Presents the text of Alice Walker's story "Everyday Use"; contains background essays that provide insight into the story; and features a selection of critical response. Includes a chronology and an interview with the author.

Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.

What role does memory play in migrants' adaption to the emotional challenges of migration? How are migrant selfhoods remade in relation to changing cultural myths? This book, the first to apply Popular Memory Theory to the Irish Diaspora, opens new lines of critical enquiry within scholarship on the Irish in modern Britain. Combining innovative use of migrant life histories with cultural representations of the post-war Irish experience, it interrogates the interaction between lived experience, personal memory and cultural myth to further understanding of the work of memory in the production of migrant subjectivities. Based on richly contextualised case studies addressing experiences of emigration, urban life, work, religion, and the Troubles in England, chapters shed new light on the collective fantasies of post-war migrants and the circumstances that formed them, as well as the cultural and personal dynamics of subjective change over the life course. At the core of the book lie the processes by which migrants 'recompose' the self as part of ongoing efforts to adapt to the transition between cultures and places. Life history and the Irish migrant experience offers a fresh perspective on the significance of England's largest post-war migrant group for current debates on identity and difference in contemporary Britain. Integrating historical, cultural and psychological perspectives in an innovative way, it will be essential reading for academics and students researching modern British and Irish social and cultural history, ethnic and migration studies, oral history and memory studies, cultural studies and human geography.

The Oxford Handbook of Transnational Law offers a unique and unparalleled treatment and presentation in the field of Transnational Law that has become one of the most intriguing and innovative developments in legal doctrine, scholarship, theory, and practice today. This in itself constitutes an ambitious editorial project, not only within law and legal doctrine, but also with regard to an increasing interest in an interdisciplinary engagement of law with social sciences - including sociology, anthropology, political science, geography, and political theory. Closely tied into the substantive transformation that many legal fields are undergoing is the observation that many of these developments are driven by changes in an increasingly global legal practice today. The concept then, of 'transnational law' aims at capturing the distinctly border-crossing nature even of those legal fields which had for the longest time been seen as having merely 'domestic' relevance. This shift also requires a conscious effort among law school classroom instructors, casebook authors, and curriculum reformers to adapt their teaching content to these circumstances. As the authors of this Handbook make clear, this adaptation requires a close dialogue between a scholarly investigation into the transnational 'concept of law' and the challenges faced by practicing lawyers, be that as solicitor, in-house counsel, as judges, or as bureaucrats in a globalized regulatory and socio-economic environment. While the main thrust is on the transnationalization of legal doctrine and legal theory, with a considerable contribution from and engagement with social sciences, the Handbook features numerous reflections on the relationship between transnational law and legal practice.

The overarching theme of this book is the balance between the role of a central government in creating and shaping the regulatory framework of criminal justice and the potential for communities at a local level to become more involved in responding to crime and anti-social

behavior in their midst. These twin dynamics are explored in the two main sections of the book. Through a series of UK case studies in Part I - The Regulatory State - the book examines how the central state has sought to address the risks and problems associated with crime and anti-social behavior in modern times. The case studies consider the new context for law and order which arose during the period and ask how and why new sanctions were put in place to regulate particular kinds of behavior. They also highlight some of the unintended consequences, notably the criminalization of more people. In Part II - Empowered Communities as Stakeholders in Criminal Justice - the book explores the potential for local communities

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

When sixteen-year-old Rashad is mistakenly accused of stealing, classmate Quinn witnesses his brutal beating at the hands of a police officer who happens to be the older brother of his best friend. Told through Rashad and Quinn's alternating viewpoints.

"When Kristen Radtke was in her twenties, she learned that, as her father was growing up, he would crawl onto his roof in rural Wisconsin and send signals out on his ham radio. Those CQ calls were his attempt to reach somebody--anybody--who would respond. In *Seek You*, Radtke uses this image as her jumping off point into [an] ... exploration of loneliness and the ways in which we attempt to feel closer to one another"--

"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In *We're Not Broken*, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems

that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

Vaccine reluctance and refusal are no longer limited to the margins of society. Debates around vaccines' necessity -- along with questions around their side effects -- have gone mainstream, blending with geopolitical conflicts, political campaigns, celebrity causes, and "natural" lifestyles to win a growing number of hearts and minds. Today's anti-vaccine positions find audiences where they've never existed previously. Stuck examines how the issues surrounding vaccine hesitancy are, more than anything, about people feeling left out of the conversation. A new dialogue is long overdue, one that addresses the many types of vaccine hesitancy and the social factors that perpetuate them. To do this, Stuck provides a clear-eyed examination of the social vectors that transmit vaccine rumors, their manifestations around the globe, and how these individual threads are all connected.

How do we maintain core values and rights when governments impose restrictive measures on our lives? Declaring a state of emergency is the best way to protect public health in a pandemic but how do these powers differ from those for national security and economic crises? This book explores how human rights, democracy and the rule of law can be protected during a pandemic and how emergency powers can best be ended once it wanes. Written by an expert on constitutional law and human rights, this accessible book will shape how governments, opposition, courts and society as a whole view future pandemic emergency powers.

A spellbinding story about love, faith, the search for utopia—and the often devastating cost of idealism. It's the late 1960s, and two lovers converge on an arid patch of earth in South India. John Walker is the handsome scion of a powerful East Coast American family. Diane Maes is a beautiful hippie from Belgium. They have come to build a new world—Auroville, an international utopian community for thousands of people. Their faith is strong, the future bright. So how do John and Diane end up dying two decades later, on the same day, on a cracked concrete floor in a thatch hut by a remote canyon? This is the mystery Akash Kapur sets out to solve in *Better to Have Gone*, and it carries deep personal resonance: Diane and John were the parents of Akash's wife, Auralice. Akash and Auralice grew up in Auroville; like the rest of their community, they never really understood those deaths. In 2004, Akash and Auralice return to Auroville from New York, where they have been living with John's family. As they reestablish themselves, along with their two sons, in the community, they must confront the ghosts of those distant deaths. Slowly, they come to understand how the tragic individual fates of John and Diane intersected with the collective history of their town. *Better to Have Gone* is a book about the human cost of our age-old quest for a more perfect world. It probes the underexplored yet universal idea of utopia, and it portrays in vivid detail the daily life of one utopian community. Richly atmospheric and filled with remarkable characters, spread across time and continents, this is narrative writing of the highest order—a heartbreaking, unforgettable story.

For more than 150 years, Nationalist, Populist, Marxist and Islamist terrorists have all been remarkably consistent and explicit about their aims: Provoke the State into over-reacting to the threat they pose, then take advantage of the divisions in society that result. Faced with a major terrorist threat, States seem to reach instinctively for the most coercive tools in their arsenal and, in doing so, risk exacerbating the situation. This policy response seems to be driven in equal parts by a lack of understanding of the true nature of the threat, an exaggerated faith in the use of force, and a lack of faith that democratic values are sufficiently flexible to allow for an effective counter-terrorism response. Drawing on a wealth of data from both historical and

contemporary sources, *Avoiding the Terrorist Trap* addresses common misconceptions underpinning flawed counter-terrorist policies, identifies the core strategies that guide terrorist operations, consolidates the latest research on the underlying drivers of terrorist violence, and demonstrates how a comprehensive and coherent counter-terrorism strategy grounded in respect for human rights and the rule of law is the only truly effective approach to defeating terrorism.

Suspect Citizens offers the most comprehensive look to date at the most common form of police-citizen interactions, the routine traffic stop. Throughout the war on crime, police agencies have used traffic stops to search drivers suspected of carrying contraband. From the beginning, police agencies made it clear that very large numbers of police stops would have to occur before an officer might interdict a significant drug shipment. Unstated in that calculation was that many Americans would be subjected to police investigations so that a small number of high-level offenders might be found. The key element in this strategy, which kept it hidden from widespread public scrutiny, was that middle-class white Americans were largely exempt from its consequences. Tracking these police practices down to the officer level, *Suspect Citizens* documents the extreme rarity of drug busts and reveals sustained and troubling disparities in how racial groups are treated.

On September 11, 2001, nineteen terrorists hijacked four airplanes and carried out attacks on the United States, killing more than three thousand Americans and sending the country reeling. Three days after the attacks, President George W. Bush declared, "This is a day when all Americans from every walk of life unite in our resolve for justice and peace." Yet in the days following, Bush declared a "War on Terror," which would result in years of Muslims being targeted on the basis of collective punishment and scapegoating. In 2009, President Barack Obama said, "America must play its role in ushering in a new era of peace." Instead, Obama perpetuated the War on Terror's infrastructure that Bush had put in place, rendering his words entirely empty. President Donald Trump's overtly Islamophobic rhetoric added fuel to the fire, stoking public fears to justify the continuation of the War his predecessors had committed to. In *Innocent Until Proven Muslim*, scholar and organizer Dr. Maha Hilal tells the powerful story of two decades of the War on Terror, exploring how the official narrative has justified the creation of a sprawling apparatus of state violence rooted in Islamophobia and excused its worst abuses. Hilal offers not only an overview of the many iterations of the War on Terror in law and policy, but also examines how Muslim Americans have internalized oppression, how some influential Muslim Americans have perpetuated collective responsibility, and how the lived experiences of Muslim Americans reflect what it means to live as part of a "suspect" community. Along the way, this marginalized community gives voice to lessons that we can all learn from their experiences, and to what it would take to create a better future. Twenty years after the tragic events of 9/11, we must look at its full legacy in order to move toward a United States that is truly inclusive and unified.

In the years since 9/11, counter-terrorism law and policy has proliferated across the world. This handbook comprehensively surveys how the law has been deployed in all aspects of counter-terrorism. It provides an authoritative and critical analysis of counter-terrorism laws in domestic jurisdictions, taking a comparative approach to a range of jurisdictions, especially the UK, the US, Australia, Canada, and Europe. The contributions to the book are written by experts in the field of terrorism law and policy, allowing for discussion of a wide range of regulatory responses and strategies of governance. The book is divided into four parts, reflective of established counter-terrorism strategic approaches, and covers key themes such as: Policing and special powers, including surveillance Criminal offences and court processes Prevention of radicalisation and manifestations of extremism Protective/preparative security The penology of terrorism In addressing counter-terrorism laws across a broad range of topics and jurisdictions, the handbook will be of great interest and use to researchers, students and

practitioners in criminal law, counter-terrorism, and security studies.

After finding herself the subject of a powerful psychic attack in the 1930's, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defense guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defense.

Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognize them. This is one of the best guides to detection and defense

Historically, countering terrorism has been something that security services have carried out on behalf of the state, without community consultation or consent. Since 9/11 however, this tradition has increasingly been questioned and the idea that communities have the potential to defeat al Qaeda - related or influenced terrorism has gained ascendancy across policy, security and other contexts. Based on research in the US, Britain and Northern Ireland, this book examines the involvement of Muslim and other communities in terror crime prevention work, exploring the complexities of community involvement as well as its advantages and examining how trusting relationships between police, security services and communities can be built.

The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. But what Starr does—or does not—say could upend her community. It could also endanger her life. Want more of Garden Heights? York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Examines the powers and effects of the Prevention of Terrorism (Temporary Provisions) Act (PTA) which was introduced in 1974, following the Birmingham pub bombings. Includes factual information about the operation of the Act, plus accounts of personal experiences of the trauma of examination, arrest and detention under this legislation.

In an ironic reversal of the American dream, a staggering 20,000 members of the immigrant community of Midwood, Brooklyn (known as Little Pakistan), voluntarily left the United States after 9/11. Tram Nguyen reveals the human cost of the domestic war on terror and examines the impact of post-9/11 policies on people targeted because of immigration status, nationality, and religion. Nguyen's evocative narrative reporting--about the families, detainees, local leaders, community advocates, and others living on the front lines--tells the stories of people who witnessed and experienced firsthand the unjust detainment or deportation of family members, friends, and neighbors. We meet Mohammad Butt, who died in detention in New Jersey, and the Saleems, who flee Queens for Canada. We even follow a self-proclaimed 'citizen patroller' who monitors and detains immigrants on the U.S.-Mexico border. *We Are All Suspects Now*, in the words of Mike Davis, "takes us inside a dark world . . . where the American Dream is fast turning into a nightmare and suggests proactive responses to stop our growing climate of xenophobia, intimidation, and discrimination."

This book investigates the history of responses to, engagements with and memories of the Northern Irish conflict in Britain, exploring the lessons to be learned from post-conflict efforts to 'deal with the past' in Northern Ireland and providing a starting point for wider academic and public debate in Britain on the significance of this history. Presents an innovative new argument that counter-terrorism law and policing produce a 'common sense' knowledge about Muslims and targeted ethnic minorities which, in turn, establishes contemporary practices, understandings and norms which mark these

groups as 'of interest' to law enforcement and other organisations.

This book presents the voices of police and community members who have been involved in engagement and partnership projects designed for countering violent extremism. Though the threat of the so-called Islamic State garners a great deal of current attention, the book explores ideological violence prevention efforts in a number of contexts, to include that of paramilitary organizations as well as Qa'ida inspired actors.

Chapters of this volume, written by authorities from around the world, explore various instances of Islamophobia and examine discursive contexts such as media coverage and manipulation, political discourse, and general attitudes in the public sphere. The book extends existing discussions and highlights some hitherto less-debated concerns.

The story of one African-American family fighting to stay together and strong in the face of brutal racist attacks, illness, poverty, and betrayal in the Deep South of the 1930s.

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

This book offers a wide-ranging and critical examination of recent counter-radicalisation policies, using case studies from several countries. Counter-radicalisation policies, such as the UK 'Prevent' strategy, have been highly controversial and increasingly criticised since their introduction. In this edited volume, voices from disciplines including sociology, political science, criminology and International Relations are brought together to address issues across the global roll-out of counter-radicalisation agendas. In so doing, the book critically interrogates: (i) the connections between counter-radicalisation and other governmental programmes and priorities relating to integration and community cohesion; (ii) the questionable dependence of counter-radicalisation initiatives on discourses and assumptions about race, risk and vulnerability to extremism; and, (iii) the limitations of existing counter-radicalisation machineries for addressing relatively new types of extremism including amongst 'right-wing' activists.

Through examining these questions, the book draws on a range of contemporary case studies spanning from counter-radicalisation in the UK, Germany and Denmark, through to detailed analyses of specific preventative initiatives in Australia and the United States. Conceptually, the chapters engage with a range of critical approaches, including discourse theory, autoethnography and governmentality. This book will be of much interest to students of radicalisation, critical terrorism studies, counter-terrorism, sociology, security studies and IR in general.

An award-winning journalist's dramatic account of a shooting that shook a community to its core, with important implications for the future On the last evening of summer in 2013, five shots rang out in a part of northeast Denver known as the Holly. Long a destination for African American families fleeing the Jim Crow South, the area had become an “invisible city” within a historically white metropolis. While shootings there weren't uncommon, the identity of the shooter that night came as a shock. Terrance Roberts was a revered anti-gang activist. His attempts to bring peace to his community had won the accolades of both his neighbors and the state's most important power brokers. Why had he just fired a gun? In *The Holly*, the award-winning Denver-based journalist Julian Rubinstein reconstructs the events that left a local gang member paralyzed and Roberts facing the possibility of life in prison. Much more than a crime story, *The Holly* is a multigenerational saga of race and politics that runs from the civil rights movement to Black Lives Matter. With a cast that includes billionaires, elected officials, cops, developers, and street kids, the book explores the porous boundaries between a city's elites and its most disadvantaged citizens. It also probes the fraught relationships between police, confidential informants, activists, gang members, and ex-gang members as they struggle to put their pasts behind them. In *The Holly*, we see how well-intentioned efforts to curb violence and improve neighborhoods can go badly awry, and we track the interactions of law enforcement with gang members who conceive of themselves as defenders of a neighborhood. When Roberts goes on trial, the city's fault lines are fully exposed. In a time of national reckoning over race, policing, and the uses and abuses of power, Rubinstein offers a dramatic and humane illumination of what's at stake.

Countering extremism is starting to receive more attention as a subject of research in academia and policy circles alike, demonstrating its rising popularity within the market. Nevertheless, the market currently lacks literature on the topic of extremism (as opposed to terrorism), and critical approaches in particular. The concept of this book thus grows from the need to look at the under-researched approaches to the topic from a critical perspective. This book brings together a set of scholars from a diverse range of countries, experts in many fields of social sciences to present valuable multidisciplinary analysis of both theoretical and practical aspects related to countering extremism. It will thus be of interest for scholars and students of the following disciplines, among others: Anthropology, Comparative Politics, Criminology, Education Studies, Gender Studies, International Relations, Post-colonial Studies, Peace Studies, Sociology, Subaltern Studies, Terrorism Studies.

This edited collection brings together international leading scholars to explore why the education of Muslim students is globally associated with radicalisation, extremism and securitisation. The chapters address a wide range of topics, including neoliberal education policy and globalization; faith-based communities and Islamophobia; social mobility and inequality; securitisation and counter terrorism; and shifting youth representations. Educational sectors from a wide range of national settings are discussed, including the US, China, Turkey, Canada, Germany and the UK; this international focus enables comparative insights into

emerging identities and subjectivities among young Muslim men and women across different educational institutions, and introduces the reader to the global diversity of a new generation of Muslim students who are creatively engaging with a rapidly changing twenty-first century education system. The book will appeal to those with an interest in race/ethnicity, Islamophobia, faith and multiculturalism, identity, and broader questions of education and social and global change.

In many societies, histories of exclusion, racism and nationalist violence often create divisions so deep that finding a way to deal with the atrocities of the past seems nearly impossible. These societies face difficult practical questions about how to devise new state and civil society institutions that will respond to massive or systematic violations of human rights, recognize victims and prevent the recurrence of abuse. *Identities in Transition: Challenges for Transitional Justice in Divided Societies* brings together a rich group of international researchers and practitioners who, for the first time, examine transitional justice through an 'identity' lens. They tackle ways that transitional justice can act as a means of political learning across communities; foster citizenship, trust and recognition; and break down harmful myths and stereotypes, as steps toward meeting the difficult challenges for transitional justice in divided societies.

Develops the concept of anxiety as a tool of political theory that draws together current political problems, from austerity and migration to security and terror

Security is a key topic of our time. But how do we understand it? Do law and religion take different views of it? In this fifth volume in the *Law and Religion in Africa* series, radicalisation, terrorism, blasphemy, hate speech, religious freedom and just war theories rub shoulders with issues of witchcraft, female genital mutilation/circumcision, child marriage, displaced communities and additional issues besides. This unique collection of topics is both challenging and inspiring, providing illumination in troubled times, and forming a sound foundation for future scholarship.

The fields of gender and religious studies have often been criticized for neglecting to engage with one another, and this volume responds to this dearth of interaction by placing the fields in an intimate dialogue. Taking a multi-disciplinary approach and drawing on feminist scholarship, the book undertakes theoretical and empirical explorations of relational and co-constitutive encounters of gender and religion. Through varied perspectives, the chapters address three interrelated themes: religion as practice, the relationship between religious practice and religion as prescribed by formal religious institutions, and the feminization of religion in Europe.
