Perfumes, juices, oils and other products extracted from seeds, leaves, shoots, and bark of the herbs have been used since the earliest times in religious ceremonies, and in cooking. Magicians used them in making mysterious potions to impress the credulous public. Herb essential oils along with parts of herbs have long been in use down the millenniums to make natural beauty products. The oracles of Delphi were women who had been “intoxicated” on fumes of deadly nightshade, which would make them hallucinate. And then with bay leaves in their mouths-these leaves were considered sacred to Apollo – they used to predict the future. No wonder not many could understand them or interpret their sayings. So each hearer chose the one which suited his requirements the best, and believed the Gods had spoken. Today, these herbs are usually grown for their great value in cooking. That is why it is well worth finding a small place for herbs in any garden. The 21st century world is also slowly and steadily getting back to the idea that the herbal remedies, which were used in alternative medicine in ancient civilizations of the East and West had curative properties. The Egyptians, Babylonians, Chinese, Mayans, Aztecs, Greek and other knowledgeable people all over the world used these herbs, and derived all the healthy benefits of them as often as they could.

Author Bio Introduction A keen young budding botanist once asked me, "Ma'am, how do we know the difference between herbs, shrubs and trees?" Well, the answer is that a majority of herbal plants are definitely soft stemmed and smaller in size when compared to shrubs which are woody and often branched. Herbs are annuals and sometimes perennials. Shrubs are perennials like trees. And trees are definitely different, because they have long woody trunks, which are branched, grow to huge heights, and live really long. Herbs have been used since ancient times, for medicinal value, and also for cookery purposes. Shrubs are mainly ornamental plants, with their leaves and flowers being used as culinary accompaniments, and also for medicinal purposes. Herbs can be shrubs. Shrubs can be herbs. Woody stemmed bushes like rosemary, thyme, lavender, winter savory, and Sage come in the herbal category. The serious use of plants in medicine is in the province of homeopathic practitioners and natural herbalists who employ most species of herbs from mosses to trees in making their herbal remedies. This book is going to give you an introduction to some of the herbs, which are easy to grow and you can obtain easily fresh or dried. How did people get to know about herbs in ancient times? The awareness of the edible as well as the remedial qualities of herbs must have been gained by happy and sad experiences in prehistoric days. When food was scarce and often very nasty, pungent herbs made it more palatable. The larger succulent leaves, and plants provided salads and vegetables as an accompaniment to hunted mastodons and other prehistoric beasts. Soon, man found out that some of these herbs could cure and heal wounds and ease suffering, as even the tastiest culinary herb has a real medicinal value and virtue. This is how prehistoric man found out that Moss – sphagnum – was an excellent healer of wounds. Just imagine he went hunting and got into an argument with a sabertooth. And there he was with wounds all over his body, lying nose down on the mossy ground. So he found himself clutching a handful of moss, squeezing it, and trying to stop the blood flow from the wounds. Hey, the Moss was so absorbent, that it stopped the wound from bleeding any more. So back he came back to his tribal camp with Moss sticking all over his body. After a week or so, he noticed that his wounds were healing really well. Now, most of this was just by trial and error, and luck. His genetic makeup was strong, and his diet conducive to good natural healing. But that meant that the next time he went on the warpath with other tribes in the vicinity, he made sure that the healer had packed lots of sphagnum, along with food in a pouch for every warrior. Early civilizations inherited this knowledge and developed it even further, and both doctors and cooks used herbs appreciatively and with increasing beneficial effects. Doctors experimented with every kind of plant and cooks with the more deliciously flavored types.

A Beginner's Guide to Japanese Tea Selecting and Brewing the Perfect Cup of Sencha, Matcha, and Other Japanese Teas Tuttle Publishing Herbal medicine is nothing new. In fact, through the years, it had remained strong and garnered a huge following throughout world. This popularity is attributed to the fact that unlike conventional drugs, herbal medicine does not undergo extensive processing. As you might already know, synthetically- or chemically-made products, like over-the-counter pharmaceuticals, aren't just less effective. They also come with all sorts of dangers. Of course, there are those who still insist the herbal medicine is synonymous with quackery. Despite such claims, it cannot be denied that herbs have played a major role in the development of more than half of the drugs available today. The same active ingredients in conventional drugs are abundantly available in the formulated herbal medicines. Perhaps the only difference is that while over-the-counter drugs use only one active ingredient, herbal medicines contain complex combinations of ingredients in the purest forms. Herbalists are not trained chemists and have no access to machines. What they have is knowledge built through trial and error or in other words, experimentation.
