Tax Law, State-Building and the Constitution Dominic de Cogan,2020-08-06 This monograph looks at how tax is

intertwined with constitutional law and the state in the UK. It looks at a variety of topics including tax devolution, scrutiny and reform of tax legislation, the protection of taxpayers and the domestic legal processing of international rules and problems. *Tax Law, State-Building and the Constitution* presents and interrogates five key claims. First, there is a clear overlap between the concerns of tax and constitutional lawyers. Secondly, the tax system is being deeply affected by the fast pace of constitutional change. Thirdly, decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution. Fourthly, these relationships are heavily context-dependent, with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others. Fifthly, by acknowledging tax as an important moving part within the contemporary constitution we might understand both tax and constitutional law a little better. The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline, the relevance of tax to public lawyers, the meaning of state-building in the recent history of a developed country and the importance of public finances to a wider sense of 'what is going on'. These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers. Runner-up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship.

International Taxation of Banking John Abrahamson, 2020-02-20 Banking is an increasingly global business, with a complex network of international transactions within multinational groups and with international customers. This book provides a thorough, practical analysis of international taxation issues as they affect the banking industry. Thoroughly explaining banking's significant benefits and risks and its taxable activities, the book's broad scope examines such issues as the following: taxation of dividends and branch profits derived from other countries; transfer pricing and branch profit attribution; taxation of global trading activities; tax risk management; provision of services and intangible property within multinational groups; taxation treatment of research and development expenses; availability of tax incentives such as patent box tax regimes; swaps and other derivatives; loan provisions and debt restructuring; financial technology (FinTech); group treasury, interest flows, and thin capitalisation; tax havens and controlled foreign companies; and taxation policy developments and trends. Case studies show how international tax analysis can be applied to specific examples. The Organisation for Economic Co-operation and Development Base Erosion and Profit Shifting (OECD BEPS) measures and how they apply to banking taxation are discussed. The related provisions of the OECD Model Tax Convention are analysed in detail. The banking industry is characterised by rapid change, including increased diversification with new banking products and services, and the increasing significance of activities such as shadow banking outside current regulatory regimes. For all these reasons and more, this book will prove to be an invaluable springboard for problem solving and mastering international taxation issues arising from banking. The book will be welcomed by corporate counsel, banking law practitioners, and all professionals, officials, and academics concerned with finance and its tax ramifications.
