This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as: An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable. The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer required in basement sleeping rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency escape opening. The exemption for interconnection of smoke alarms in existing areas has been deleted. New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine. New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

Times change and so has the world of tiling since the original publication of the bestselling *Working with Tile* in 2005. Advances in technology and research have brought new installation products and tools to the market, including waterproofing membranes, backerboards, grouts, and cutting tools. Design elements have also seen a dramatic shift with the emergence of glass and stone launching a new era of creativity. DIYers will welcome this completely revised and updated edition, which combines easy-to-follow installation techniques and the latest design ideas. Two all-new sections focus on grouting (which can make or break any job) and working with porcelain and glass tile (a daily challenge to tile and shower door installers and plumbers). Remodelers looking to master small-scale tile projects such as adding a backsplash or retiling a powder-room floor will refer often to
