In the Preface of the 5th Edition of Survey of Historic Costume, Tortora and Eubank conclude with the following: "In the history of dress at the beginning of the 21st century, costume might be compared to a constantly moving river. This river divides into many narrower channels that separate, cross, come together, and separate again, and yet that river continually moves on." Building on the previous editions, the authors update their analysis of Western dress to 2008. Survey of Historic Costume has, from its beginnings, taken seriously the need to accompany the text with appropriate illustrations and the major change in the 5th Edition is the move to full color throughout the book to enrich the text and the concepts. Perfect for anyone interested in historic costume, fashion, textiles, drama, and design, this beautifully illustrated book is full of interesting facts and commentary. New to this Edition:-- Over 500 four-color photographs and illustrations-- Updated text to 2008-- Additional influences from one period or civilization to another, including influences from other cultures-- Index - updated and organized to be utilized as glossary with terms defined and page numbers printed in boldface-- Instructor's Guide provides sources for visuals, websites, teaching strategies and evaluation techniques-- PowerPoint® Presentation contains interactive visual presentation with links to Internet Swatch Reference Guide for Fashion Fabrics is an all-in-one text and swatch book that focuses on the unique needs of students in fashion design, apparel merchandising, and product development.

Fabric for Fashion: The Complete Guide is the only book specifically for fashion designers to explain the behaviour and properties of different fabrics. Fashion design is largely determined

by how the fabrics work, move, feel and look. The most successful fashion designers are those who understand their materials, who match design skill with technical knowledge. This book bridges that gap by providing a mix of practical information and industry vocabulary, visually examining generic fabric types, discussing the characteristics of fabrics and showing how to exploit materials to push the boundaries of design. With stunning colour photographs that show how fashion designers, both past and present, have worked with fabrics, the book's prime objective is to stimulate creative exploration of the relationship of fabrics to fashion.

This major textbook is designed for students studying textiles and fashion at higher and undergraduate level, as well as those needing a comprehensive and authoritative overview of textile materials and processes. The first part of the book reviews the main types of natural and synthetic fibres and their properties. Part two provides a systematic review of the key processes involved first in converting fibres into yarns and then transforming yarns into fabrics. Part three discusses the range of finishing techniques for fabrics. The final part of the book looks specifically at the transformation of fabric into apparel, from design and manufacture to marketing. With contributions from leading experts in their fields, this major book provides the definitive one-volume guide to textile manufacture. Provides comprehensive coverage of the types and properties of textile fibres to yarn and fabric manufacture, fabric finishing, apparel production and fashion Focused on the needs of college and undergraduate students studying textiles or fashion courses Each chapter ends with a summary to emphasise key points, a comprehensive self-review section, and project ideas are also provided

fans who want to learn everything they need to know to choose and use quality fabric. Drawing upon the expertise of the Mood staff, the book teaches readers the fundamentals—from where fabric is produced to the ins and outs of its construction—and features a fabric-by-fabric guide to cottons and other plant fibers, wools, silks, knits, and other specialty fabrics.

This easily navigable resource provides over 125 swatches of the most recognized and widely used varieties of fabric, including natural fabrics such as cottons, silks, wools, and linens as well as artificial and synthetic fabrics like acetates, lyocells, nylons, and metallics to encourage consideration of not just the aesthetic appeal of various fabrics but also their structure, feel, and weight. Bound into a hardcover book, with descriptions and contextual illustrations alongside them, the fabrics are in their raw state, before bleaching, dyeing, or finishing, so that their properties can be observed without the distraction of color or pattern. With information on fibers, basic construction of fabrics, weights, construction, and weave comparison, the book will help student fashion designers to make informed textile choices based upon an understanding of raw materials together with the processes that make up a fabric. A useful glossary defines key terminology. The book will be useful for anyone who works with fabrics and is the ideal companion to the Fabric for Fashion book.

Magazine Fully revised and updated, the second edition of Sustainable Fashion and Textiles: Design Journeys continues to define the field of design in fashion and textiles. Arranged in two sections, the first four chapters represent key stages of the lifecycle: material cultivation/extraction, production, use and disposal. The remaining four chapters explore design approaches for altering the scale and nature of consumption, including service design, localism, speed and user involvement. While each chapter is complete in and of itself, their real value comes from what they represent together: innovative ways of thinking about textiles and garments based on sustainability values and an interconnected approach to design. Including a new preface, updated content and a new conclusion reflecting and critiquing developments in the field, as well as discussing future developments, the second edition promises to provide further impetus for future change, sealing Sustainable Fashion and Textiles: Design Journeys as the must-buy book for fashion and textiles professionals and students interested in sustainability.
