This new edition of Robert Sommer and Barbara Sommer's successful book *A Practical Guide to Behavioral Research* continues to emphasize a hands-on, multimethod, and interdisciplinary approach to behavioral research in psychology, sociology, and anthropology. It expands the fourth edition's coverage of computer-related research methods and employs an international perspective, presenting general principles and their practical applications. Like previous editions, *A Practical Guide to Behavioral Research, 5/e*, covers the four major approaches to behavioral research (experimentation, observation, questionnaire, interview) and examines other important methods, including attitude and rating scales, the case study, semantic differential, unobtrusive measures, and the use of personal documents. It provides particularly strong treatment of observational approaches, behavior and cognitive mapping, electronic searches and Internet research, and action research. This revision includes two new chapters stimulated by student interest: Chapter 14, "Action Research," addresses the gap between doing research and having it applied; Chapter 15, "The Big Fuzzies," describes techniques for researching important concepts that are difficult to define and measure. Written in an accessible, colloquial style, this popular book encourages students to actually do research instead of just learning the concepts and language. Clear descriptions and concrete examples of abstract concepts demystify research and help students think about research procedures in a variety of settings, not just in the laboratory. Ideal for undergraduates in research methods classes, *A Practical Guide to Behavioral Research, 5/e*, is an invaluable reference for students of communications, education, nursing, design, and business. It is also a useful resource for readers who need reliable information or anyone interested in behavioral studies. The authors maintain a useful companion website at <http://psychology.ucdavis.edu/Sommerr/pg5/>.

This book describes and comments on many of those activities - induction, in-service courses, school-focused in-service training, links with industry and work in teachers' centres. It is compiled of contributions from many primary and secondary teachers, who speak about their in-service training needs and activities with a vivid clarity which will strike chords with teachers, employers and in-service providers alike. The various chapters consider teachers as individuals, and maths teaching in primary and secondary schools. Graves provides a framework for course design and examines how these six teachers have utilized or departed from the framework in meeting the challenges of their particular situations. Each narrative is followed by an analysis and a set of tasks that direct the reader's attention to a particular aspect of the framework.

The ineffectual Ambassador is just one of the handicaps facing the Americans as Southeast Asia becomes increasingly involved with Communism.

Talcott Parsons' writings are indisputably classics of American sociology. Today, more than a quarter century after Parsons' death and a full thirty years since he dominated sociological discourse, Parsons' theories still serve as flashpoints in many debates. Parsons worked his entire life to reconcile the insights of modern economics with modern sociology and to explore how an authentic economic sociology could be developed. The ambivalent reactions by contemporary sociologists surrounding Parsons' work has motivated this book in an effort to help unify the social sciences by exploring their special competencies and taking stock of their unique insights. Beginning with a transcript of Parsons' March 10th, 1973, seminar, the book follows with five essays that explore Parsons and the precise connection between his work and some of the ideas in the "new" economic sociology.

Tattooed on their Tongues should appeal to fans of America's roots music. It tells of the toll that fame and fortune takes on its practitioners, and relates how small record labels managed to fight the industry giants, promoting music on a shoestring budget.
