Over the last decade, teaching assistants (TAs) have become an established part of everyday classroom life. TAs are often used by schools to help low-attaining pupils and those with special educational needs. Yet despite the huge rise in the number of TAs working in UK classrooms, very little is known about their impact on pupils. This key and timely text examines the impact of TAs on pupils' learning and behaviour, and on teachers and teaching. The authors present the provocative findings from the ground-breaking and seminal Deployment and Impact of Support Staff (DISS) project. This was the largest, most in-depth study ever to be carried out in this field. It critically examined the effect of TA support on the academic progress of 8,200 pupils, made extensive observations of nearly 700 pupils and over 100 TAs, and collected data from over 17,800 questionnaire responses and interviews with over 470 school staff and pupils. This book reveals the extent to which the pupils in most need are let down by current classroom practice. The authors present a robust challenge to the current widespread practices concerning TA preparation, deployment and practice, structured around a conceptually and empirically strong explanatory framework. The authors go on to show how schools need to change if they are to realise the potential of TAs. With serious implications not just for classroom practice, but also whole-school, local authority and government policy, this will be an indispensable text for primary, secondary and special schools, senior management teams, those involved in teacher training and professional development, policy-makers and academics.

This book is a course text for teaching assistants. It aims to help students make the transition into undergraduate level study. It is also a teaching and learning resource for students and tutors on undergraduate programs.

Lesson Study has been actively introduced from Japan to various parts of the world, starting with the US. Such introduction is heavily connected with a focus on mathematics education and there is a strong misconception that Lesson Study is only for mathematics or science. The introduction is usually done at the departmental or form level and there has been a strong question about its sustainability in schools. This book comprehensively explores the idea of Lesson Study for Learning Community (LSLC) and suggests that reform for the culture of the school is needed in order to change learning levels among the children, teachers and even parents. In order for this to happen, the ways of management and leadership are also included as objectives of LSLC, as are practices at the classroom level. It argues that LSLC is a comprehensive vision and framework of school reform and needs to be taken up in a holistic way across disciplines. Chapters include: How to Create Time How to Build the Team How to Promote Reform How to Reform Daily Lessons How to Conduct a Research Lesson How to Discuss Observed Lessons How to Sustain School Reform based on LSLC Strong interest in LSLC is already prevalent in Asian countries, such as Japan, China, Korea, Taiwan, Indonesia, Vietnam and Singapore and is now being introduced more in the west. This book will be of great interest to those involved in education policy and reform, and for practitioners of education at all levels.
