Women Empowerment: Challenges and Strategies ,2019-11-30 The proposed edited book on Women Empowerment: Challenges and Strategies, deals with the problems associated with the women community suffering from marginalization and the ways to address their identity and human rights concerns. The status of women in every nation was deprived and never considered. They were considered as mere machines to fulfill mere different duties. During ancient ages, we can see the evolution of changing and taking new perspectives. The concept of female in Manusmriti and in Puranas of considering them as dependents and deities is contradictory. There are still places where women are still considered as deprived and are still under chains it is the duty of the privileged to empower the underprivileged. Women empowerment programs failed as they overlooked the structural factors that perpetuated oppression and exploitation. The fulfillment of practical needs such as food, health care, and education cannot empower women unless the long-term strategic needs are met. The process of empowerment requires a transformation of structures of sub ordinance, control over material and intellectual resources, gaining decisions, making authority and reduction of gender inequality. The present book is the collection of Twenty-two research papers enlightens and thought-provoking articles contributed by research scholars throwing light on the women empowerment and role of religion and policies, women and nutrition, gender sensitization, role of education, status of working women in unorganized sector, role of media and NGO in promoting women empowerment, empowerment of Indian women –a challenge of 21st century, life skills and older women with reference to old age homes, depiction of women in literature and Marginalization of Women Characters in literature, social organization and woman empowerment and entrepreneurship The book will be an important reference source for scholars in the fields of rights of the marginalized sections, rights of the women, the role of education & practice and gender studies. The purpose of this edited book is to provide a common platform for academicians and policymakers for a comprehensive deliberation on issues relating to social sector development in our society. The research papers and various articles covering so many themes of social awareness for

education and social sector development are compiled in one place so that anyone can get easy access to their research. This book is edited basically for the students, teachers, researchers, and academics. The students pursuing their masters/ Ph.D. degree and doing dissertations/thesis on women empowerment may also be highly benefited by this book.
