Cerebral Palsy Freeman Miller, Steven J. Bachrach, 2006-05-08 When a child has a health problem, parents want answers. But when a child has cerebral palsy, the answers don't come quickly. A diagnosis of this complex group of chronic conditions affecting movement and coordination is difficult to make and is typically delayed until the child is eighteen months old. Although the condition may be mild or severe, even general predictions about long-term prognosis seldom come before the child's second birthday. Written by a team of experts associated with the Cerebral Palsy Program at the Alfred I. duPont Hospital for Children, this authoritative resource provides parents and families with vital information that can help them cope with uncertainty. Thoroughly updated and revised to incorporate the latest medical advances, the second edition is a comprehensive guide to cerebral palsy. The book is organized into three parts. In the first, the authors describe specific patterns of involvement (hemiplegia, diplegia, quadriplegia), explain the medical and psychosocial implications of these conditions, and tell parents how to be effective advocates for their child. In the second part, the authors provide a wealth of practical advice about caregiving from nutrition to mobility. Part three features an extensive alphabetically arranged encyclopedia that defines and describes medical terms and diagnoses, medical and surgical procedures, and orthopedic and other assistive devices. Also included are lists of resources and recommended reading.

Small Feet on the Run Sieglinde Martin, 2016-08-29 You may know much about World War II, but did you ever wonder

how children lived through this man-made disaster that killed twenty-nine million civilians in Europe? Read about eighteen ordinary children whose childhood changed due to extraordinary events not of their making. How did they make sense of their world? They collected and traded bomb shrapnel instead of baseball cards; instead of watching cartoons, they ran out in the morning to see what last night's bombs had destroyed; and boys played with live ammunition like your sons do with Fourth of July firecrackers. Read these true stories and share them with a friend. Ponder the bravery of the ten-year old girl traveling alone to her faraway home. Worry about the three-year-old watching her house burn. Cheer for the fearless boy who provides food for his family or wonder how it was possible that, in the middle of a large bombed-out city, a four-year-old brings a live chicken to her mother. These stories also talk about overwhelming fear, bottomless sadness, the heartwarming kindness of strangers and enemy soldiers, as well as childhood joys. At the end you may agree with the motto of the last chapter Never Again War.
