An original, compelling, and visually stunning treatment of a common childhood predicament: overcoming a fear of the water. Lottie goes to swim lessons every Saturday, but she never gets in the water. That's because she is convinced there is a shark in the pool, a shark that wants to eat her and only her. But then Walter appears. Walter likes singing and reading books and bubble baths, and his favorite food is fish sticks, just like Lottie. When Saturday rolls around again, Lottie is no more ready to jump in the pool than she was before. Or is she? Sometimes it just takes a special friend to find the courage that was inside you all along.

Individuals are not racist by intent; they are racist by culture, heritage, and education. If I were to ask anyone if they were a racist, they would immediately deny it as a possibility. They would espouse their wonderful humanitarian acts, or friends of color that would support an embracement of diversity that would make us all proud. The truth, I have never met a racist that knew they were racist. Even when educated as to what they have done, they would go to their grave stating that under no circumstances should I ever consider them a racist. This book is designed to tell you that it does not matter how many racists you meet in the office, you can still be successful. This book is designed to help you identify, and cope, and achieve success in those corporate environments that are not well. It provides you with advice on how to "swim with sharks in dark water." This book will help you to use your

“Spidey senses,” to trust your gut, to identify when you are working on a plantation, how to cope until you can leave. Oh, by the way, I need to tell you that you do not have the power at any time on any day to fix the plantation, without permanently damaging your career. The people who have fixed these issues have sacrificed their career, possibly their livelihood to ensure that we do not experience what they did. They shall always be the nameless heroes of our generation. We will always be indebted to those individuals who spoke up and lost their livelihood as a result. You need to understand that making a difference has a cost, and those that have done this have paid dearly.

Harvey Mackay, author of *Swim With the Sharks Without Being Eaten Alive*, believes that, to succeed in business, you should always do what you love, love what you do and deliver more than you promise. This book contains 85 lessons in the form of specific advice and personal anecdotes. The themes covered include getting started, working your way up, running the show, long-term sales careers, keeping out of trouble and relationships with the people you work for.

When the doctor gets frustrated by the riotous play of the five little sharks, he decides to send them packing, yet after he does so, the neighborhood becomes all too quiet as the big blue ocean simply appears all too empty without them.

Powerful and mysterious, sharks inspire both fascination and fear. Worldwide, oceans are home to some five-hundred species, and of those, fifty-six are known to reside in or pass through the waters off the coast of both North and South Carolina. At any given time, waders, swimmers, and surfers enjoying these waters are frequently within just one-hundred feet of a shark. While it's unnerving to know that sharks often swim just below the surface in the shallows, W. Clay Creswell, a shark-bite investigator for the Shark Research Institute's *Global Shark Attack File*, explains that attacks on

humans are extremely rare. In 2019 the International Shark Attack File confirmed sixty-four unprovoked attacks on humans, including three in North Carolina and one in South Carolina. While acknowledging that they pose real dangers to humans, Creswell believes the fear of sharks is greatly exaggerated. During his sixteen-year association with the Shark Research Institute, he has investigated more than one hundred shark-related incidents and has maintained a database of all shark–human encounters along the Carolina coastlines back to 1817. Creswell uses this data to expose the truth and history of this often-sensationalized topic. Beyond the statistics related to attacks in the Carolina waters, *Sharks in the Shallows* offers a history of shark–human interactions and an introduction to the world of shark attacks. Creswell details the conditions that increase a person's chances of an encounter, profiles the three species most often involved in attacks, and reveals the months and time of day with the highest probability of an encounter. With a better understanding of sharks' responses to their environment, and what motivates them to attack humans, he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment.

his family. Leave it to his parents and kid brother to waste an entire day of vacation sleeping in! Davey heads straight for the beach, book and glasses in hand, not bothering to leave a note. As the sparkling ocean entices him, he decides to test the water, never mind that "No Swimming" sign. But as the waves pull him farther from shore, Davey finds himself surrounded by water -- and something else, too. Something circling below the surface, watching, waiting. It's just a matter of time. Michael Northrop is the New York Times bestselling author of TombQuest, an epic book and game adventure series featuring the magic of ancient Egypt. He is also the author of Trapped, an Indie Next List Selection, and Plunked, a New York Public Library best book of the year and an NPR Backseat Book Club selection. At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to National Geographic, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks

in the wild. Alongside the photographs, *Sharks and People* tells the compelling story of the natural history of sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire.

dry land there's no escape: Georgie sees sharks in the dining room, squid tentacles in the street, has nightmares of being stranded at sea. Granny Codd understands. She has spent her life beside the water, but won't so much as paddle in it. Georgie's boyfriend is supportive, too, even when she decides that the answer to overcoming this fear lies in travelling to Thailand, learning to dive, and swimming with the biggest fish in the world: the massive, mighty whale shark. Could this immersive therapy actually work? There's only one way to find out. An anxious Georgie quits her job, leaves her life behind, and plunges into a realm of strange creatures, hidden depths, and intrepid diving adventurers. But as her quest expands across the oceans, her shark remains elusive, and everything else starts to fall apart around her. On this journey that veers towards death and destruction, Georgie must not only track down her shark, but find her way back to the surface.

A fascinating story about the power of networking, connection, and mentorship Written as an engaging parable, Swim! How a Shark, a Suckerfish, and a Parasite Teach You Leadership, Mentoring, and Next Level Success brings to life real-world challenges (and their solutions) and presents them in simple, yet powerful terms. The book explores the vital importance of networking, explores the steps that lead to successful networking, and explains why we need it. Swim! dives deep into the concepts of mentorship and the power of human connection. While too many business leaders spend their time obsessing about facts, figures, and the bottom line, it is more important for them to learn to manage relationships. Once attention shifts to relationships, businesses and careers can reach the next level of success. Written by a leading motivational speaker, this book offers ideas that can be applied to both personal and business life. Understand the importance of establishing habits and rituals Tap into the
