, and deadheaded flowers mean no place to nest, no food to eat, and nowhere to hide. To the humans who live there, this means no bird songs, no colorful butterflies, no dazzling hummingbirds, no night-sparkling fireflies. Creating a garden that welcomes these creatures may seem like a confusing and complicated task, but the principles involved are relatively simple. Essentially, wildlife needs food, water, and shelter, just like we do, and this lavishly illustrated guide shows which plants attract which creatures, and how to plant and care for them.

Expertly rendered illustrations of 43 species: monarch, buckeye, white admiral, olive hairstreak, ruddy daggerwing, mourning cloak, painted lady, more. Fact-filled captions by Monty Reid.

Perfect for fans of *Rain Reign*, this middle-grade novel *The Brave* is about a boy with an OCD issue and his move to a reservation to live with his biological mother. Collin can't help himself—he has a unique condition that finds him counting every letter spoken to him. It's a quirk that makes him a prime target for bullies, and a continual frustration to the adults around him, including his father.

When Collin asked to leave yet another school, his dad decides to send him to live in Minnesota with the mother he's never met. She is Ojibwe, and lives on a reservation. Collin arrives in Duluth with his loyal dog, Seven, and quickly finds his mom and his new home to be warm, welcoming, and accepting of his condition. Collin's quirk is matched by that of his neighbor, Orenda, a girl who lives mostly in her treehouse and believes she is turning into a butterfly. With Orenda's help, Collin works hard to overcome his challenges. His real test comes when he must step up for his new friend and trust his new family.

Robert F. Sibert Medal winner *Bugs*, of all kinds, were considered to be "born of mud" and to be "beasts of the devil." Why would anyone, let alone a girl, want to study and observe them? One of the first naturalists to observe live insects directly, Maria Sibylla Merian was also one of the first to document the metamorphosis of the butterfly. In this visual nonfiction biography, richly illustrated throughout with full-color original paintings by Merian herself, the Newbery Honor-winning author Joyce Sidman paints her own picture of one of the first female entomologists and a woman who flouted convention in the pursuit of knowledge and her passion for insects. Read Along or Enhanced eBook: One spring evening an old bear finds a young bird, still learning to fly, has fallen to the ground. When the bear lifts the bird to safety, a friendship begins. Bear and Bird soon become constant companions, spending their days together, searching out berries and watching out for one another. They are only separated during the winter months when Bear hibernates and Bird flies south. As the years pass, their friendship grows stronger. Then one spring day, when Bird returns from his winter trip, Bear is not there to greet him. Days and then weeks pass and still no Bear. When Bird finally learns why his dear friend is absent, memories of their time together bring comfort and acceptance. In this tale of an unlikely but loving friendship, the cycle of life, including its joys and its sorrows, is gently explored.

Throughout the day and into the night various birds sing their songs, beginning with the woodpecker who taps a pole ten times and counting down to the hummingbird who calls once.

The moth snowstorm, a phenomenon Michael McCarthy remembers from his boyhood when moths “would pack a car’s headlight beams like snowflakes in a blizzard,” is a distant memory. Wildlife is being lost, not only in the wholesale extinctions of species but also in the dwindling of those species that still exist. The Moth Snowstorm is unlike any other book about climate change today; combining the personal with the polemical, it is a manifesto rooted in experience, a poignant memoir of the author’s first love: nature. McCarthy traces his adoration of the natural world to when he was seven, when the discovery of butterflies and birds brought sudden joy to a boy whose mother had just been hospitalized and whose family life was deteriorating. He goes on to record in painful detail the rapid dissolution of nature’s abundance in the intervening decades, and he proposes a radical solution to our current problem: that we each recognize in ourselves the capacity to love the natural world. Arguing that neither sustainable development nor ecosystem services have provided adequate defense against pollution, habitat destruction, species degradation, and climate change, McCarthy asks us to consider nature as an intrinsic good and an emotional and spiritual resource, capable of inspiring joy, wonder, and even love. An award-winning environmental journalist, McCarthy presents a clear, well-documented picture of what he calls “the great thinning” around the world, while interweaving the story of his own early discovery of the wilderness and a childhood saved by nature. Drawing on the truths of poets, the studies of scientists, and the author’s long experience in the field, The Moth Snowstorm is part elegy, part ode, and part argument, resulting in a passionate call to action. A soaring celebration of summer and a poignant journey into the changing nature of the British season - from the award-winning author of Wintering and The Seafarers. Summer is traditionally a time of plenty, of warmth, of breeding; a time to celebrate the abundance of nature teeming in our hedgerows, cities, marshlands and woodlands. But in the twenty-first century, 'summer' is becoming harder to define. The changing climate is bleeding our traditional distinctions into one another. Last February held days as warm as August. Or was it the other way around? Against the anxious backdrop of the global pandemic, Stephen Rutt seeks comfort and reassurance from nature in full bloom. But within his evocative exploration of the landscapes and wildlife that characterize the British summer, he also notes the disturbance to the traditional rhythms of the natural world: the wrong birds singing at the wrong time, the disruption to habitats and breeding, the myriad ways climate change is causing a derangement of the seasons. The Eternal Season is both a celebration of summer and an observation of the delicate series of disorientations that we may not notice when some birds still sing, while nature still has some voice, but which might be forever changing our

perception of summer.

A moving story of a young girl's struggle with love, loss, family, and magic from the beyond, from critically acclaimed author Kimberley Griffiths Little. Everybody thinks Tara Doucet has the perfect life. But Tara's life is anything but perfect: Her dear Grammy Claire has just passed away, her mom is depressed and distant, and she and her sister, Riley, can't agree on anything. But when mysterious and dazzling butterflies begin to follow her around after Grammy Claire's funeral, Tara knows in her heart that her grandmother has left her one final mystery to solve. Tara finds a stack of keys and detailed letters from Grammy Claire. Note by note, Tara learns unexpected truths about her grandmother's life. As the letters grow more ominous and the clues harder to decipher, Tara realizes that the secrets she must uncover could lead to grave danger. And when Tara and Riley are swept away to the beautiful islands of Chuuk to hear their grandmother's will, Tara discovers the most shocking truth of all, one that will change her life forever. Kimberley Griffiths Little weaves a magical, breathtaking mystery full of loss and love, family and faith.

This fascinating picture book biography from beloved author of the Lemonade War series Jacqueline Davies and Caldecott honor-winning illustrator Melissa Sweet chronicles the life of scientist John James Audubon, who pioneered a technique essential to our understanding of birds thanks to his lifelong love for the species. If there was one thing James loved to do more than anything else, it was to be in the great outdoors watching his beloved feathered friends. In the fall of 1804, he was determined to find out if the birds nesting near his Pennsylvania home would really return the following spring. Through careful observation, James laid the foundation for all that we know about migration patterns today. Capturing the early passion of this bird-obsessed young man as well as the meticulous study and scientific methods behind his research, this lively, gorgeously illustrated biography will leave young readers listening intently for the call of birds large and small near their own home.
