TV presenter, writer and adventurer Alice Morrison gives her own unique and personal insight into Morocco, her home for 1001 nights. When Alice Morrison headed out to Morocco, it was to take on one of the most daunting challenges: to run in the famous Marathon des Sables. Little did she expect to end up living there. But as soon as she settled in a flat in Marrakech, she was won over by the people, the spectacular scenery and the ancient alleyways of the souk. Soon she was hiking over the Atlas mountains, joining nomads to sample their timeless way of life as they crossed the Sahara desert, and finding peace in a tranquil oasis. Despite more than 10 million tourists coming to Morocco each year, there is remarkably little that has been written about its people, their customs and the extraordinary range of places to visit, from bustling markets to vast, empty deserts. Alice makes sure she samples it all, and as she does she provides

a stunning portrait of a beautiful country. As a lone woman, she often attracts plenty of curiosity, but her willingness to participate - whether thigh deep in pigeon droppings in a tannery or helping out herding goats - ensures that she is welcomed everywhere by a people who are among the most hospitable on the planet. Alice came to fame with her BBC2 series *Morocco to Timbuktu*, and now she joins the ranks of great travel writers who can bring a country vividly to life and instantly transport the reader to a sunnier place. If you're thinking of going to Morocco, or you want to recall your time there, *My 1001 Nights* is the ideal book.

This book takes a unique approach to analysing foreign capital flows. Using the neighbourhood model, it analyzes foreign capital inflows from the perspective of both the source and destination countries. Focusing on China, India and the Caribbean, it explores the direct and spillover effects of foreign capital on the destination countries' economy.

Clemens Holzmann investigates the role of spatial contexts for autonomous embedded systems. The author presents concepts for recognizing, representing, and reasoning about qualitative spatial relations and their changes over time, as well as an appropriate architecture which has prototypically been implemented in a flexible software

framework. His results show that the proposed concepts are suitable for developing spatially aware applications and that qualitatively abstracted relations can constitute an adequate basis for this purpose.

This book examines the role of comics in the perpetuation of the myth of the American West. In particular, it looks at the ways in which lone central characters, and their acts of violence, are posited as heroic. In doing so, the book raises questions both about the role of women in a supposedly male space, in addition to the portrayal of Native Americans within the context of this violence. Various adaptations of historical figures, such as Buffalo Bill and Billy the Kid, as well as film and television stars such as The Lone Ranger and Dale Evans are examined in detail. Although concentrating on American comics, examples both from Britain and France are also analyzed.

Old depreciation systems do not die--or even fade away very fast. Businesses and the practitioners that serve them must operate with three coexisting depreciation systems--Modified Accelerated Cost Recovery System (MACRS), the Accelerated Cost Recovery System (ACRS) and the Treasury Department's Asset Depreciation System (ADR). CCH's U.S. Master Depreciation Guide offers tax and accounting professionals who work with businesses a one-stop resource for guidance in understanding and applying the complex depreciation rules to their fixed assets. This area is especially challenging, because bits and pieces of

applicable information must be gathered from a maze of Revenue Procedures, IRS Tables and IRS Regulations. These sources are frequently old and include some materials which may be non-applicable. CCH's U.S. Master Depreciation Guide pulls the pieces together, so practitioners can make sense of all the corresponding information and put the information into practice. The U.S. Master Depreciation Guide includes several useful "quick reference tables." These include a list of trucks, SUVs, and vans that are exempt from the luxury car caps because they weigh more than 6,000 pounds, trucks with a bed-length under six feet which are subject to a \$25,000 section 179 depreciation cap, a list of states that conform to the federal bonus depreciation and section 179 expensing rules, and a comprehensive table of assets and corresponding recovery periods with cross references to the location of the related U.S. Master Depreciation Guide explanation. Published annually, this new edition is completely updated to reflect all depreciation rule changes through press time in December. A special Highlights section provides a quick overview of any new legislation, cases, rulings, and regulations occurring since last year's edition, with cro

Age. This book presents 100 selected texts about this much discussed building, written then and now: from the opening speech by the Spanish king, to newspaper articles and private letters, voices of contemporary architects, architecture critics and historians, and even a text by artist Ai Weiwei, who created an installation in the outdoor area of the pavilion in 2010. Thus the history of this building's reception depicts a dazzling picture and inconceivable breadth, including statements by such eminent authors as Frank Lloyd Wright, Leonardo Benevolo, Rem Koolhaas, Peter Eisenman.

Deals with British politics in the 1760s and 1770s during the American Revolution and looks at colonialism and the general conduct of the war with America and also surveys the development of radicalism in Britain subsequent to the war.

The essays deal with developments during the period from the liquidation of the Judean state to the conquests of Alexander the Great. This was a critical time in the Near East and the Mediterranean world in general. It marked the end of the great Semitic empires until the rise of Islam in the seventh century A.D., decisive

changes in religion, with appeal to a creator-deity in Deutero-Isaiah, Babylonian Marduk cult, and Zoroastrianism. For the survivors of the Babylonian conquest in a post-collapse society the issue of continuity, with different groups claiming continuity with the past and possession of the traditions, there developed a situation favourable to the emergence of sects. The most pressing question, however, was what to do faced with the overwhelming power of empire, first Babylonian, then Persian. Finally, with the extinction of the native dynasty and the entire apparatus of a nation-state, the temple became the focus and emblem of group identity.

Explores how UK politicians and the press mobilise support for 'austerity' through appealing to socially conservative conceptions of work and community. It examines the techniques of anti-austerity social movements in challenging the prevailing mood of guilt, nostalgia and resentment and how these may offer radical alternatives for social change.

An innovative examination of heritage politics in Japan, showing how castles have been used to re-invent and recapture competing versions of the pre-imperial past and project possibilities for Japan's future. Oleg Benesch and Ran Zwigenberg argue that Japan's modern transformations can be traced through its castles. They examine how castle preservation and reconstruction campaigns served as symbolic ways to assert particular views of the past and were crucial in the making of an idealized premodern history. Castles have been used to craft identities, to create and erase memories, and to symbolically join tradition and modernity. Until 1945, they served as physical and symbolic links between the modern military and the nation's premodern martial heritage. After 1945, castles were cleansed of military elements and transformed into public cultural spaces that celebrated both modernity and the pre-imperial past. What were once signs of military power have become symbols of Japan's idealized peaceful past.

with or without a shitajiki (under-sheet) and each template square allows for correct spacing of characters to fit one kanji, hiragana or katakana. It is a very perfect tool to learn writing in Japanese and it is especially useful to students for practice or formal assignments. Each page of this notebook is printed with vertical columns of squares, with each square designed to accommodate a single Japanese character or punctuation mark.

Separate the facts from the fears about memory loss. For many older people and their families, the fear of progressive memory loss is the chief anxiety about aging. To them, lapses that younger people would laugh off as distraction may seem the early symptoms of an inevitable decline into senility. The good news is that most of these fears are unfounded. Kathleen Gose, a social worker, and Gloria Levi, a gerontologist, both have had years of experience working with older adults. They developed *Dealing with Memory Changes* to provide upbeat, practical answers to seniors' most pressing questions: • What memory changes are normal with age? • How does memory work and what conditions other than age can affect it? • How does age affect intelligence and the ability to learn? • What are the best strategies for remembering everyday details—such as house keys, shopping lists, and names? • What signs indicate a need for help? Plus, invaluable information on how memory is affected by nutrition, depression, stress, prescription drugs, alcohol, exercise—and much more.

An inspirational and informative resource, this volume highlights the preeminence of outstanding design and its importance for every civilization.

The increasing global demand for energy requires a versatile approach, prompting many researchers to focus on renewable bioenergy from different biomasses, especially cellulosic biomass. Such biomasses can be agricultural wastes, municipal wastes or direct harvests from high-yield energy crops. If properly pre-treated, the subsequent enzyme hydrolysis step is much more effective and can effectively minimise the waste disposal. Green Biomass Pretreatment for Biofuels Production reviews a range of pretreatment methods such as ammonium fiber explosion, steam explosion, dilute acid hydrolysis, alkali hydrolysis, and supercritical carbon dioxide explosion focusing on their final sugar yields from hemicellulose, glucose yields from cellulose, as well as on their feasibilities in bioenergy production processes at various scales. This book emphasises the tactical mobile and on-farm scales applications that use green pretreatments and processing technologies without the need of on-site waste treatment. Because of the varieties of different biomasses, no single pretreatment is expected to be the universal choice. Some of the pretreatment methods present niche

This book provides insight into the instances in which wildlife species can create problems. Some species trigger problems for human activities, but many others need humans to save them and to continue to exist. The text addresses issues faced by economists and politicians dealing with laws involving actions undertaken to resolve the problems of the interaction between humans and wildlife. Here, the words 'problematic species' are used in their broadest sense, as may be appreciated in the short introductions to the various sections. At times, the authors discuss special cases while always extending the discussion into a more general and broad vision. At others, they present real cutting-edge analysis of ecological topics and issues. The book will be of interest to biologists, ecologists and wildlife managers involved in research on wildlife, parks, and environmental management, as well as to government departments and agencies, NGOs and conservation wildlife organizations. Even those in contact with nature, such as hunters, herders, and farmers, will be able to find a great deal of important information. Specific case studies are selected from among the most significant and prevalent cases throughout the world. A total of 26 papers have been selected for this book, written by zoologists, biologists and ecologists. Many have an interdisciplinary approach, with contributions by economists, criminologists, technical specialists, and engineers.

When a term is overused, it tends to fall out of fashion. Cynicism seems to be an exception. Its polytropic versatility apparently prevents any discontinuation of its application. Everyone knows that cynicism denotes that which is deemed deleterious at a given time; and every time will specify its toxicities – the apparent result being the term’s non-specificity. This study describes the cynical stance and statement so as to render the term’s use scholarly expedient. Close readings of textual sources commonly deemed cynical provide a legible starting point. A rhetorical analysis of aphorisms ascribed to the arch-Cynic Diogenes facilitates describing the design of cynical statements, as well as the characteristic features of the cynical stance. These patterns are identifiable in later texts generally labeled cynical – above all in Machiavelli’s

Principe. With recourse to the Diogenical archetype, cynicism is likewise rendered describable in Gracián's Oráculo manual, Diderot's Le neveu de Rameau, and Nietzsche's Posthumous Fragments. This study's description of cynicism provides a phenomenon otherwise considered amorphous with distinct contours, renders transparent its workings, and tenders a dependable basis for further analyses.

"Taken as a trilogy, consent not to be a single being is a monumental accomplishment: a brilliant theoretical intervention that might be best described as a powerful case for blackness as a category of analysis."—Brent Hayes Edwards, author of *Epistrophies: Jazz and the Literary Imagination In Stolen Life*—the second volume in his landmark trilogy consent not to be a single being—Fred Moten undertakes an expansive exploration of blackness as it relates to black life and the collective refusal of social death. The essays resist categorization, moving from Moten's opening meditation on Kant, Olaudah Equiano, and the conditions of black thought through discussions of academic freedom, writing and pedagogy, non-neurotypicality, and uncritical notions of freedom. Moten also models black study as a form of social life through an engagement with Fanon, Hartman, and Spillers and plumbs the distinction

between blackness and black people in readings of Du Bois and Nahum Chandler. The force and creativity of Moten's criticism resonate throughout, reminding us not only of his importance as a thinker, but of the continued necessity of interrogating blackness as a form of sociality.

"This book examines the discursive connections between global flows of ideologies about leadership and good governance, how these ideologies are localized in Indonesia, and how all of this relates to changing political, bureaucratic, and market regimes between 1998 and 2004. It starts with a speech given by the head of the International Monetary Fund about the importance of good governance. It then traces the uptake of shibboleths of this speech within Indonesian government policy documents, within the Indonesian mass-media, and in the everyday talk that occurred in a government office in Indonesia during my five months of fieldwork in that office between August 2003 and January 2004. The book makes the case that in order to formulate nuanced interpretations of connection and processes of localization, researchers need to engage in a type of reflexivity that involves a constant movement between data from different timespaces. Such a practice, it is argued, adds to our understanding of how and why both researchers and those researched come to believe and present themselves in specific ways. In doing so, the book extends

contemporary conceptual work in the broad areas of sociolinguistics and linguistic anthropology as it relates to notions of scale, connection, chronotope, leadership talk, and personhood, while sketching how this conceptual work can be operationalized methodologically"--

Ten essays discuss federal democracy, the form of government of the United States. The first essay discusses the origins of American federalism. The second examines why we have a federal system, the functions federalism serves, and the consequences of federalism for the American political system. Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)

The Book of the BBC2 Series Morocco to Timbuktu: An Arabian Adventure  
Timbuktu. A city of legends and myths hidden in the heart of Africa. It was once the richest city on earth. Its greatest king changed the route of the Niger just so his wife could have a bath. Alice Morrison follows the ancient, lost salt roads from the top of Morocco across the burning sands of the Sahara to find the fabled city itself. This book is a good old-fashioned adventure with death-defying donkeys, a severe case of gold fever and plenty of goat gizzards for dinner. It explores one of the most dangerous routes in history which brought gold, salt and slaves across the Sahara and up to Europe. It is stuffed full of facts but never stuffy. It's also a peek behind the scenes at how a TV documentary is made and gives you an insiders' view of the process through the eyes of a very funny, first-time presenter. You'll laugh, you'll cry and you'll be an asset to any pub quiz history round by the end of it.
