

Systemic Functional Linguistics And Discourse Analysis As

Applied Linguistics Methods: A Reader presents the student with three contemporary approaches for investigating text, practices and contexts in which language-related problems are implicated. Divided into three parts, the reader focuses in turn on the different approaches, showing how each is relevant to addressing real world problems, including those relating to contemporary educational practices. Part One introduces the reader to Systemic Functional Linguistics (SFL) as an approach particularly well suited to the description of language and language-related problems in social contexts. Part Two examines Critical Discourse Analysis (CDA) as a means of uncovering the relationships between language use, power and ideology. Part Three presents Ethnography (and linguistic ethnography) as a methodology for observing the use and significance of language in real-life events as they unfold. The editors's general introduction introduces the student to the tools of SFL, CDA and ethnography and explains how the three approaches each offer distinct as well as, in some cases, complementary perspectives on language in use. Each part is made up of one classic theoretical reading, one cutting-edge theoretical reading, and three problem-oriented readings and includes an introduction, which provides synopses of the individual readings making the book highly usable on courses. Applied Linguistics Methods: A Reader is key reading for advanced level undergraduates and postgraduates on Applied Linguistics, English Language, and TESOL/TEFL courses.

The Routledge Handbook of Critical Discourse Studies provides a state-of-the-art overview of the important and rapidly developing field of Critical Discourse Studies (CDS). Forty-one chapters from leading international scholars cover the central theories, concepts, contexts and applications of CDS and how they have developed, encompassing: approaches analytical methods interdisciplinarity social divisions and power domains and media. Including methodologies to assist those undertaking their own critical research of discourse, this Handbook is key reading for all those engaged in the study and research of Critical Discourse Analysis within English Language and Linguistics, Communication, Media Studies and related areas.

The volume presents current views on the achievements made in the study of Systemic Functional Linguistics in both theory and application, and on the potential domains and directions for its further development. The first part addresses issues on strengthening theoretical research and description in system network, on deepening our understanding of the concept of choice and of consequences arising from making choices in particular social contexts. It also makes comparisons of different models within SFL and if similarities and differences between SFL and another linguistic model. Part Two deals with issues on further developing SFL as an applicable linguistics. After summing up its fifty years of refinement as a theory through constant endeavours of application, the volume offers an explicit definition of Applicable Discourse Analysis, and presents views on the potential areas, methods and criteria for verbal and multimodal discourse analysis, with examples. The final part of the volume discusses potential directions for SFL, including expanding SFL typological research into other languages than English, an in other countries than the major English speaking ones, exploring solutions to the challenges faced by multimodal discourse, extending traditional translation studies to other modes, making stylistics studies across different disciplines, exploring the potential of SFL to tackle the challenges confronting language education at both macro and micro levels, and seeking the road of globalizing SFL by developing an ideal software and establishing a global cyberspace institution.

This book describes the discourse of biology from a systemic functional linguistic perspective. It offers a detailed description of resources based on text analysis. The description reveals co-textual patterns of language features, their expressions through grammatical resources, as well as their functions in the disciplinary context. The book also applies the description to analyse student texts in undergraduate biology, revealing characteristics of language and knowledge development. Although the discussion in this book focuses on the discourse of biology, both the language description and the descriptive principle can be used to inform the examination of knowledge in academic discourse in general, making this key reading for students and researchers in systemic functional linguistics, discourse analysis, English for academic purposes, applied linguistics, and science education.

Systemic Functional Linguistics is a functional model of language inspired by the work of Saussure, Hjelmslev, Whorf, and Firth. SFL was developed by Michael Halliday and his colleagues in the 1960s and has grown into a widely studied and research field, with growing interest in China, Latin America, and North America. This new five-volume collection from Routledge focuses on the foundational papers underlying SFL theory and practice and illustrative papers that have inspired succeeding work.

Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings.

The Routledge Handbook of Systemic Functional Linguistics brings together internationally renowned scholars of systemic functional linguistics (SFL) to provide a space for critical examination of the key tenets underpinning SFL theory. Uniquely, it includes description of the three main strands within contemporary SFL scholarship: Halliday's Introduction to Functional Grammar, Martin's discourse semantics and Fawcett's Cardiff Grammar. In five sections and thirty-eight interdisciplinary chapters, this is the first handbook to cover the whole architecture of SFL theory, comprising: the ontology and epistemology of SFL; SFL as a clause grammar; lexicogrammar below the clause, and SFL's approach to constituency; SFL's vibrant theory of language above the clause; and SFL as a theory of praxis with real-world applications. With a wide range of language examples, a comprehensive editors' introduction and a section on further reading, The Routledge Handbook of Systemic Functional Linguistics is an essential resource for all those studying and researching SFL or functional grammar.

This book presents an analysis of Chinese grammar from a systemic functional perspective. Its main focus is the clausal grammar of Chinese, and Dr Li provides a thorough analysis of Chinese clauses according to their constituent parts. However, uniquely, the second half of the book extends this examination into an analysis of Chinese discourse and text analysis. Professor Halliday's foreword praises Eden Li's thorough analysis, and shows its relevance to the field of systemic functional linguistics in general. Systemic Functional Grammar of Chinese provides the reader with a general theoretical framework of grammar and discourse analysis from a systemic functional perspective.

This book brings together cutting-edge research on multimodal texts and the "discourses" generated through the interaction of two or more modes of communication, for example pictures of language, typography and layout, body movement and camera movement. The contributors collected within this volume use systemic functional linguistics to analyze how meaning is generated within a series of case studies. The result is a comprehensive survey of the ways in which enhanced meaning emerges through the interaction of more

than one mode of communication. Multimodal Discourse Analysis will be useful to researchers interested in the application of systemic functional linguistics to media studies, discourse analysis and cognitive linguistics.

Systemic Functional Linguistics in the Digital Age explores the insights that SFL offers to help us understand and explain the new meanings afforded through digital channels and how they are shaped by and shape their digital contexts. SFL offers a sophisticated architecture for exploring how meanings are construed in context, and this volume focuses on three specific perspectives. Part 1 examines texts that are 'born digital' or digitally conceived, such as tweets and blogs. Part 2 focuses on texts that 'achieve digitality', or have come to replace or supplement non-digital texts with similar functions, such as an online university lecture or medical consultation. Part 3 examines and interprets texts singly or in corpora using digital tools and allows us to see patterns within and across texts that are generally not visible in single texts. The volume provides original and previously published papers from international contributors which both initiate new and sustain current lines of enquiry in SFL research within the unifying context of digitality.

This volume showcases previously unpublished research on theoretical, descriptive, and methodological innovations for understanding language patterns grounded in a Systemic Functional Linguistic perspective. Featuring contributions from an international range of scholars, the book demonstrates how advances in SFL have developed to reflect the breadth of variation in language and how descriptive methodologies for language have evolved in turn. Taken together, the volume offers a comprehensive account of Systemic Functional Language description, providing a foundation for practice and further research for students and scholars in descriptive linguistics, SFL, and theoretical linguistics.

Systemic Functional Political Discourse Analysis: A Text-based Study is the first book which takes a comprehensive systemic functional perspective on political discourse to provide a complete, integrated, exhaustive, systemic and functional description and analysis. Based on the political discourses of the Umbrella Movement – the largest public protest in the history of Hong Kong, which occupies a unique political situation in the world: a post-colonial society like many other Asian societies and yet unlike the others, it is a Special Administrative Region of China. Though it enjoys a high degree of autonomy under the principle of 'One Country, Two Systems', it is still confined to being part of the 'One Country'. The book demonstrates how a systemic functional approach can provide a comprehensive, thorough, and insightful analysis of the political discourse from four co-related and complementary approaches: contextual, discourse semantic, lexicogrammatical and historical. Apart from a thorough discussion of various systemic functional conceptions, it provides examples of various analyses from a SF perspective, including contextual parameters, registerial analysis, semantic discourse analysis, appraisal analysis, and discusses important issues in political discourse, including negotiation of self-identity, association of language, power and institutional role, and expression of 'evidentiality' and 'subjectivity'. It is written not only for those who are interested in Hong Kong politics in general and political discourse in Hong Kong in particular, but also for those who work on political discourse analysis, and those who apply SFL to various other discourses such as mass media discourse, medical discourse, teaching discourse, etc. Last but not least, this book is also intended to provide a theoretical framework in discourse analysis from the systemic functional perspective for those who work in Cantonese and in other languages.

Any piece of primary research ought to be preceded by a systematic review. The key advantage of a systematic review over the traditional narrative review is its ability to identify all the available evidence in a systematic and reliable manner. This book describes a) the key steps to undertaking a systematic review and b) the process of undertaking a meta-analysis. The book includes step-by-step examples of how to design data extraction forms, search strategies and combine in a meta-analysis

Presenting a field-defining overview of one of the most applicable linguistic theories available today, this Handbook surveys the key issues in the study of systemic functional linguistics (SFL), covering an impressive range of theoretical perspectives. Written by some of the world's foremost SFL scholars, including M. A. K. Halliday, the founder of SFL theory, the handbook covers topics ranging from the theory behind the model, discourse analysis within SFL, applied SFL, to SFL in relation to other subfields of linguistics such as intonation, typology, clinical linguistics and education. Chapters include discussion on the possible future directions in which research might be conducted and issues that can be further investigated and resolved. Readers will be inspired to pursue the challenges raised within the volume, both theoretically and practically.

This book integrates insights from dialogic theory and systemic functional linguistics (SFL) to extend our understandings of engagement in medical research articles, going beyond notions of the role of verbal dialogue to encompass mathematical and visual semiotics and consider text not just as language but as multisemiosis. The volume begins by outlining the engagement framework and offering a brief overview of historical developments in medical research discourse. This discussion culminates in the introduction of the corpus used for analysis, drawing on original research articles from key medical journals to explore verbal, mathematical, and visual engagement in turn. A subsequent chapter brings these perspectives together to demonstrate intersemiotic engagement across different stages and phases of the medical research article and how such resources work together to construe and maintain the authoritative position commonly associated with medical discourse. The book looks ahead to engagement in other related disciplinary fields and future directions for work on multisemiosis and medical research discourse more generally. This book will be of particular interest to graduate students and researchers in multimodality, critical discourse analysis, applied linguistics, SFL, and science education.

A Systemic Functional Grammar of German presents a detailed survey of the grammar and discourse of the German language. Starting with a brief summary of systemic functional concepts, the study proceeds to analyse every aspect of the clause as exchange, representation, complex and message. Each chapter includes analysis of a short text, and this analysis is elaborated throughout. The second half of the book looks at German discourse analysis, including appraisal, metaphor, and identification. Lengthy

German passages are translated in the appendix. Presupposing little or no prior knowledge of German, this book will be of interest to researchers in German language, systemic functional linguistics and discourse analysis.

This stimulating volume provides fresh perspectives on choice, a key notion in systemic functional linguistics. Bringing together a global team of well-established and up-and-coming systemic functional linguists, it shows how the different senses of choice as process and as product are interdependent, and how they operate at all levels of language. Taking an interdisciplinary approach, it covers a range of linguistic viewpoints, informed by evolutionary theory, psychology, sociology and neuroscience, to produce a complex but unifying account of the issues. This book offers a critical examination of choice and is ideal for students and researchers working in all areas of functional linguistics as well as cognitive linguistics, second-language acquisition, neurolinguistics and sociolinguistics.

Introduction to Discourse: Definitions, Debates and Decisions / Alison Sealey -- Conversation Analysis / Greg Meyers -- Discourse Analysis and Ethnography / Karin Tusting -- Discourse Analysis and Systemic Functional Linguistics / Veronika Koller -- Analysing Metaphor in Discourse / Veronika Koller -- Cognitive Linguistic Critical Discourse Analysis / Christopher Hart -- Corpus-Assisted Discourse Analysis / Paul Baker -- Multimodal Discourse Analysis / Christopher Hart -- Digitally Mediated Discourse Analysis / Johnny Unger -- Experimental Methods in Discourse Analysis / Christopher Hart.

This pioneering volume lays out a set of methodological principles to guide the description of interpersonal grammar in different languages. It compares interpersonal systems and structures across a range of world languages, showing how discourse, interpersonal relationships between the speakers, and the purpose of their communication, all play a role in shaping the grammatical structures used in interaction. Following an introduction setting out these principles, each chapter focuses on a particular language - Khorchin Mongolian, Mandarin, Tagalog, Pitjantjatjara, Spanish, Brazilian Portuguese, British Sign Language and Scottish Gaelic – and explores mood, polarity, tagging, vocation, assessment and comment systems. The book provides a model for functional grammatical description that can be used to inform work on system and structure across languages as a foundation for functional language typology.

Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

This book is intended as a Festschrift to honour the work of David Banks, Emeritus Professor of the Université de Bretagne Occidentale, France. The founder and former President of the Association Française de Linguistique Systémique Fonctionnelle, David Banks has been extremely active in bringing together linguists from different theoretical backgrounds in the study of both English and French. The volume includes papers in the three main fields in which he has published: namely, scientific writing, language change and systemic functional linguistics (SFL).

Discourses of Southeast Asia presents the latest Southeast Asian research in Systemic Functional Linguistics (SFL). SFL provides a sophisticated social semiotic architecture for exploring meaning in languages and texts in the context of Southeast Asia. This edited volume examines the ideational, interpersonal and textual metafunctions in the domains of education, media, translation and language typology. It applies SFL in text analysis so as to be relevant to theory, research and professional practice. This book brings together 12 original chapters by both seasoned and emerging scholars. Their chapters study the 'native' languages of Southeast Asia: Indonesian, Malay, Tagalog, Thai and Vietnamese, and relatively newer languages in Southeast Asia: English and Mandarin. The chapters analyze a variety of texts, namely advertisements, classroom interactions, corporate reports, dramas, interviews, media reports, narratives, novels, textbooks and video clips. This volume captures the exciting and productive state of the art of SFL in Southeast Asia. It will be of particular interest to scholars trying to understand the application of SFL in this region.

This volume addresses the increasingly typical nature of text and discourse: 'hybridity'. In an SFL perspective, this means that the cultural and situational contexts that tend to activate meanings and wordings must also be seen as being 'hybrid', or as Hasan (2000) has more fittingly put it, 'permeable': "It is not simply that predetermined qualities of genres are being mixed, combined, hybridized: the fact of the matter is that by these devices people extend, elaborate and reclassify their discursive contexts. Derrida's celebrated claim that one cannot not mix genres should really be rephrased as contexts of life cannot but be permeable; the rest follows by the dialectic of language and discursive situation." This is indeed the main message, and mission, of the book, which focuses on hybridity/permeability within the social and cultural contexts in which discourse occurs and of discourse types (covering a wide range of genres, registers, text-types, etc.), but also hybridity within the stratum of lexicogrammar itself. The volume also addresses the implications of hybridity for education and the professions.

Introduction to systemic functional linguistics explores the social semiotic approach to language most closely associated with the work of Michael Halliday and his colleagues>

Academic discourse is the gateway not only to educational success but to worlds of imagination, discovery and accumulated wisdom. Understanding the nature of academic discourse and developing ways of helping everyone access, shape and change this knowledge is critical to supporting social justice. Yet education research often ignores the forms taken by knowledge and the language through which they are expressed. This volume comprises cutting-edge work that is bringing together sociological and linguistic approaches to access academic discourse. Systemic functional linguistics (SFL) is a long-established and widely known approach to understanding language. Legitimation Code Theory (LCT) is a younger and rapidly growing approach to exploring and shaping knowledge practices. Now evermore research and practice are using these approaches together. This volume presents new advances from this inter-disciplinary dialogue, focusing on state-of-the-art work in SFL provoked by its productive dialogue with LCT. It showcases work by the leading lights of both approaches, including the foremost scholar of SFL and the creator of LCT. Chapters introduce key ideas from LCT, new conceptual developments in SFL, studies using both approaches, and guidelines for shaping curriculum and pedagogy to support access to academic discourse in classrooms. The book is essential reading for all applicable and educational linguists, as well as scholars and practitioners of education and sociology.

Bringing together leading and emerging scholars in Systemic Functional Linguistics, this book explores the contributions made to SFL theory by James Robert Martin. A leading light in the field for 40 years, this book reviews, explores and develops the theoretical agendas set out in his momentous body of work. Focussed around the four themes of systemic functional theory, linguistic typology, educational linguistics and (positive) discourse analysis, chapters debate and develop the key concepts of Martin's work. Engaging with cutting edge theoretical debates in areas such as discourse-semantics, register and genre and affiliation, *Discourses of Hope and Reconciliation* examines Martin's lasting impact on the field, developing his momentous contributions to point the way to exciting future research directions in SFL.

Systemic Functional Linguistics and Critical Discourse Analysis *Studies in Social Change* A&C Black

Adding a new introduction and two previously unpublished papers, *Discourse and Practice: New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years. Discourse, van Leeuwen argues, is a resource for representation, a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented, a framework for making sense of things. And they are plural. There can be different discourses, different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts. However abstract some discourses are, discourses ultimately always represent doings, van Leeuwen argues. Doing is the foundation of knowing, and social practices are the foundation of discourses. Studying children's books, newspaper reports, brochures and other texts, as well as photographs and children's toys, van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts. Throughout the book, van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories. van Leeuwen's work has already been widely used by critical discourse analysts across the world. This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical, and critically incisive.

Details the key terms, thinkers and texts in systemic functional linguistics.

This innovative collection brings together contributions from established and emerging scholars highlighting the "applicability" of Systemic Functional Linguistics and the ways in which theoretical and analytical conclusions drawn from its applications can inform and advance the study of language. The book discusses SFL's theoretical foundations and development in recent

years to demonstrate its evolution into a more effective analytical tool. Building on this theoretical framework, the volume showcases the theory's applications in case studies exploring four sub-disciplines of language study: multilingual studies; translation studies; language learning and language teaching; and genre analysis. This all-inclusive volume demonstrates both Systemic Functional Linguistics' efficacy as a means of theoretical analysis, but also its value as a unique approach to the study of language and meaning, making this an indispensable resource for researchers and scholars in applied linguistics, discourse analysis, genre studies, translation studies, and multilingualism.

The Routledge Handbook of Discourse Analysis covers the major approaches to Discourse Analysis from Critical Discourse Analysis to Multimodal Discourse Analysis and their applications in key educational and institutional settings. The handbook is divided into six sections: Approaches to Discourse Analysis, Register and Genre, Developments in Spoken Discourse, Educational Applications, Institutional Applications and Identity, Culture and Discourse. The chapters are written by a wide range of contributors from around the world, each a leading researcher in their respective field. All chapters have been closely edited by James Paul Gee and Michael Handford. With a focus on the application of Discourse Analysis to real-life problems, the contributors introduce the reader to a topic, and analyse authentic data. The Routledge Handbook of Discourse Analysis is vital reading for linguistics students as well as students of communication and cultural studies, social psychology and anthropology.

The application of linguistic optimization methods in the tourism, travel, and hospitality industry has improved customer service and business strategies within the field. It provides an opportunity for tourists to explore another culture, building tolerance and overall exposure to different ways of life. Innovative Perspectives on Tourism Discourse is a pivotal reference source for the latest research findings on the role of language and linguistics in the travel industry. Featuring extensive coverage on relevant areas such as intercultural communication, adventure travel, and tourism marketing, this publication is an ideal resource for linguists, managers, researchers, economists, and professionals interested in emerging developments in tourism and travel.

Bringing together a global team, this stimulating volume provides fresh perspectives on choice, a key notion in systemic functional linguistics.
