Surveying the disparate expert "literatures," which normally take no account of each other, Kegan brings them together to reveal, for the first time, what these many demands have in common. Our frequent frustration in trying to meet these complex and often conflicting claims results, he shows us, from a mismatch between the way we ordinarily know the world and the way we are unwittingly expected to understand it. In *Over Our Heads* provides us entirely fresh perspectives on a number of cultural controversies - the "abstinence vs. safe sex" debate, the diversity movement, communication across genders, the meaning of postmodernism. What emerges in these pages is a theory of evolving ways of knowing that allows us to view adult development much as we view child development, as an open-ended process born of the dynamic interaction of cultural demands and emerging mental capabilities.

In *The Futures of Criminology*, a distinguished set of international criminologists present a critical survey of the theoretical accomplishments of the field, and their viability for the future. With proposals to change ways of analyzing current developments in crime and crime control, the discussions are both wide-ranging in scope and fundamental to the reexamination of criminology. The authors discuss the limits of criminology's ability to be reflexive, the reasons for criminology's fragmentation, the encounter between criminology and postmodernism, the emergence of actuarial justice, and the insights to be gained from comparative criminology. This ground-breaking book will be compulsive reading for students, teachers and researchers in criminology, sociology of law, and sociology, as well as for all those concerned with the intellectual respectability of criminology.

Police do not and cannot prevent crime. This alarming thesis is explored by David Bayley, one of the most prolific and internationally renowned authorities on criminal justice and policing, in *Police for the Future*. Providing a systematic assessment of the performance of the police institution as a whole in preventing crime, the study is based on exhaustive research, interviews, and first hand observation in five countries--Australia, Canada, Great Britain, Japan, and the United States. It analyzes what police are accomplishing in modern democratic societies, and asks whether police organizations are using their resources effectively to prevent crime. Bayley assesses the impediments to effective crime prevention, describes the most promising reforms currently being tested by the police, and analyzes the choices that modern societies have with respect to creating truly effective police forces. He concludes with a blueprint for the creation of police forces that can live up to their promise to reduce crime and enhance public safety. Written for both the general public and the specialist in criminal justice, *Police for the Future* offers a unique multinational perspective on one of society's most basic institutions.

This work offers business strategists an integrated five-phase model for setting and implementing strategy. The model provides executives with a powerful framework for assessing and tweaking current strategy, or charting a bold new strategic course. This collection of essays describes and analyzes the ways in which government policymakers go about designing police forces and militaries. The author includes both wide-ranging comparative investigations of the dimensions of the state security phenomenon and specific case studies. Dr. Enloe uses the sociological concept of ethnicity to demonstrate how the armed forces in several nations have capitalized on racial and ethnic diversity to foster their own goals and those of the government and power elites. She examines this idea by focusing on the ethnic factors involved in the evolution of the South African military, the military-ethnic connection in Malaysia, and the role of the armed forces in the conflict in Ulster. The author illustrates convincingly that not only individual citizens desire security, but that nation-states themselves are engaged in the same pursuit. What often passes for or is justified in the name of citizen protection is in fact done to strengthen the state itself. Militaries are recruited ethnically

skewed ways, and increasing numbers of police forces through-out the world have military capacities not to enhance the security of private individuals, but to protect the status quo of the central government and the nation's "establishment." Dr. Enloe covers an assortment of countries within the framework of her central argument, which is practically as well as theoretically significant. Each chapter can be read on its own, and all deal with currently salient political conditions.

While crime, law, and punishment are subjects that have everyday meanings not very far from their academic representations, "social control" is one of those terms that appear in the sociological discourse without any corresponding everyday usage. This concept has a rather mixed lineage. "After September 11" has become a slogan that conveys all things to all people but carries some very specific implications on interrogation and civil liberties for the future of punishment and social control. The editors hold that the already pliable boundaries between ordinary and political crime will become more unstable; national and global considerations will come closer together; domestic crime control policies will be more influenced by interests of national security; measures to prevent and control international terrorism will cast their reach wider (to financial structures and ideological support); the movements of immigrants, refugees, and asylum seekers will be curtailed and criminalized; taken-for-granted human rights and civil liberties will be restricted. In the midst of these dramatic social changes, hardly anyone will notice the academic field of "punishment and social control" being drawn closer to political matters. Criminology is neither a "pure" academic discipline nor a profession that offers an applied body of knowledge to solve the crime problem. Its historical lineage has left an insistent tension between the drive to understand and the drive to be relevant. While the scope and orientation of this new second edition remain the same, in recognition of the continued growth and diversity of interest in punishment and social control, new chapters have been added and several original chapters have been updated and revised.

Crime Control As Industry, translated into many languages, is a modern classic of criminology and sociology. Nils Christie, one of the leading criminologists of his era, argues that crime control, rather than crime itself is the real danger for our future. Prison

populations, especially in Russia and America, have grown at an increasingly rapid rate and show no signs of slowing. Christie argues that this vast and growing population is the equivalent of a modern gulag, run by a rapacious industry, both public and private, with vested interests in incarceration. Pain and confinement are products, like any other, with a potentially limitless supply of resources. Widely hailed as a classic account of crime and restorative justice *Crime Control As Industry's* prophetic insights and proposed solutions are essential reading for anyone interested in crime and the global penal system. This Routledge Classics edition includes a new foreword by David Garland.

"Power comes from the barrel of a gun." Mao Tse Tung

The Idea of Police is one of the core texts in its series. Written by a leading criminologist in a highly readable, fluid style, it is intended as an introductory text on police. Klockars defines the police in terms of their right to use coercive force. He then describes the comparative evolution of the British and US police forces, providing readers with the historical background to the current state of the police. The moral conflicts and issues of discretion that policemen must cope with are explored and, lastly, he looks at two questions: What makes a good police officer? And what type of organizational, political, and social environment encourages good policework?

An inspirational and practical guide to leadership from the New York Times–bestselling author of *The 7 Habits of Highly Effective People*. Covey, named one of Time magazine's 25 Most Influential Americans, is a renowned authority on leadership, whose insightful advice has helped millions. In his follow-up to *The 7 Habits of Highly Effective People*, he poses these fundamental questions: How do we as individuals and organizations survive and thrive amid tremendous change? Why are efforts to improve falling so short in real results? How do we unleash the creativity, talent, and energy within ourselves and others? Is it realistic to believe that balance among personal and professional life is possible? The key to dealing with the challenges that we face is to identify a principle-centered core within ourselves and our institutions. In *Principle-Centered Leadership*, Covey outlines a long-term, inside-out approach to developing people and organizations. Offering insights and guidelines on how to apply these principles both at work and at home, Covey posits that these steps will lead not only to an increase in productivity and quality of work, but also to a new appreciation of personal and professional relationships as we strive to enjoy a more balanced, rewarding, and ultimately more effective life. "There seems to be no limit to the number of writers offering answers to the great perplexities of life. Covey, however, is the North Star in this field . . . without hesitation, strongly recommended." —Library Journal
